This is a story of my trials and tribulations and how my connection with our Lord Jesus Christ managed to get me through turbulent times. He came to me and showed me in my visions his kingdom, his power, and his mercy. He gave me a second chance. Thus, I finally found my purpose in life. If you are struggling to find your purpose and your place in this world, read my life-changing story to discover how you, too, can redeem yourself in the eyes of our Lord. At the end of the day, everything will work out if you just believe in him.

The past doesn't exist. The present is a lie. The future is an illusion. Time. God. Being. Yesterday. Today. Tomorrow. God was. God wasn't. God is. God isn't. God will be. God will not be. The journey never changes. The future is inertia. Maybe it's not the first time we've experienced it all? Died. Dead. Dying. The incarnation of God grows stranger and stranger. These are the visions. Here in the past. Here in the present. Trinities of time call to us . . . from somewhere beyond. Dogs demand salvation. Robots reproduce. Pollution forces evacuation. Chaos rages. The end is near. A demise of God is here. Welcome to the future.

Sampling virtually all of the old-time styles within the musical traditions still extant in north Georgia, *Folk Visions and Voices* is a collection of eighty-two songs and instrumentals, enhanced by photographs, illustrations, biographical sketches of performers, and examples of their narratives, sermons, tales, and reminiscences.

I Love Jesus, But I Want to Die Christian Faith Publishing, Inc.

A paradigm-shifting blend of science, religion, and philosophy for the agnostic, spiritual-but-not-religious, and scientifically minded reader Many people are fed up with the way traditional religion alienates them, perpetuates conflict, vilifies science, and undermines reason. Nancy Abrams—a philosopher of science, lawyer, and lifelong atheist—is among them, but she has also found freedom in imagining a higher power. In *A God That Could Be Real*, Abrams explores a radically new way of thinking about God. She dismantles several common assumptions about God and shows why an omniscient, omnipotent God that created the universe and plans what happens is incompatible with science—but that this doesn't preclude a God that can comfort and empower us. Moving away from traditional arguments for God, Abrams finds something worthy of the name "God" in the new science of emergence: just as a complex ant hill emerges from the collective behavior of individually clueless ants, and just as the global economy emerges from the interactions of billions of individuals' choices, God, she argues, is an "emergent phenomenon" that arises from the staggering complexity of humanity's collective aspirations and is in dialogue with every individual. This God did not create the universe—it created the meaning of the universe. It's not universal—it's planetary. It can't change the world, but it helps us change the world. A God that could be real, Abrams shows us, is what humanity needs to inspire us to collectively cooperate to protect our warming planet and create a long-term civilization.

God's Government 1St Book Koinonia House

This beautifully illustrated children's book invites kids to explore God's design for ethnic diversity and challenges readers—both parents and children—to learn and live out counter-cultural, biblical views, fostering a lifelong celebration of diversity for the glory of God. Designed for four- to eleven-year-olds, *God Made Me AND You* by Shai Linne is the second book in the *God Made Me* series, starting with *God Made All of Me* by Justin and Lindsey Holcomb. Because Scripture teaches that ethnic diversity is not something that should be tolerated but rather enthusiastically embraced, Christian hip hop artist Shai Linne helps children, parents, and caregivers to celebrate this biblical truth through a lyrical, rhyming style and colorful illustrations. *God Made Me AND You* is an approachable guide for families to begin conversations about cultivating a God's perspective on ethnic diversity, confronting the sins of racism, bigotry, and ethnic pride. Because children learn from family members, media, or peers, parents and caretakers have a responsibility to teach their children what God has to say about the beauty of diversity in his image-bearers, with a particular focus on ethnic diversity. This colorful and compelling children's book serves as a resource and lifelong gift for children and parents, helping families understand diversity from a biblical perspective and with a clear picture of the beauty and glory of God.

