A Course for Business Studies and Economics Students

This publication highlights
the need for test
developers to provide
clear explanations of the
ability constructs which
underpin tests offered in
the public domain. An
explanation is increasingly
required, if the validity of
test score interpretation
and use are to be
supported both logically,
and with empirical
evidence. The book
demonstrates the
application of a
comprehensive test
validation framework
which adopts a socio-
cognitive perspective. The
framework embraces six
core components which
reflect the practical
nature and quality of an
actual testing event. It

examines Cambridge ESOL writing tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.

This volume reports

research that informs the development of reading and listening assessment in IELTS. This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development.

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English

language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

The main focus of this volume is test development and accreditation requirements and needs. One of the major

objectives here is to show the key aspects of the application of assessment in higher education and the systems of accreditation. Thanks to its unique perspective, it offers a different approach on various aspects of second language assessment. As universities are one of the best arenas for the analysis of language testing, the book thoroughly prepares higher education teachers to apply pilot studies and shows students' responses to new testing techniques and accreditation requirements. It offers an enlightening guide for scholars with an academic interest in acquiring the basic principles of language testing and accreditation, providing real cases of how new ways of testing and accreditation can be useful to second language teachers and students. Readers will not only come to understand how to use new testing strategies, but also have the opportunity to see that the proposals described in each chapter may be useful to language assessment and motivation of students.
