The Hindu System of Religious Science and Art SAGE Publications Pvt. Limited
The thoroughly Revised and Updated 12th edition (2 colour) of Disha's BESTSELLER "27 Years UPSC IAS/ IPS Prelims Topic-wise Solved Papers 1 & 2 (1995-2021)" consists of past years solved papers of the General Studies Paper 1 & 2 distributed into 8 Units and 52 Topics. # This new edition includes Strategy Video by Mrunal, Notes & Sources for select questions. # The USP of the book is its flawless detailed solution to each and every question whose answer key has been validated with UPSC. # This new edition also includes an IAS Planner which will help the aspirants in planning their preparation for the Prelim & Main Exam. # This is the only book that provides Solved Papers of 27 Years of Prelim Exam along with Unsolved Questions of Mains Exam from 2013 to 2020. # The book has been empowered with Unique Inputs/ Articles by the author who is also one of the Most esteemed faculties for IAS - Mrunal on : • Understanding the IAS Exam & Strategies to Crack the Prelim & Main Exam. • How to Attempt the IAS Main Exam Questions? • How to approach the Economics section? • How to write Essays for GS IV Main exam? # The book provides UNSOLVED Mains Papers from 2013 - 20, divided topic-wise. The book also provides List of Essays divided topic-wise from 1993 - 2020. # The strength of the book lies in

the Errorless DETAILED Solutions. The book is 100% useful for both the General Studies papers (1 and 2) of the Prelims/ CSAT.

Decolonizing the Hindu Mind

Synthesis Lectures on Engineer
To understand modern science as a coherent story, it is essential to recognize the accomplishments of the ancient Hindus. They invented our base-ten number system and zero that are now used globally, carefully mapped the sky and assigned motion to the Earth in their astronomy, developed a sophisticated system of medicine with its mind-body approach known as Ayurveda, mastered metallurgical methods of extraction and purification of metals, including the so-called Damascus blade and the Iron Pillar of New Delhi, and developed the science of self-improvement that is popularly known as yoga. Their scientific contributions made impact on noted scholars globally: Aristotle, Megasthenes, and Apollonius of Tyana among the Greeks; Al-Biruni, Al-Khwarizmi, Ibn Labban, and Al-Uqlidisi, Al-Ja?iz among the Islamic scholars; Fa-Hien, Hiuen Tsang, and I-tsing among the Chinese; and Leonardo Fibbonacci, Pope Sylvester II, Roger Bacon, Voltaire and Copernicus from Europe. In the modern era, thinkers and scientists as diverse as Ralph Waldo Emerson, Johann Wolfgang von Goethe, Johann Gottfried Herder, Carl Jung, Max Müller, Robert Oppenheimer, Erwin Schrödinger, Arthur Schopenhauer, and Henry David Thoreau have acknowledged their debt to ancient Hindu achievements in science, technology, and philosophy. The

American Association for the Advancement of Science (AAAS), one of the largest scientific organizations in the world, in 2000, published a timeline of 100 most important scientific finding in history to celebrate the new millennium. There were only two mentions from the non-Western world: (1) invention of zero and (2) the Hindu and Mayan skywatchers astronomical observations for agricultural and religious purposes. Both findings involved the works of the ancient Hindus. The Ancient Hindu Science is well documented with remarkable objectivity, proper citations, and a substantial bibliography. It highlights the achievements of this remarkable civilization through painstaking research of historical and scientific sources. The style of writing is lucid and elegant, making the book easy to read. This book is the perfect text for all students and others interested in the developments of science throughout history and among the ancient Hindus, in particular.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

THE UNTOUCHABLES Sophia Perennis
The Hindu Way: An Introduction to Hinduism, the new book by bestselling author Shashi Tharoor, whose last three

books have sold over a quarter of a million copies in hardback, is the perfect introduction to one of the world's oldest, largest and most complex religions. Although there are hundreds of books on Hinduism, there are only a few which provide a lucid, accessible, yet deeply layered account of the religion's numerous belief systems, schools of thought, sects, tenets, scriptures, deities, rituals, customs, festivals and philosophies. This book is one of them. Hindu Perspectives on Evolution Createspace Independent Publishing Platform

