HUERTA ODONNELL

Semantics, World View and Bible Translation Human & Rosseau

As one twentieth-century historian described it, "the subject matter of history is always men in the midst of other men - men in collectives and groups." Simply put, until the late 1960s women were not viewed as an integral part of the historical record. The few who did appear had predictable roles as the mothers and daughters, wives and mistresses of famous men. Extraordinary figures like the queens of sixteenth-century Europe or the nineteenth-century reformers in the United States, though praised for having taken on male roles, still could not escape patronizing phrases and denigrating stereotypes. Not only was history the study of "man", but the profession itself had a skewed definition. The writing of history seemed a masculine prerogative, the historian a "gentleman scholar" mediating between the past and the present. In this first full-length study of the impact of feminism on history, Judith P. Zinsser traces the ways in which self-declared feminist

scholars have worked since the early 1970s to present "the other half of history." They created a new field - the study of women - and a new perspective - gender. Zinsser vividly conjures up the heady excitement of the first women's history programs, as well as the protracted struggles over access to and equal status in faculty departments, scholarly publications, and professional organizations such as the American Historical Association. Feminist scholars have, in fact, forced the inclusion of women as fully participating members of the profession and the academy. Zinsser also writes about feminist initiatives outside of colleges and universities. She gives the first detailed account of the most influential of these "grassroots" initiatives, the National Women's History Project. In surveying the impact of all that has changed and all that has remained the same, Zinsser concludes that for feminist historians it appears to be a question of "a glass half full or a glass half empty."

Dopaminergic Mechanisms 5Continents

Open source software (free software) has emerged as a major field of scientific inquiry across a number of disciplines. When the concept of open source began to gain mindshare in the global

business community, decision makers faced a challenge: to convert hype and potential into sustainable profit and viable business models. This volume addresses this challenge through presenting some of the newest, extensively peer-reviewed research in the area.

Blast Furnace Ironmaking: Analysis, Control, and Optimization uses a fundamental first principles approach to prepare a blast furnace mass and energy balance in Excel™. Robust descriptions of the main equipment and systems, process technologies, and best practices used in a modern blast furnace plant are detailed. Optimization tools are provided to help the reader find the best blast furnace fuel mix and related costs, maximize output, or evaluate other operational strategies using the Excel™ model that the reader will develop. The first principles blast furnace Excel™ model allows for more comprehensive process assessments than the 'rules of thumb' currently used by the industry. This book is suitable for undergraduate and postgraduate science and engineering students in the fields of chemical, mechanical, metallurgical and materials engineering. Additionally, steel company engineers, process technologists, and management will find this book

useful with its fundamental approach, best practices description, and perspective on the future. Provides sample problems, answers and assignments for each chapter Explores how to optimize the blast furnace operation while maintaining required temperatures and gas flowrates Describes all major blast furnace equipment and best practices Features blast furnace operating data from five continents

Sixth-Grade High Oxford University Press, USA

A short, tough story of an assassin - the man who killed Hendrick Verwoed, the racist prime minister of South Africa, in 1966. Born in Mozambique of a Greek father and African mother, Demitrios Tsafendas was a man lost between the races, maddened by not knowing who or what he was. He thought he was white until his father abandoned him. He then discovered he was coloured. He spent 25 years wandering the world looking for a home, growing stranger and more desperate. In 1965 he arrived in South Africa and got a job as a messenger in the Parliament building - a job reserved for whites.

Unorthodox Marxism Oxford University Press

The first volume in Alexander Cordell's classic trilogy of mid-nineteenth century Wales. Set in the grim valleys of the Welsh iron country during the turbulent times of the Industrial Revolution, this unforgettable novel begins the saga of the Mortymer family - a family of hard men and beautiful women, all forced into a bitter struggle with their harsh environment, as they slave and starve for the cruel English ironmasters. But adversity could never still the free spirit of Wales, or quiet its soaring voice, and the Mortymers struggle on even as the iron foundries ravish their homeland and cripple their people. Rape of the Fair Country launched the bestselling career of Alexander Cordell in 1959 and went on to sell millions of copies in seventeen languages throughout the world.

