The Common Core Standards for Reading were developed to help students read and analyze a piece of writing more effectively, giving them the tools they need to succeed on college applications, in college, and in the world of employment. One important factor of the reading standards is the ability to determine point of view and the purpose of a piece of writing. This volume provides guided lessons using excerpts from well-known pieces of writing, Core-focused quiz questions, and advice from an expert reader on how students can get the most out of their reading.

In the last quarter of the twentieth century, a number of studies have appeared on 1 Peter under different perspectives. Attention however has been centred on the letter as a whole, and studies dealing with particular parts of the letter are still wanting. The present study is a contribution in that respect. The pericope studied here, 1, 13-25, is set in the perspective of the basic literary questions of the letter, such as the authorship and date, the unity and literary genre, and structure. Peter, a letter written to encourage and strengthen in the faith groups of Christians in Asia Minor undergoing suffering, is paraenetic in character; and this feature is obvious in the segment studied. The Anatolian Christians, who are advised to conduct themselves in holiness by reverential fear of God and love of their brothers, are reminded of the dignity of their Christian vocation, for they have been redeemed through the precious blood of Christ, and begotten anew through the living and abiding Word of God. The study focuses on these teachings upon which the author bases his directives for the Christian way of life. Thus it brings to the fore the distinctive Theology, the ontological Christology of logos and its functional dimension. In conclusion, by way of theological reflection, an actualization of the soteriology of the pericope in the author's native South Asian context is also attempted.

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

Una vita nuova. Studio di Barbara Bozak. Questo libro è uno studio del testo ebraico di Ger 30-31 mediante l'utilizzo di tecniche di analisi poetica. Si presenta Ger 30-31 nel suo complesso letterario in cui ogni elemento contribuisce alla comunicazione di un unico messaggio: la promessa di un nuovo futuro, dono gratuito di Dio. This book is a study of the Hebrew text of Jer 30-31 using techniques of poetic analysis and having as an underlying focus the question of exegetical method. It examines the text in terms of its diction, prosody, syntax and imagery with a view to understanding the unit in its historical and literary contexts, and presents Jer 30-31 as a literary whole in which every element works together to communicate a single message: the promise of a new future, gratuitous gift of God. The careful literary analysis of this poetic cycle demonstrates that while the concept of salvation is the essential focus of the little book of consolation (Jer 30-31), the ideas of suffering and punishment are also highly developed and found throughout the whole. The book concludes with a brief consideration of the extraordinary use of the feminine image in Jer 30-31 and offers some hypotheses for its presence. In its use of literary poetic analysis this work moves beyond the questions of diachronic studies and thus implies that synchronic reading, with its focus on the final text as the ultimate bearer of meaning, is a valid exegetical method.

Being of Two Minds examines the place that early modern literature held in Modernist literary criticism. For T. S. Eliot, Virginia Woolf, and William Empson, the early modern period helps model a literary future. At stake in their engagements across time were ontological questions about literature and its ability to mediate between the one and the many, the particular and the general, life and death, the past and the present. If reading and writing literature enables the mind to be in two

places at once, creative experience serves as a way to participate in an expanded field of consciousness alongside mortality. Goldberg reads the readings that these modernists performed on texts that Eliot claimed for the canon like the metaphysical poets and Jacobean dramatists, but also Shakespeare, Milton, Montaigne, and Margaret Cavendish. Ontological concerns are reflected in Eliot's engagement with Aristotle's theory of the soul and Empson's Buddhism. These arguments about being affect minds and bodies and call into question sexual normativity: Eliot glances at a sodomitical male-male mode of literary transmission; Woolf produces a Judith Shakespeare to model androgynous being; Empson refuses to distinguish activity from passivity to rewrite gender difference. The work of one of our leading literary and cultural critics, *Being of Two Minds* spans centuries to show how the most compelling and surprising ideas about mind, experience, and existence not only move between early modernity, high modernism, and our own moment, but are also constituted through that very movement between times and minds.

What does it mean to be "like a child" in antiquity? How did early Christ-followers use a childlike condition to articulate concrete qualifications for God's kingdom? Many people today romanticize Jesus's welcoming of little children against the backdrop of the ancient world or project modern Christian conceptions of children onto biblical texts. Eschewing such a Christian exceptionalist approach to history, this book explores how the Gospel of Matthew, 1 Corinthians, and the Gospel of Thomas each associate childlikeness with God's kingdom within their socio-cultural milieus. The book investigates these three texts vis-à-vis philosophical, historical, and archaeological materials concerning ancient children and childhood, revealing that early Christ-followers deployed various aspects of children to envision ideal human qualities or bodily forms. Calling the modern reader's

attention to children's intellectual incapability, asexuality, and socio-political utility in ancient intellectual thought and everyday practices, the book sheds new light on the rich and diverse theological visions that early Christ-followers pursued by means of images of children.

Most contemporary digital studies are interested in distant-reading paradigms for large-scale literary history. This book asks what happens when such telescopic techniques function as a microscope instead. The first monograph to bring a range of computational methods to bear on a single novel in a sustained fashion, it focuses on the award-winning and genre-bending *Cloud Atlas* (2004). Published in two very different versions worldwide without anyone taking much notice, David Mitchell's novel is ideal fodder for a textual-genetic publishing history, reflections on micro-tectonic shifts in language by authors who move between genres, and explorations of how we imagine people wrote in bygone eras. Though *Close Reading with Computers* focuses on but one novel, it has a crucial exemplary function: author Martin Paul Eve demonstrates a set of methods and provides open-source software tools that others can use in their own literary-critical practices. In this way, the project serves as a bridge between users of digital methods and those engaged in more traditional literary-critical endeavors.

