The Dream Society: How the Coming Shift from Information to Imagination Will Transform Your Business Chronicle Books

FOREWORD BY JANE FONDA A timeless collection of philosophies from renaissance performer and the world's most famous shape-shifter RuPaul, whose sage outlook has created an unprecedented career for more than thirty-five years. GuRu is packed with more than 80 beautiful photographs that illustrate the concept of building the life you want from the outside in and the

inside out. "You're born naked and the rest is drag." As someone who has deconstructed life's hilarious facade, RuPaul has broken "the fourth wall" to expand on the concept of mind, body, and spirit. This unique perspective has allowed RuPaul to break the shackles of self-imposed limitations, but reader beware, this is a daily practice that requires diligence and touchstones to keep you walking in the sunshine of the spirit. Once you're willing to look beyond the identity that was given to you, a hidden world of possibilities will open its doors. Throughout the history of humans on this planet, there've always been shaman, seers, and mediums who are able to interpret both high and low frequencies and remind humans to look beyond the surface for the truth of who

we really are. And who we really are is an extension of the power that created the universe (aka: God in drag). FYI: most people are not willing to hear or accept that. That is RuPaul's secret for success, not only in show business, but in all aspects of life, especially in navigating the emotional landmines that inhibit most sweet, sensitive souls. If you think this book is just about "doing drag," you are sorely mistaken because for RuPaul, drag is merely a device to deactivate the identity-based ego and allow space for the unlimited.

 Uproarious advice and never-before-seen color photos from drag queen extraordinaire Bianca Del Rio The cheeky, larger-than-life drag queen and outrageous comic—"The Joan Rivers of the Drag World," (New York Times)—who isn't afraid to shock or offend brings her trademark acerbic wit and sharp commentary to the page in an illustrated collection of advice. When it comes to insult comics, Bianca Del Rio is in a class by herself. Fierce, funny, and fabulous—a would-be love child sired by John Waters and birthed by Joan

Rivers—Bianca sandblasted her name in the annals of pop culture on RuPaul’s Drag Race. Thanks to her snarky frankness, impeccable comedic timing, and politically incorrect humor, she became the show’s breakout star, winning its sixth season. In *Blame It On Bianca Del Rio*, Bianca shares her opinions loudly and proudly, offering raucous, hilarious, no-holds-barred commentary on the everyday annoyances, big and small, that color her world, and make it a living, albeit amusing, hell for anyone who inhabits it. A collection of biting advice filled with vibrant photos from Bianca’s twisted universe, *Blame It On Bianca Del Rio* will shock you and keep you laughing. But be warned: it is not for the faint of heart!

Current discussions in the West on the relation of science and religion focus mainly on science's uneasy relationship with the traditional Judeo-Christian view of life. But a parallel controversy exists in the Muslim world regarding ways to integrate science with Islam. As physicist Taner Edis shows in this fascinating glimpse into contemporary Muslim

culture, a good deal of popular writing in Muslim societies attempts to address such perplexing questions as: - Is Islam a "scientific religion"? - Were the discoveries of modern science foreshadowed in the Quran? - Are intelligent design conjectures more appealing to the Muslim perspective than Darwinian explanations? Edis examines the range of Muslim thinking about science and Islam, from blatantly pseudoscientific fantasies to comparatively sophisticated efforts to "Islamize science." From the world's strongest creationist movements to bizarre science-in-the-Quran apologetics, popular Muslim approaches promote a view of natural science as a mere fact-collecting activity that coexists in near-perfect harmony with literal-minded

faith. Since Muslims are keenly aware that science and technology have been the keys to Western success, they are eager to harness technology to achieve a Muslim version of modernity. Yet at the same time, they are reluctant to allow science to become independent of religion and are suspicious of Western secularization. Edis examines all of these conflicting trends, revealing the difficulties facing Muslim societies trying to adapt to the modern technological world. His discussions of both the parallels and the differences between Western and Muslim attempts to harmonize science and religion make for a unique and intriguing contribution to this continuing debate.