.a personal journey of enormous merit.one of the world's great mystics blended with sound intelligence and clear self discovery. Excellent balance between inner and outer experiences, grounding the reader in the mundane as well as the spiritual heights. I almost never offer

superlatives; my standards are too high. This work is real, and REALLY good. Louise Mallory-Elliott, PhD., former clinical psychologist; now Melchizedek minister and teacher of spiritual consciousness "I Am Liberty" is a story of one woman's quest to be "in the world but not of it." With a Mighty Assistant and a storehouse of revelatory glimpses of True Reality, Libby begins to imagine how her life would be lived as an ascended being. When the imagining starts to become her daily reality, the true work of Spirit begins and she is inexorably drawn into the evolution of mind promised by God. Often breathtaking, frequently profound, "I Am Liberty" is a courageous and captivating story of realizing and returning to God.

From the author of the bestselling children's book *When God Made You* comes a rhythmic, whimsical journey through creation—for little readers who love science and wonder and the beginnings of all things. For spiritual parents who are looking for a different kind of creation book, Matthew Paul Turner's *When God Made the World* focuses on the complex way that God created our vast and scientifically operating universe, including the biodiversity of life on our planet and the intricacies of a vast solar system. Scottish illustrator Gillian Gamble brings the natural world to vibrant life with rich colors and poignant detail certain to stretch young minds and engage imaginations. Planet Earth. God made a blue and green sphere, And designed it to orbit the sun once a year. God made daytime and nighttime, climates and seasons, And all kinds of weather that vary by region. God made continents and oceans, islands and seas, A north and south pole that God put in deep freeze. God carved rivers and brooks, mountains and caves, Made beaches with sand and huge crashing waves. God made tropics and plateaus, glaciers and meadows, marshes and tundras and erupting volcanos.

The impact of The Late Great Planet Earth cannot be overstated. The New York Times called it the "no. 1 non-fiction bestseller of the decade." For Christians and non-Christians of the 1970s, Hal Lindsey's blockbuster served as a wake-up call on events soon to come and events already unfolding -- all leading up to the greatest event of all: the return of Jesus Christ. The years since have confirmed Lindsey's insights into what biblical prophecy says about the times we live in. Whether you're a church-going believer or someone who wouldn't darken the door of a Christian institution, the Bible has much to tell you about the imminent future of this planet. In the midst of an out-of-control generation, it reveals a grand design that's unfolding exactly according to plan. The rebirth of Israel. The threat of war in the Middle East. An increase in natural catastrophes. The revival of Satanism and witchcraft. These and other signs, foreseen by prophets from Moses to Jesus, portend the coming of an antichrist . . . of a war which will bring humanity to the brink of destruction . . . and of incredible deliverance for a desperate, dying planet.

The Latest Scientific Discoveries Point to an Intentional Creator Most of us remember the basics from science classes about how Earth came to be the only known planet that sustains complex life. But what most people don't know is that the more thoroughly researchers investigate the history

of our planet, the more astonishing the story of our existence becomes. The number and complexity of the astronomical, geological, chemical, and biological features recognized as essential to human existence have expanded explosively within the past decade. An understanding of what is required to make possible a large human population and advanced civilizations has raised profound questions about life, our purpose, and our destiny. Are we really just the result of innumerable coincidences? Or is there a more reasonable explanation? This fascinating book helps nonscientists understand the countless miracles that undergird the exquisitely fine-tuned planet we call home--as if Someone had us in mind all along.

When God created heaven and earth, he also created heaven and Teren. Planet Teren is identical to Earth in every respect, including its placement in a duplicate solar system. Since creation, the two parallel planets developed along almost identical lines, and when God saw that the humans on each planet were not following his commandments, he decided to send his twin sons to intercede, one son to each planet. When both sons were confronted with crucifixion, God let it stand on Earth and every other chapter gives the reader Earth's historical highlights for the past two thousand years (including each and every documented war). On planet Teren, however, God stepped in and not only resurrected Jesus but also then installed him as the CEO of the planet. From his base in Jerusalem, the Teren Jesus set the standards for human development and without war""or for that matter, any form of sin""the people of Teren turned their attention to making life meaningful, fulfilling, pleasant, and Christian. (Every other chapter documents the development on Teren over the past two thousand years.) On Earth, millions upon millions of human brains were scattered across killing field after killing field. What might have come out of those millions upon millions of lost and destroyed brains? We may find out as we take a tantalizing glimpse into life on God's Parallel Planets.
