This volume contributes to the development and advancement of TBLT as a research domain by investigating the intersection between tasks and technology from a variety of theoretical perspectives (e.g., educational, cognitive, sociocultural) and by gathering empirical findings on the design and implementation of diverse tasks for writing, interaction, and assessment with the mediation of technological tools such as wikis, blogs, CMC, Fanfiction sites, and virtual and synthetic environments. The innovative blend of tasks and technology in technology-mediated communication is guided by task-based language teaching and learning principles, and the contexts of study span adult college-level education settings in the United States, Mexico, the Netherlands, and Malaysia. The volume opens up a new framework that the authors call "technology-mediated TBLT," in which tasks and technology are genuinely and productively integrated in the curriculum according to learning-by-doing philosophies of language pedagogy, new language education needs, and digital technology realities.

competence; ► a short report on the four-year development, validation and consultation processes. Second Language Acquisition and Classroom Research John Benjamins Publishing Company

From the 'show' trials of the 1920s and 1930s to the London Conference, this book examines the Soviet role in the Nuremberg IMT trial through the prism of the ideas and practices of earlier Soviet legal history, detailing the evolution of Stalin's ideas about the trial of Nazi war criminals. Stalin believed that an international trial for Nazi war criminals was the best way to show the world the sacrifices his country had made to defeat Hitler, and he, together with his legal mouthpiece Andrei Vyshinsky, maintained tight control over Soviet representatives during talks leading up to the creation of the Nuremberg IMT trial in 1945, and the trial itself. But Soviet prosecutors at Nuremberg were unable to deal comfortably with the complexities of an open, western-style legal proceeding, which undercut their effectiveness throughout the trial. However, they were able to present a significant body of evidence that underscored the brutal nature of Hitler's racial war in Russia from 1941-45, a theme which became central to Stalin's efforts to redefine international criminal law after the war. Stalin's Soviet Justice provides a nuanced analysis of the Soviet justice system at a crucial turning point in European history and it will be vital reading for scholars and advanced students of the legal history of the Soviet Union, the history of war crimes and the aftermath of the Second World War.

Défi 1, méthode de français A1 Vintage

This book demonstrates the vital connection between language and gesture, and why it is critical for research on second language acquisition to take into account the full spectrum of communicative phenomena. The study of gesture in applied linguistics is just beginning to come of age. This edited volume, the first of its kind, covers a broad range of concerns that are central to the field of SLA. The chapters focus on a variety of second-language contexts, including adult classroom and naturalistic learners, and represent learners from a variety of language and cultural backgrounds. Gesture: Second Language Acquisition and Classroom Research is organized in five sections: Part I, Gesture and its L2 Applications, provides both an overview of gesture studies and a review of the L2 gesture research. Part II, Gesture and Making Meaning in the L2, offers three studies that all take an explicitly sociocultural view of the role of gesture in SLA. Part III, Gesture and Communication in the L2, focuses on the use and comprehension of gesture as an aspect of communication. Part IV, Gesture and Linguistic Structure in the L2, addresses the relationship between gesture and the acquisition of linguistic features, and how gesture relates to proficiency. Part V, Gesture and the L2 Classroom, considers teachers' gestures, students' gestures, and how students' interpret teachers' gestures. Although there is a large body of research on gesture across a number of disciplines including anthropology, communications, psychology, sociology, and child development, to date there has been comparatively little investigation of gesture within applied linguistics. This volume provides readers unfamiliar with L2 gesture studies with a powerful new lens with which to view many aspects of language in use, language learning, and language teaching.
