**Revision Guide)**

Worth Pub

This fifth edition of International Law: A South African Perspective is now titled Dugard's International Law: A South African Perspective, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. Dugard's International Law: A South African Perspective presents a South African perspective of international law. The basic principles of international law are described and

examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.

*Development Financial Times/Prentice Hall*

This book draws together two domains of psychological

theory, Vygotsky's cultural-historical theory of cognition and narrative theories of identity, to offer a way of rethinking the human subject as embodied, relational and temporal. A dialogue between these two ostensibly disparate and contested theoretical trajectories provides a new vantage point from which to explore questions of personal and political change. In a world of deepening inequalities and increasing economic precarity, the demand for free, decolonised quality education as articulated by the South African Student Movement and in many other contexts around the world, is disrupting established institutional practices and reinvigorating

possibilities for change. This context provokes new lines of hopeful thought and critical reflection on (dis)continuities across historical time, theories of (social and psychological) developmental processes and the practices of intergenerational life, particularly in the domain of education, for the making of emancipatory futures. This is essential reading for academics and students interested in Vygotskian and narrative theory and critical psychology, as well as those interested in the politics and praxis of higher education.

*XXX International Congress of Psychology: Abstracts*  
Oxford University Press

In today's highly competitive market, organizations increasingly need to innovate in order to survive. Drawing on a wealth of psychological research in the field of creativity, David H. Cropley and Arthur J. Cropley illustrate practical methods for conceptualizing and managing organizational innovation. They present a dynamic model of the interactions between four key components of creativity - product, person, process, and press - which function as building blocks of innovation. This volume sheds new light on the nature of innovative products and the processes that generate them, the psychological characteristics of

innovative people, and the environments that facilitate innovation. It also fills a significant gap in the current literature by addressing the paradoxical quality of organizational innovation, which may be both helped and hindered by the same factors. The authors demonstrate that with proper measurement and management, organizations can effectively encourage individuals to produce and take advantage of novel ideas.

Psychology AS

Routledge

This book presents cutting edge conceptualizations of the psychological challenges of inequity and engages the audience in examining the global nature of inequity and how it

psychologically impacts human beings across both space and time. The Psychology of Inequity: Global Issues and Perspectives examines the psychological consequences of inequity beyond the borders of the United States and other western nations.

Inequity does not end at national borders; it is a global problem that reflects the interdependent nature of our planetary existence. This book advances our understanding of psychological inequity as a global problem requiring global solutions. The volume approaches its topic from many angles, moving from a discussion of the psychological concerns of specific

groups—from targets of racism and sexism to the plights of migrants, refugees, and immigrants—to large scale global inequities and their psychological consequences, such as educational inequities and climate change. An excellent introduction to decolonized psychology on an international scale, this book will benefit anyone interested in learning more about promoting global equity in psychologically healthy and culturally appropriate ways.

*The Mobile Learning Voyage - From Small Ripples to Massive Open Waters*  
Routledge

This book explains psychological, sociopolitical and organisational change

in multidisciplinary settings. It shows how advanced techniques of contextual analysis can be applied to complex situations and offers a new cybernetic agency paradigm based on living systems theory. It models, diagnoses, and analyses complex, realworld situations to anticipate patterns of behaviour.

This comprehensive study of a range of contemporary career issues faced by both individuals and organizations has been revised and updated to reflect the most recent research and trends. The primary thrust of the latest edition is change—organizational change, changes in the work force, and

changes in peoples lives. Among the topics discussed are the meaning of work, the implication of change on careers, career planning and management, practical applications of career choice, and organizational support practices. A glossary of terms has also been included to aid in the comprehension of the concepts related to each chapter.

This revision guide provides concise coverage of the central topics within Personality, Individual Difference and Intelligence Psychology, presented within a framework designed to help you

focus on assessment and exams. The guide is organised to cater for QAA and BPS recommendations for course content. Sample questions, assessment advice and exam tips drive the organisation within chapters so you are able to grasp and marshal your thoughts towards revision of the main topics. Features focused on critical thinking, practical applications and key research will offer additional pointers for you in your revision process and exam preparation. A companion website provides supporting resources for self testing, exam practice, answers to questions in the book, and links to further resources.