"Subramaniam examines how science and religion have come together to propel a vision of the modern Indian nation, and in particular, a Hindu nationalist vision of India. Five illustrative cases of bionationalism animate this book: Hindu nationalist narratives of scientific development, colonial law and sexual politics in India, surrogacy and women's roles, the politics of caste and race in the language of genes and genomics, and the alignment of environmental scientists and religious activists. Subramaniam demonstrates that the politics of gender, race, class, caste, sexuality, and indigeneity are deeply implicated in the projects and narratives of the nation. At the same time, she seeks spaces of possibility and new narratives for planetary salvation that defy binary logics, incorporating science and religion, human and nonhuman, and nature and culture"--

Prophets Facing Backward Rowman & Littlefield

René Guénon's Introduction to the Study of Hindu Doctrines can serve as an introduction to all his later works- especially those which, like *Man and His Becoming* according to the Vedanta, The

Symbolism of the Cross, The Multiple States of the Being, and Studies in Hinduism, expound the more profound aspects of metaphysical doctrines in greater detail. In Part I Guenon clears away certain ingrained prejudices inherited from the 'Renaissance', with its adulation of the Greco-Roman culture and its compensating depreciation-both deliberate and instinctive-of other civilizations. In Part II he establishes the fundamental distinctions between various modes of thought and brings out the real nature of metaphysical or universal knowledge-an understanding of which is the first condition for the personal realization of that 'Knowledge' which partakes of the Absolute. Words like 'religion', 'philosophy', 'symbolism', 'mysticism', and 'superstition', are here given a precise meaning. Part III presents a more detailed examination of the Hindu doctrine and its applications at different levels, leading up to the Vedanta, which constitutes its metaphysical essence. Lastly, Part IV resumes the task of clearing away current misconceptions, but is this time concerned not with the West itself, but with distortions of the Hindu doctrines that have arisen as a result of attempts to read into them, or to graft onto them, modern Western conceptions. The concluding chapter lays down the essential conditions for any genuine understanding between East and West, which can only come through the work of those who have attained, at least in some degree, to the realization of 'wisdom uncreate'-that intellectual, suprarational knowledge called in the East jñana, and in the West gnosis.

Historical View of the Hindu Astronomy, from the earliest dawn of that science in India, down to the present time, etc Motilal Banarsidass

Publ.

After the Grand Success of its 1st Edition, Disha launches the much powerful 2nd Edition of the book '10000+ Objective MCQs with Explanatory Notes for General Studies'. This 2nd Edition is updated with latest questions of UPSC, SSC, State PSC, RRB, Bank & other exams. Further outdated questions are removed and explanations are updated. The book has been divided into 8 sections which have been further divided into chapters containing 10000 "Multiple Choice Questions" for Revision purpose and final practice. The 8 sections are - History, Polity, Economics, Geography, Science and Technology, Ecology, General Knowledge and Current Affairs. The Unique Selling Proposition of the book is the explanation to each and every question which provides additional info to the students on the subject of the questions and correct reasoning wherever required. The questions have been selected on the basis of the various types of questions being asked in the various exams.

Gene Machine Disha Publications

This book is entirely different from books that have been written on Indian civil societal relations, spiritual character, political economy, philosophical foundations, scientific roots, cultural essence, and historicity. It takes a journey from tribals upwards and looks at the pyramid of the communities in an inverse order. This book is an excise in new methodology, pedagogy, analysis, and synthesization of knowledge. Every chapter in this book reads like a new innovation in Indian social anthropology. It draws a different map for the future of this nation and its intellectual history.

The Vivāha, the Hindu Marriage

Saṁskāras Oxford University Press
Hinduism is one of the world's oldest and greatest religious traditions. In captivating prose, Shashi Tharoor untangles its origins, its key philosophical concepts and texts. He explores everyday Hindu beliefs and practices, from worship to pilgrimage to caste, and touchingly reflects on his personal beliefs and relationship with the religion. Not one to shy from controversy, Tharoor is unsparing in his criticism of 'Hindutva', an extremist, nationalist Hinduism endorsed by India's current government. He argues urgently and persuasively that it is precisely because of Hinduism's rich diversity that India has survived and thrived as a plural, secular nation. If narrow fundamentalism wins out, Indian democracy itself is in peril.