Superb photographs accompany texts written by 2 major South African specialists.

The Conservatory of Santa Teresa Taylor & Francis

Illustrates the diversity of measurement systems, and provides in-depth guidance for specific practical problems and applications. This book also discusses new methods to provide data for research, design and development, control of processes and operations, and to facilitate safe and economic performance of systems.

The British Code of Advertising Practice Houghton Mifflin

The essays and public addresses of scholar, teacher, philosopher, and activist Es'kia Mphahlele are presented in this collection spanning 40 years of recent African history. The intellectual and distinctly South African perspective exhibited in these writings is enriched by humor and autobiographical anecdotes. Subjects addressed include African literature and literary criticism, education in a democratic South Africa, relations between Africans and African Americans, negritude, African identity, and African humanism. A critical introduction, full biography, bibliography, and brief synopsis of each essay are included.

Verliesfontein Penguin Random House South Africa

The sociology of leisure is an important part of most leisure and recreation management degree and leisure studies BTEC courses. This book is designed to provide essential material in an accessible form for students. It draws together 24 classic readings which provide comprehensive coverage of key conceptual debates in the sociology of leisure.

Applied Measurement Systems Cornell University Press

The main areas of the conference include actual problems of interaction between optical and sound waves, the results of research in adjacent with acoustooptic areas, as well as the results of

the development and research of devices using acoustooptic interaction

Sense and Sensitivity A&C Black

Examines the relationship between memory, history and the competing narratives of identity, place and gender in Australian society. The study is a window on the Australian past, demonstrating the centrality of memory to the writing of history.

Es'kia Cambridge University Press

Since the pioneering pharmacotherapy for treatment of schizophrenia in the 1950s by antipsychotics, only a few major innovations have been made, pointing to a general stagnation in the field of pharmacology of schizophrenia. Drug Discovery for Schizophrenia covers new insights in the field of schizophrenia with an aim to advance the understanding of scientists and clinicians in this area and to fuel drug discovery. The book outlines a change in the way schizophrenia is treated by moving away from focusing only on treating symptoms in patients. Innovative drugs emerge from deeper comprehension of the pathological processes that emerge earlier in life, hence, providing strategies for preventative therapy to alter the course of this mental disorder. Amongst other current topics, the book covers new findings in genetics and epigenetics, progress in animal models for schizophrenia and the usage of induced pluripotent stem cells. The combination of these important areas benefit psychiatric neuroscience, filling the gaps in the knowledge of neurobiology of schizophrenia and providing novel perspectives for future drug development.

Electronic Warfare Principles Createspace Independent Pub

This study draws a number of disciplines together from a Bible translation perspective. It offers a thorough semantic analysis of selected Hebrew lexical items referring to negative moral behaviour in the book of Isaiah, and discusses the implications of the analysis for Hebrew lexicography. The book first offers a critical appraisal of componential analysis of meaning, followed by a number of proposals to improve this analytical tool in order to bring it in line with modern insights from cognitive linguistics.

Pieterella - Daughter of Eva Bucknell University Press

Measurement is a multidisciplinary experimental science. Measurement systems synergistically blend science, engineering and statistical methods to provide fundamental data for research, design and development, control of processes and operations, and facilitate safe and economic performance of systems. In recent years, measuring techniques have expanded rapidly and gained maturity, through extensive research activities and hardware advancements. With individual chapters authored by eminent professionals in their respective topics, Applied Measurement Systems attempts to provide a comprehensive presentation and in-depth guidance on some of the key applied and advanced topics in measurements for scientists, engineers and educators.

