 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you

and your clients, colleagues and the courts.

 Intermediate Accounting, 3e, by  
 Spiceland/Sepe/Tomassini will gain  
 support in traditional and technology-  
 driven accounting departments, especially  
 those looking for a more concise, decision-  
 making text that reinforces challenging  
 concepts via CD-ROM. The revision of this  
 text is based around a "Learning System."  
 The revision of this "Learning System" was  
 built on improving the clarity of the  
 chapters, emphasizing more decision-  
 making in order to prepare students for  
 the changes taking place on the CPA

exam, acknowledging the diversity of  
 students and their learning styles by  
 creating supplemental materials to assure  
 the success of every student, and creating  
 a consistent text and supplemental  
 package for both students and instructor's  
 giving us the best possible intermediate  
 text on the market. Returning to the Third  
 edition is the award winning "Coach" CD-  
 ROM. The Coach CD-ROM is a multimedia  
 product integrating audio and video clips,  
 animated illustrations, cases, and  
 alternative reading material that helps  
 students comprehend some of the more  
 difficult topics associated with  
 intermediate accounting. Designed  
 specifically for the Spiceland text,  
 instructors and students will find these  
 learning tools placed strategically  
 throughout the text. This is the most  
 comprehensive Learning System in  
 Intermediate Accounting. At only 1120

pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied.

Communities in Action McGraw-Hill College This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS, 10E makes it easy to demonstrate that accounting is a powerful tool for business decision-making by going beyond debits and credits and keeping students focused on the big picture. For example, journal entries require students to demonstrate the balance sheet and income statement impact of transactions, helping students see how business events ultimately impact the financial statements. In addition to exposing students to annual reports of highly recognizable companies such as Nike, Porter's exclusive Ratio Decision-Model provides students with a framework for reading and interpreting financial statements to make decisions. The focus on financial statements and decision-making carries through to the end-of-chapter with a suite of case materials that have students reading and interpreting financial statements.