In *American Little Magazines of the Fin de Siecle*, Kirsten MacLeod examines the rise of a new print media form - the little magazine - and its relationship to the transformation of American cultural life at the turn of the twentieth century. Though the little magazine has long been regarded as the preserve of modernist avant-gardes and elite artistic coteries, for whom it served as a form of resistance to mass media, MacLeod's detailed study of its origins paints a different picture. Combining cultural, textual, literary, and media studies criticism, MacLeod demonstrates how the little magazine was deeply connected to the artistic, social, political,

and cultural interests of a rising professional-managerial class. She offers a richly contextualized analysis of the little magazine's position in the broader media landscape: namely, its relationship to old and new media, including pre-industrial print forms, newspapers, mass-market magazines, fine press books, and posters. MacLeod's study challenges conventional understandings of the little magazine as a genre and emphasizes the power of "little" media in a mass-market context.

This book considers the key critical interventions on short story writing in South Africa written in English since the year 2000. The short story genre, whilst often marginalised in national literary canons, has been central to the trajectory of literary history in South Africa. In recent years, the short story has undergone a significant renaissance, with new collections and young writers making a significant impact on the contemporary literary scene, and subgenres such as speculative fiction, erotic fiction, flash fiction and queer fiction expanding rapidly in popularity. This book examines the role of the short story genre in reflecting or championing new developments in South African writing and the ways in which traditional boundaries and definitions of the short story in South Africa have been reimagined in the present. Drawing together a range of critical interventions, including scholarly articles, interviews and personal reflective pieces, the volume traces some of the aesthetic and thematic continuities and discontinuities in the genre and sheds new light on questions of literary form. Finally, the book considers the place of the short story in twenty-first century writing and interrogates the ways in which the short story form may contribute to, or recast ideas of, the post-apartheid or post-transitional. The perfect guide to contemporary short story writing in South Africa, this book will be essential reading for researchers of African literature.

Intertextuality in the Second Century Vandenhoeck & Ruprecht  
 Argues for the queer potential of video games While popular discussions about queerness in video games often focus on big-name, mainstream games that feature LGBTQ characters, like *Mass Effect* or *Dragon Age*, Bonnie Ruberg pushes the concept of queerness in games beyond a matter of representation, exploring how video games can be played, interpreted, and designed queerly, whether or not they include overtly LGBTQ content. *Video Games Have Always Been Queer* argues that the medium of video games itself can—and should—be read queerly. In the first

book dedicated to bridging game studies and queer theory, Ruberg resists the common, reductive narrative that games are only now becoming more diverse. Revealing what reading D. A. Miller can bring to the popular 2007 video game *Portal*, or what Eve Sedgwick offers *Pong*, Ruberg models the ways game worlds offer players the opportunity to explore queer experience, affect, and desire. As players attempt to 'pass' in *Octodad* or explore the pleasure of failure in *Burnout: Revenge*, Ruberg asserts that, even within a dominant gaming culture that has proved to be openly hostile to those perceived as different, queer people have always belonged in video games—because video games have, in fact, always been queer.

**Contemporary Trends and Perspectives** Psychology Press  
 This book is about innovation, reflection and inclusion. Cultural innovation is something real that tops up social and technological innovation by providing the reflective society with spaces of exchange in which citizens engage in the process of sharing their experiences while appropriating common goods content. We are talking of public spaces such as universities, academies, libraries, museums, science-centres, but also of any place in which co-creation activities may occur. The argument starts with the need for new narratives in the history of philosophy, which can be established through co-creation, the motor of cultural innovation. The result is redefining the history of philosophy in terms of a dialogical civilization by ensuring continuous translations, individual processes of reflection and collective processes of inclusion. Readers will grasp the effectiveness of the history of philosophy in societies that are inclusive, innovative and reflective.

 Too often readers approach the Book of Mormon simply as a collection of quotations, an inspired anthology to be scanned quickly and routinely recited. In *Beholding the Tree of Life* Bradley J. Kramer encourages his readers to slow down, to step back, and to contemplate the literary qualities of the Book of Mormon using

interpretive techniques developed by Talmudic and post-Talmudic rabbis. Specifically, Kramer shows how to read the Book of Mormon closely, in levels, paying attention to the details of its expression as well as to its overall connection to the Hebrew Scriptures—all in order to better appreciate the beauty of the Book of Mormon and its limitless capacity to convey divine meaning.

*Radiohead and the Resistant Concept Album* Teacher Created Materials  
 How the British rock band Radiohead subverts the idea of the concept album in order to articulate themes of alienation and anti-capitalism is the focus of Marianne Tatom Letts's analysis of *Kid A* and *Amnesiac*. These experimental albums marked a departure from the band's standard guitar-driven base layered with complex production effects. Considering the albums in the context of the band's earlier releases, Letts explores the motivations behind this change. She places the two albums within the concept-album/progressive-rock tradition and shows how both resist that tradition. Unlike most critics of Radiohead, who focus on the band's lyrics, videos, sociological importance, or audience reception, Letts focuses on the music itself. She investigates Radiohead's ambivalence toward its own success, as manifested in the vanishing subject of *Kid A* on these two albums.
