No-Nonsense Guide to Measuring Productivity What is Productivity? Let's define productivity. Productivity is a measure of efficiency of a person completing a task. We often assume that productivity means getting more things done each day. Wrong. Productivity is getting important things done consistently. And no matter what you are working on, there are only a few things that are truly important.

The Productivity Guide: My Best Productivity and Time ... The main productivity = profit measurement is the "team effectiveness ratio", which measures how much gross profit the company earns for every dollar spent on salary. This can be better than measuring profit against time as the goal is to get your team to work smarter, not longer. Strategy 6: The "Getting Shit Done" Strategy

8 Simple Strategies for Measuring Productivity at Your Company Turnover rate is an essential productivity metric used by human resources professionals to measure employee retention. Turnover is an inherent part of running a business. For better or worse, employees will come and go in accordance with their talents and desires.

7 Productivity Metrics Examples & KPIs To Measure ... Productivity is a statistical relationship between the number of outputs divided by the number of inputs. In simple terms, if two companies are producing very similar widgets, at the same cost, then the company who can produce more at the same expenditure could be deemed to be the more productive company.