Know the meaning of Hindu Gods and Goddesses? Know the great philosophy of worship in idols by the Hindus? What makes an Avatar of Lord Vishnu? Why Devi Durga is worshipped in many different manifestations? How come death (Yama) is a God! How Hindu Gods are parts of health sciences? This book has found a foundation of the Hindu religion that enables to know Hinduism better, to find answers to all such questions. This book tells about the meanings of the Hindu Gods. It speaks about the living body. Body/health and Gods are the same! The science of "life" of ancient times is Hindu Gods, by names. The book has decoded the Hindu Gods, including astrological planets, in the language of anatomy, physiology, biochemistry, physics, behavioural science, etc. giving new dimensions to the religion, and our biological understandings. Welcome to the knowledge core of the Hinduism. Welcome to the core knowledge of the body functioning applicable to all the streams of biology and health science including Yoga, Siddha, Ayurveda, Homeopathy, etc.

How to Become a Hindu Oxford University Press

The leading voices in science studies have argued that modern science reflects dominant social interests of Western society. Following this logic, postmodern scholars have urged postcolonial societies to develop their own "alternative sciences" as a step towards "mental decolonization". These ideas have found a warm welcome among Hindu nationalists who came to power in India in the early 1990s. In this passionate and highly original study, Indian-born author Meera Nanda reveals how these well-meaning but ultimately misguided ideas are enabling Hindu

ideologues to propagate religious myths in the guise of science and secularism. At the heart of Hindu supremacist ideology, Nanda argues, lies a postmodernist assumption: that each society has its own norms of reasonableness, logic, rules of evidence, and conception of truth, and that there is no non-arbitrary, culture-independent way to choose among these alternatives. What is being celebrated as "difference" by postmodernists, however, has more often than not been the source of mental bondage and authoritarianism in non-Western cultures. The "Vedic sciences" currently endorsed in Indian schools, colleges, and the mass media promotes the same elements of orthodox Hinduism that have for centuries deprived the vast majority of Indian people of their full humanity. By denouncing science and secularization, the left was unwittingly contributing to what Nanda calls "reactionary modernism." In contrast, Nanda points to the Dalit, or untouchable, movement as a true example of an "alternative science" that has embraced reason and modern science to challenge traditional notions of hierarchy.

"A history-making manual, interreligious study and names list, with stories by Westerners who entered Hinduism and Hindus who deepened their faith"--Cove
Post-Hindu India Hardpress Publishing
A SUCCINCT ACCOUNT OF THE PROGRESS OF THE HINDU CIVILISATION AND ITS CURRENT CRISIS What do we mean by the Hindu civilisation? What are the texts and legacies that moved it forward from one century to another? How much of it has to do with inherited

religious beliefs and how has the politicisation of these beliefs changed the prism through which Hindus view themselves and others, especially those identifying with different belief systems? These are the questions the author sets out to answer with this potted history of the Hindu world, in the context of changing empires and leaderships, through colonisation and conquest, leading up to the present challenges presented by the proponents of Hindutva. Direct, hard-hitting and wise, this is an invaluable treatise for our times. About the Author Pavan K. Varma is a writer-diplomat and was till recently an MP in the Rajya Sabha. He was earlier Advisor to the Chief Minister of Bihar, with the rank of Cabinet minister. He has been India's Ambassador in several countries, also Director of the Nehru Centre in London, Official Spokesperson of the Ministry of External Affairs, and Press Secretary to the President of India. Author of over a dozen successful books, Pavan K. Varma was conferred an honorary doctoral degree for his contribution to the fields of diplomacy, literature, culture and aesthetics by the University of Indianapolis in 2005. He was also conferred the Druk Thuksey, Bhutan's highest civilian award, in 2012. **Yishvara 2000** Penguin Random House India Private Limited