Where great science meets great teaching. At just fourteen chapters, *Psychology: Core Concepts 7e* provides rich coverage of the foundational topics taught in most introductory courses. *Psychology: Core Concepts* focuses on a manageable number of core concepts (usually three to five) in each chapter, allowing students to attain a deeper level of understanding of the material. Learning is reinforced through focused application and critical thinking activities, and connections between concepts are drawn across chapters to help students see the big picture of psychology as a whole. The 7th edition features an enhanced critical thinking emphasis,

with new chapter-opening Problems and new end-of-chapter critical thinking applications that promote active learning. Dugard's International Law Pearson Higher Ed After all the hours of studying, reading and preparation, the nights spent revising and the writing and re-writing of assignments, 'success' for university students can often be represented with a single grade or digit, summing up a wide range of activities. The authors of this timely book ask how fair that assessment is. This book is about a long-ignored determinant of student satisfaction, concerning the perception of how fairly students are judged, marked, ranked and rewarded for

demonstrating their capabilities at university. In the high stakes competitive field of higher education, students are increasingly positioned as customers whose views on their university experience are considered vitally important. Yet paradoxically, little research has been undertaken to find out more about how students decide whether they have been treated fairly and what they do about it. This book fills a major gap in our understanding of these issues, responding to four key questions: Why is the assessment of students' capabilities the core business of universities? What are the main sources of

student frustration with assessment arrangements? What do students do when they think they have been treated unfairly? What can be done to promote fair assessment at university? In doing so, this book goes beyond the superficial consideration of university assessment as a 'necessary requirement' by unravelling the underlying issues that really count – what is considered fair assessment and what is not. Towards Fairer University Assessment will be of interest to higher education academics, administrators and managers, researchers in the areas of education policy and politics, as well as advanced

undergraduate and postgraduate students.

**Psychology in Society** Juta and Company Ltd

This book constitutes the proceedings of the 14th International Conference on Mobile and Contextual Learning, mLearn 2015, held in a cruise ship leaving from and arriving to Venice, Italy, in October 2015. The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions. The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". The conference theme paid tribute to the developments that

brought mobile learning from its infancy steps in the early 2000s to maturity in 2015, while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning, and emerging ambient technologies.

*The Psychology of Innovation in Organizations* Springer Nature

The abstracts of the XXX International Congress of Psychology (July 2012, Cape Town) are published as a supplement to Volume 47 of the International Journal of Psychology. The published volume includes the abstracts of the invited addresses, symposia, oral and poster presentations, numbering over 5,000

separate contributions and creating an invaluable overview of the discipline of psychological science around the world today.

*Narrative Psychology and Vygotsky in Dialogue* Oswaal Books

This revision guide provides concise coverage of the central topics within Research Methods in Psychology, presented within a framework designed to help you focus on assessment and exams. The text encapsulates all the subject matter listed in the BPS Qualifying Examination syllabus for the area. The structure of the book represents a logical, linear progress through your typical learning in relation to Research Methods in Psychology. The two authors bring

their clear, accessible style to bear on this, making the normally 'dry' subject matter seem more lively and engaging. The chapter on writing reports is deliberately left to the end since this is the natural culmination of your research process. Sample questions, assessment advice and exam tips drive the organisation within chapters so you are able to grasp and marshal your thoughts towards revision of the main topics. Features focused on critical thinking, practical applications and key research will offer additional pointers for you in your revision process and exam preparation. A companion website provides supporting resources for self testing, exam practice,

answers to questions in the book, and links to further resources.

### **Towards Fairer University**

**Assessment** Pearson Higher Ed

Christian Perspectives on Human Development World Scientific

This edited book brings together an international cast of contributors to examine how academic literacy is learned and

mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of

academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their

research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.
