Relive Ford's glory days in the muscle car era in this stunning new volume covering the popular and powerful Cobra Jets! Ford's "Total Performance" racing program in the early 1960s was the first stone turned in the task of repurposing its image to the youth market. The introduction of the Mustang increased that exponentially, but even in 289 Hi-Po form it was no match for the Pontiac GTO or other muscle cars. Neither was the 1966 Fairlane GT or subsequent 390 Mustang the following year. But when the 428 Cobra Jet Mustang debuted at Pomona for the NHRA Winternationals in 1968, that image evolved from wholesome to fearsome! Cobra Jet Mustangs downed all comers and took the vaunted Super Stock Eliminator crown while introducing a new weapon under the hood to serve as fair warning to what was to be uncoiled at the stoplight. By the next

model year with the revolutionary shaker hood on Cobra Jet-equipped Mach 1s and the striking snake adorning the sheet metal of the midsize Cobra, Ford's image makeover was complete. The demise of the muscle car era didn't signify the end of the Cobra Jet, as Ford continued the performance reign with the 351 Cobra Jet. The legacy left by Mustang, Cougar, Torino, Cyclone, and Ranchero 428, 429, and 351 Cobra Jet-powered vehicles is indelible. Mustang Monthly editor Rob Kinnan and muscle car expert Diego Rosenberg bring this history back to life in an all-encompassing book that is the first to specifically feature all Cobra Jet cars, including the purpose-built drag cars of today! Cobra Jet: The History of Ford's Greatest High Performance Cars will hypnotize you as the first and complete history of Ford's most famous engines during the era's peak. This volume covers all aspects of the antibiotic discovery and development process through Phase II/III. The contributors, a group of highly experienced individuals in both academics and industry, include chapters on the need for new antibiotic compounds, strategies for screening for new antibiotics, sources of novel synthetic and natural antibiotics, discovery phases of lead development and optimization, and candidate compound nominations into development. Beyond discovery, the handbook will cover all of the studies to prepare for IND submission: Phase I (safety and dose ranging), progression to Phase II (efficacy), and Phase III (capturing desired initial indications). This book walks the reader through all aspects of the process,

which has never been done before in a single reference. With the rise of antibiotic resistance and the increasing view that a crisis may be looming in infectious diseases, there are strong signs of renewed emphasis in antibiotic research. The purpose of the handbook is to offer a detailed overview of all aspects of the problem posed by antibiotic discovery and development.

The Bible teaches: (i) Christ died only for the elect; (ii) God offers Christ to all. This looks like a first-class contradiction. Many think they have found a way to avoid it. Arminians deny the first statement; hyper-Calvinists, the second. But still the Bible teaches both. Most Calvinists take another route. They use the formula: 'Christ's death - sufficient for all, effective only for the elect'. In this, some follow Moise Amyraut and say that Christ died provisionally for all, but effectively only for the elect. Others follow John Owen and say that although Christ's death is sufficient for all on account of who he is, nevertheless it was

intended and effective only for the elect. In this way, both think they justify the free offer in light of particular redemption. But both are wrong. The Bible does not try to solve the seeming paradox. It never uses 'the sufficiency formula'. It simply states that Christ died for the elect, but even so it commands all sinners to repent and believe - promising them Christ and salvation if they do. While this book does not promise an easy read, it will repay careful study. And the subject is worthy of such. Above all, its author's aim is to glorify God by stimulating the wider, more passionate, and less-inhibited preaching of the free offer to sinners by those who rightly hold to particular redemption. Michael Haykin: 'Impressive in its discussion of theological perspectives and fully competent in its handling of Scripture, here is an excellent resource for thinking through the nature of biblical evangelism and how it relates to the scriptural theme of the sovereignty of God in salvation, especially as the latter relates to the death of Christ. May those who are

tempted to cool their passion for the salvation of sinners in light of convictions about Christ's redeeming work read this book and have that passion re-ignited by the fiery light of God's truth!."
