Nations are haemorrhaging refugees around the world. How displaced peoples are treated is under constant scrutiny- whether in the UK, the USA, and Australia, or Turkey, Colombia, and Uganda. How will the Church respond in these turbulent times? Resurrection Church Beirut in Lebanon was a small church of around one hundred people who then welcomed refugees from Middle Eastern countries, sacrificially served those in need in their community and saw the kingdom of God come. Through Pastor Hikmat’s leadership over the last decade, Resurrection Church has grown to over two thousand believers and the emphasis he brought on disciple-making has resulted in the church currently having two hundred and seventy life groups. Using his church’s powerful testimony, Pastor Hikmat Kashouh teaches us how to disciple refugees from Arab contexts. Jesus is drawing more and more people to himself in the Middle East through the ministry of churches like Resurrection Church in Lebanon, and through miraculous divine visitations of God. In this book the church has a resource to help love, serve and disciple refugees, equip emerging indigenous leaders and understand discipleship of people from non-Christian backgrounds.

Preaching is an integral part of every church service, and its purpose has always been to edify, encourage, and to emphasize the positive effects of coming together as a people of God. Yet there remains an inconsistency between the intended goals of preaching and the subjective perception of the listeners. In this homiletical study, Dr. Enoch Šeba provides fresh insight into the “turn to the listener” model and offers a theologically sustainable warrant mandate for the transformation of the preaching practice through a stronger involvement of the congregation. While grounding the research in the experience of Croatian Baptists, Dr. Šeba highlights practical suggestions for both listeners and preachers that are transferrable across contexts. This important work reveals that preaching can and should be transformed into a truly congregational practice that will affirmatively affect the dynamics of ecclesial life. This book will spark conversations and induce small-scale changes on a variety of levels while bridging the gap between preachers and their listeners.

The sacred-secular divide permeates our churches, our seminaries, and our lives. By perpetuating the false belief that there are some areas of life that are not important to God, some callings that are second-class, and some spheres of society that are not worth engaging, the sacred-secular divide diminishes our understanding of God, discipleship, missiology, and the gospel itself. Seeking to liberate the global church from the power of this dichotomy, Whole-Life Mission for the Whole Church provides theological educators with the tools they need to combat the sacred-secular divide in the very realm where it is so often generated: the classroom. Filled with contributions from practitioners around the world, this book contains a wealth of insight into both the nature of the problem and the possibilities for its solution. The approaches suggested here are biblically rooted, contextually appropriate, and experientially tested, offering an excellent resource for educators desiring to transform their institutional cultures, curriculums, and classrooms into environments that envision, empower, and liberate the whole church for its role in the mission of God.

A tightly argued and expansive examination of the pitfalls of transhumanism that reacquaints us with what it means to live well. Advocates of transhumanism, or "radical" enhancement, urge us to pursue the biotechnological heightening of select capacities - above all, cognitive ability - so far

beyond any human limit that the beings with those capacities would exist on a higher ontological plane. For proponents of such views, humanity's self-transcendence through advancements in science and technology may even be morally required. Consequently, the human stakes of how we respond to transhumanism are immeasurably high. In *Posthuman Bliss? The Failed Promise of Transhumanism*, Susan B. Levin challenges transhumanists' overarching commitments regarding the mind and brain, ethics, liberal democracy, knowledge, and reality, showing their notion of humanity's self-transcendence into "posthumanity" to be little more than fantasy. Uniting philosophical with scientific arguments, Levin mounts a significant challenge to transhumanists' claim that science and technology support their vision of posthumanity. In a clear and engaging style, she dismantles transhumanists' breezy assurances that posthumans will emerge if we but allocate sufficient resources to that end. Far from offering theoretical and practical "proof of concept" for the vision that they urge upon us, Levin argues, transhumanists engage inadequately with cognitive psychology, biology, and neuroscience, often relying on questionable or outdated views within those fields. Having shown in depth why transhumanism should be rejected, Levin argues forcefully for a holistic perspective on living well that is rooted in Aristotle's virtue ethics but that is adapted to liberal democracy. This holism is thoroughly human, in the best of senses: It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation.