A Nobel Prize-winning biologist tells the riveting story of his race to discover the inner workings of biology's most important molecule "Ramakrishnan's writing is so honest, lucid and engaging that I could not put this book down until I had read to the very end." -- Siddhartha Mukherjee, author of *The Emperor of All Maladies* and *The Gene* Everyone has heard of DNA. But by itself, DNA is just an inert blueprint for life. It is the ribosome -- an enormous molecular

machine made up of a million atoms -- that makes DNA come to life, turning our genetic code into proteins and therefore into us. Gene Machine is an insider account of the race for the structure of the ribosome, a fundamental discovery that both advances our knowledge of all life and could lead to the development of better antibiotics against life-threatening diseases. But this is also a human story of Ramakrishnan's unlikely journey, from his first fumbling experiments in a biology lab to being the dark horse in a fierce competition with some of the world's best scientists. In the end, Gene Machine is a frank insider's account of the pursuit of high-stakes science. Perspectives on Reincarnation: Hindu, Christian, and Scientific Motilal Banarsidass Publ.

Who were they and why they became UNTOUCHABLES ? This is the digital copy of "THE UNTOUCHABLES". a book wrote by The great Dr B.R. Ambedkar. Please give us your feedback : www.facebook.com/syag21 Your opinion is very important to us. We appreciate your feedback and will use it to evaluate changes and make improvements in our book.

The Hindu Temple MDPI

Winner of the 2018 Wilbur Award There are more than one billion Hindus in the world, but for those who don't practice the faith, very little seems to be understood about it. Followers have not only built and sustained the world's largest democracy but have also sustained one of the greatest philosophical streams in the world for more than three thousand years. So, what makes a Hindu? Why is so little heard from the real practitioners of the everyday faith? Why does information never go beyond clichés? Being Hindu is a practitioner's guide that takes the

reader on a journey to very simply understand what the Hindu message is, where it stands in the clash of civilizations between Islam and Christianity, and why the Hindu way could yet be the path for plurality and progress in the twenty-first century.

The Hindu-Yogi Science of Breath

Springer Nature

How do you build a scientifically and technologically strong modern nation with limited means and resources? Indian scientists faced this challenge seven decades ago when the country became independent and confronted a world rapidly advancing in science and technology. In the years that followed, they battled poor funding and archaic regulations to build India's science infrastructure from scratch. This fascinating narrative captures the story of the struggles and triumphs of these leaders of science and the world-class institutions they founded. From the cosmic-ray experiments at the Kolar Gold Fields to ISRO's stunning space observatory built under severe constraints, from the construction of one of the world's largest radio telescopes in Ooty to the development of structural biology at IISc and, most recently, the significant contributions of the country's scientific institutions towards tackling a global pandemic - *Space. Life. Matter.* brings to readers the path-breaking advances made by India's scientists to original research and what they mean to the nation's progress. Deeply informed, enlightening and inspiring, this singular, comprehensive account of the pride of place that Indian science occupies in the world is essential reading for all.

SPACE. LIFE. MATTER. BookRix

Have you ever wondered how our universe began? Or what it takes to put humans on the moon? Do you know what happens in the microscopic world of a life-saving vaccine? What would you do if you could travel through space and time? Embark on the adventure of a lifetime in this beautiful collection of up-to-the-minute essays, mind-blowing facts and out-of-this-world colour photographs, by the world's leading scientists including Professor Stephen Hawking himself. This edition features brand-new content from Dr Mary Dobson: *Plagues, Pandemics and Planetary Health*. This unmissable volume was curated by Stephen and Lucy Hawking, whose series of children's books *George's Secret Key* was a global hit. George's stories are punctuated with fascinating real-life facts and insights from leading scientists and now this incredible non-fiction has been collected into one bumper volume, with new content from key scientific figures and up-to-the-minute facts and figures for readers in 2021. READERS LOVE UNLOCKING THE UNIVERSE: "Despite its scientific content the essays are written in a very accessible style and the many topics investigated which range from the physical explanations of the universe to earth science to robotics and future predictions. Highly recommended for curious minds from around 10 years upwards" - Sue Warren, Blogger "My 9 y.o. loves this book. We've previously discussed a lot of the concepts, but this seems to answer questions I hadn't thought of, but my son wanted to know"
