The object of the present work is mainly to serve as a text book for students of History of Religions or Historical Phenomenology of Religion at the University level. This book intended also for the use of those who wish to become acquainted in a systematic and critical manner with the main themes of the History of Religions, and of other persons

who are either concerned in the education of youth or whose work it may be to present scientifically accurate conclusions with regard to the various subjects of the History of Religions. There exist excellent text books which treat of particular religions or which contain chapters on individual religions without studying them comparatively or phenomenologically. There are very few text books that attempt to present the main themes of the History of Religions in such a way as to explain the signification of the religious phenomena that are found in various religions by

means of the historical-comparative method.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Examining a series of common features in the works of Derrida and the Sufism of Ibn 'Arabi, considered to be one of the

most influential figures in Islamic thought, the author addresses the significant absence of attention on the relationship between Islam and Derrida. Presenting a deconstructive perspective on Ibn 'Arabi, the book's features include: \* the opposition to systematizing representations of God/reality/the text \* a re-emphasis on the radical unthinkability of God and the text \* a common conception of rational thought as restrictive, commodifying and ultimately illusory - and a subsequent appraisal of confusion as leading to a higher state of knowledge \* a positive belief in the infinite interpretability of the text \* a suspicion of representation - and an awareness of its semantic futility, along with a common, 'welcoming' affirmation of openness and errancy

towards God and the text. This book will be essential reading for advanced students and academics of Religious studies, Arabic and Islamic studies and those interested in the work of Derrida and Ibn 'Arabi.

Jean-Paul Sartre was a man of staggering gifts, whose accomplishments as philosopher, novelist, playwright, biographer, and activist still command attention and inspire debate. Sartre's restless intelligence may have found its most characteristic outlet in the open-ended form of the essay. For Sartre the essay was an essentially dramatic form, the record of an encounter, the framing of a choice. Whether writing about

literature, art, politics, or his own life, he seizes our attention and drives us to grapple with the living issues that are at stake. *We Have Only This Life to Live* is the first gathering of Sartre's essays in English to draw on all ten volumes of *Situations*, the title under which Sartre collected his essays during his life, while also featuring previously uncollected work, including the reports Sartre filed during his 1945 trip to America. Here Sartre writes about Faulkner, Bataille, Giacometti, Fanon, the liberation of France, torture in Algeria, existentialism and Marxism, friends lost and found, and much else. *We Have Only This Life to Live* provides an indispensable, panoramic view of the world of Jean-Paul Sartre.

Beginning with a story of an ex sex-worker drifting through a small rural town in the south, and ending with a young woman's wedding night, who learns from her new husband what it takes to kill a man, Nash writes across the complications of working class women, rendering their desires with

visceral prose and psychologically dissecting the fundamental root that threads her work: craving and the conflicts within.

Avicenna's Metaphysics (in Arabic

Ilâhiyyât) is one of the most important metaphysical treatises after Aristotle. This volume presents studies on its direct and indirect influence on Arabic, Hebrew, and Latin culture from the early 11th through the 16th century. Among the philosophical topics which receive particular attention are the distinction between essence and existence, the theory of universals, the concept of God as the necessary being, and the theory of emanation. The studies also address the philological and historical circumstances of the textual tradition in three medieval cultures.

This study examines how religious authority was distributed in early Islam. It argues the case that, as in Shi'ism, it

was concentrated in the head of state, rather than dispersed among learned laymen as in Sunnism. Originally the caliph was both head of state and ultimate source of religious law; the Sunni pattern represents the outcome of a conflict between the caliph and early scholars who, as spokesmen of the community, assumed religious leadership for themselves. Many Islamicists have assumed the Shi'ite concept of the imamate to be a deviant development. In contrast, this book argues that it is an archaism preserving the concept of religious authority with which all Muslims began.

### **A Comparative Study of Derrida and Ibn 'Arabi** Münip Baş

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. *Stand Firm: Apologetics and the Brilliance of the Gospel* argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of

the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith. *Teaching Outside the Box* Prentice Hall

Surveillance cameras. Airport security lines. Barred store windows. We see manifestations of societal fears everyday, and daily news reports on the latest household danger or raised terror

threat level continually stoke our sense of impending doom. In *A Philosophy of Fear*, Lars Svendsen now explores the underlying ideas and issues behind this powerful emotion, as he investigates how and why fear has insinuated itself into every aspect of modern life. Svendsen delves into science, politics, sociology, and literature to explore the nature of fear. He examines the biology behind the emotion, from the neuroscience underlying our "fight or flight" instinct to how fear induces us to take irrational actions in our attempts to minimize risk. The book then turns to the political and social realms, investigating the role of fear in the philosophies of Machiavelli and Hobbes, the rise of the modern "risk society," and how fear has eroded social trust. Entertainment such

as the television show “Fear Factor,” competition in extreme sports, and the political use of fear in the ongoing “War on Terror” all come under Svendsen’s probing gaze, as he investigates whether we can ever disentangle ourselves from the continual state of alarm that defines our age. Svendsen ultimately argues for the possibility of a brighter, less fearful future that is marked by a triumph of humanist optimism. An incisive and thought-provoking meditation, *A Philosophy of Fear* pulls back the curtain that shrouds dangers imagined and real, forcing us to confront our fears and why we hold to them.

The fifth edition of this leading text on political ideologies provides a clear and accessible introduction to the political creeds and doctrines that have dominated and shaped world politics. Ranging from traditional nineteenth-century ideologues such as liberalism, conservatism and socialism, to so-called 'new' ideologies such as feminism, ecologism and political Islam, the author offers a clear exposition both of the historical development of each ideology and the impact each has had on contemporary political movements, parties and governments. Their distinctive ideas and values are highlighted, together with the competing, and sometimes conflicting,

traditions which they have generated.

This new edition has been thoroughly revised and updated throughout, with extended coverage given to key current issues such as multiculturalism and neo-conservatism. Andrew Heywood's uniquely student-friendly writing style is now supported by a range of learning features in each chapter. • Ideology Previews outline the nature of the ideologies and their central themes • On-page definitions give quick-reference explanations of key terms • Illustrated 'Key Figure' Profiles provide detail on important thinkers and their major ideas • 'Key Concept' boxes explore and unpack important ideas • Boxes on 'Perspectives' and 'Tensions' outline the differences within and between ideological traditions • Questions help to
