Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting. Lo/Fisher presents the how and why of reporting accounting information from within an easily-understood theoretical framework. Lo/Fisher has a clean layout that engages the reader with a clear writing style using plain English. This text is built on the current International Financial

Reporting Standards (IFRS) and incorporates Accounting Standards for Private Enterprise (ASPE) where appropriate. Our philosophy is that when students understand the current standards, they will be able to analyze and interpret changes in the future. Cornerstones delivers a truly unique learning system that is integrated through the entire introductory managerial accounting journey — ensuring students will

leave the course with the knowledge they need to be future business leaders. Students are guided through: Building A Strong Foundation: Students need to build a strong foundation of the fundamentals before they can move forward in this course. The unique Cornerstones approach gets them through the fundamentals FASTER so that they can transition to analyzing and applying concepts. Understanding Relationships: Rather than focusing on concepts in isolation, students should

understand accounting as a system and recognize how the end result changes based on how the numbers affect each other. CORNERSTONES aids students in this step as an important part in training them to be good decision makers. Making Decisions: Armed with the knowledge they have gained from working through the other aspects of the Cornerstones approach, students are now given the tools to bring their knowledge full-circle and practice making good business decisions.

Students love this approach because it presents materials the way they learn. Instructors love it because it gets students to master the foundations more quickly and allows more time to learn and apply the analysis and decision making of accounting. The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial

accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are

further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Cornerstones of Financial Accounting

This book provides the reader with an opportunity to practice the double entry system of accounting or bookkeeping. It contains 40 cases which are each presented as a list of

transactions for a full yearly cycle, and then the reader can then prepare a full set of journal entries, as well as a general ledger, trial balance, balance sheet, income statement, statement of retained earnings, and cashflow statement. The step-by-step solutions are provided as well, so that the student will be able to pinpoint exactly where any errors may have been made. The cases cover fictitious start-up companies with revenues from services and sales, as well as sales returns,

various expenses, capital purchases, depreciation, shareholder investment and dividends, unearned revenue, prepaid expenses, the year-end closing entry to book the income statement accounts to retained earnings. Each case also includes a business loan, along with the loan amortization schedule which allows the student to practice posting journal entries for interest expense and loan repayments. This book does not teach the theory, but instead it is intended

to allow students to practice what they have learned in their

introductory accounting or introductory bookkeeping course.