Applied Measurement Systems South End Press

Lady Anne: A Chronicle in Verse by Antjie Krog is the first English translation of an award winning book published in Afrikaans in 1989. It engages critically and creatively with a key moment of colonial history—the time Lady Anne Barnard spent at the Cape of Good Hope, from 1797 to 1802. Usually mentioned merely as a witty hostess of fabulous parties, Anne Lindsay Barnard, the daughter of a Scottish Earl and the wife of a colonial administrator, was an independent thinker and a painter and writer of genius. She left diaries, correspondence and watercolors documenting her experiences in this exotic land, the contact zone of colonizers and indigenous peoples. Antjie Krog acts as bard and chronicles an epic about this remarkable heroine's life in South Africa, and intertwines it with life two hundred years later in the same country but now in the throes of anti-apartheid anger and vicious states of emergency. Krog's powerful and eloquent bringing together

of the past and the present, and the historical and the poetic embodies an experience that is as pertinent and compelling today in a democratic but still turbulent South Africa, as it is in the USA and other places where the intersections of race, identity, power, and language lie at the center of civic life.

Work Engendered AFRICAN SUN MeDIA

In tobacco fields, auto and radio factories, cigarmakers' tenements, textile mills, print shops, insurance companies, restaurants, and bars, notions of masculinity and femininity have helped shape the development of work and the working class. The fourteen original essays brought together here shed new light on the importance of gender for economic and class analysis and for the study of men as well as women workers. After an introduction by Ava Baron addressing current problems in conceptualizing gender and work, chapters by leading historians consider how gender has colored relations of power and hierarchy—between employers and workers, men and boys, whites and blacks, native-born Americans and immigrants, as well as between men and women—in North America from the 1830s to the 1970s. Individual essays explore a spectrum of topics including union bureaucratization, protective legislation, and consumer organizing. They examine how workers' concerns about gender identity influenced their job choices, the ways in which they thought about and performed their work, and the strategies they adopted toward employers and other workers. Taken together, the essays illuminate the plasticity of gender as men and women contest its meaning and its implications for class relations. Anyone interested in labor history, women's history, and the sociology of work or gender will want to read this pathbreaking book.

A Reconstruction of Historical Materialism BoD - Books on Demand

Series: Pericope, 3 Along with other contributions this volume brings together the papers read during the Second Pericope Meeting at the Rome, 2001 SBL conference. The Pericope series aims at making available the data on unit delimitation found in the ancient manuscripts of the Hebrew Bible, the Septuagint, the Peshitta and the Vulgate to Bible translators and exegetes and to evaluate these data for the benefit of biblical interpretation. It will contribute significantly to our understanding of the meaning of Scripture as it was written and understood in Antiquity. Contents M.C.A. Korpel, J.M. Oesch - Preface B. Becking - Petuhah and Setumah in Jeremiah 30-31 J. Cook - Unit Delimitation in the Book of Proverbs: In the Light of the Septuagint of Proverbs W.M. de Bruin - Interpreting Delimiters: The Complexity of Text Delimitation J.C. de Moor - The Structure of Micah 2:1-13: The Contribution of the Ancient Witnesses Th. Janz - A System of Unit Division from Byzantine Manuscripts of Ezra-Nehemiah K.D. Jenner, W.Th. van Peursen - Unit Delimitation and the Text of Ben Sira J.W. Olley - Paragraphing in the Greek Text of Ezekiel in P967: With Particular Reference to the Cologne Portion P. Sanders - The Colometric Layout of Psalms 1 to 14 in the Aleppo Codex J.C. de Moor - Workshop on Unit Delimitation: Micah 4:14-5:8

Drug Discovery for Schizophrenia HarperCollins Publishers

Provides state-of-the-art information about cognition in schizophrenia with a wide ranging focus on measuring and treating cognitive deficits.

Ironmaking Royal Society of Chemistry

Seasons have returned to Faerie and the fey are not happy about it. There hasn't been anything but summer in the land of the fey for thousands of years, so long that most have forgotten what the seasons are. The nights grow longer and Faerie grows colder as winter approaches, and it falls upon Vervain to help the fey through these changes. As if that's not enough, a murderer is on the loose and everyone seems to think it's her. Can the Godhunter find her way out of the darkness or will Faerie be lost to her forever? Out of the Darkness is part of a series split. It can be read alone or together with Into the Void. It features a split cover which can be placed beside Into the Void to create a full picture.
