Fractures Abstracts Search | Orthopaedic Trauma Association (OTA) AO/OTA Fracture and Dislocation Classification Compendium. Frequently when you have a good CT, you have most of the anatomic information. Often unilateral or bilateral facet dislocation is seen in rotational fractures. Distraction is the result of displacement in the vertical plane. The facet joints are separated on both sides. What are the findings? CLASIFICACION AO DE FRACTURAS PDFAs the world confronts this unprecedented epidemic, orthopaedic surgeons everywhere are still taking call, treating fractures and dislocations, and otherwise urgent and emergent cases. Because of sheer volume of COVID-19 cases, many facilities have severely minimized their surgical case volume. This coupled with supply issues, and unproven treatment and protection techniques has resulted in confusion in many situations. Journal of Orthopaedic Trauma The dislocation is described by the AO/OTA segments proximal and distal to the joint. For instance an elbow dislocation is called 13-21, and a dislocation of the syndesmototic joint in the ankle is called 43-43. Fractures with dislocation of the joint are classified both as fractures and dislocations. Primary and secondary procedures Steppingstones to the implementation of an in-hospital ...The AO/OTA Fracture and Dislocation Classification can be used in diagnosing specific forms of long bone fractures.
