REYNOLDS LAYLAH

Preventing intimate partner violence
UPNE

The state is increasingly experienced as both intrusive and neglectful, particularly by those living in poverty, leading to loss of trust and widespread feelings of alienation and disconnection. Against this tense background, this innovative book argues that child protection policies and practices have become part of the problem, rather than ensuring children's well-being and safety. Building on the

ideas in the best-selling Re-imagining child protection and drawing together a wide range of social theorists and disciplines, the book:

- Challenges existing notions of child protection, revealing their limits;
- Ensures that the harms children and families experience are explored in a way that acknowledges the social and economic contexts in which they live;
- Explains how the protective capacities

within families and communities can be mobilised and practices of co-production adopted; • Places ethics and human rights at the centre of everyday conversations and practices.

Synthesizing Qualitative Studies

Routledge

Decriminalizing Domestic Violence asks the crucial, yet often overlooked, question of why and how the criminal legal system became the primary response to intimate partner violence in the United States. It introduces readers, both new and well versed in the subject, to the ways in which the criminal legal system harms rather than helps those who are subjected to abuse and violence in their homes and communities, and shares how it drives, rather than deters, intimate partner violence. The book examines how social, legal, and financial resources are diverted into a criminal legal apparatus that is often unable to deliver justice or safety to victims or to prevent intimate partner violence in the first place. Envisioned for both courses and research topics in domestic violence, family violence, gender and law, and sociology of law, the book challenges readers to understand intimate

partner violence not solely, or even primarily, as a criminal law concern but as an economic, public health, community, and human rights problem. It also argues that only by viewing intimate partner violence through these lenses can we develop a balanced policy agenda for addressing it. At a moment when we are examining our national addiction to punishment, *Decriminalizing Domestic Violence* offers a thoughtful, pragmatic roadmap to real reform.

Workshop Summary Springer

Violence against women is one factor in the growing wave of alarm about violence in American society. High-profile cases such as the O.J. Simpson trial call attention to the thousands of lesser-known but no less tragic situations in which women's lives are shattered by beatings or sexual assault. The search for solutions has highlighted not only what we know about violence against women but also what we do not know. How can we achieve the best understanding of this problem and its complex ramifications? What research efforts will yield the greatest benefit? What are the questions that must be answered? *Understanding Violence*

Against Women presents a comprehensive overview of current knowledge and identifies four areas with the greatest potential return from a research investment by increasing the understanding of and responding to domestic violence and rape: What interventions are designed to do, whom they are reaching, and how to reach the many victims who do not seek help. Factors that put people at risk of violence and that precipitate violence, including characteristics of offenders. The scope of domestic violence and sexual assault in America and its consequences to individuals, families, and society, including costs. How to structure the study of violence against women to yield more useful knowledge. Despite the news coverage and talk shows, the real fundamental nature of violence against women remains unexplored and often misunderstood. *Understanding Violence Against Women* provides direction for increasing knowledge that can help ameliorate this national problem. *New Thinking and Approaches Psychology of Women Book* A critical assessment of the research

related to batterer programs with recommendations for heightened engagement of men, ongoing risk management, and better coordination of courts and services

Gendered Aspirations and Racialised Realities SAGE

This book provides a comprehensive overview of data and emerging trends in research and treatment covering every facet of partner aggression.

Listening to Battered Women Routledge
Drawing on cases, Stark identifies the problems with our current approach to domestic violence, outlines the components of coercive control, and then uses this alternate framework to analyse the cases of battered women charged with criminal offenses directed at their abusers.

Addressing the Impact of Domestic Violence on Family Dynamics Routledge

This book is the first to focus on violent and/or 'abusive' behaviours in lesbian, gay, bisexual and/or transgender, non-binary gender or genderqueer people's intimate relationships. It provides fresh empirical data from a comprehensive mixed-methods study and novel theoretical insights to destabilise and

queer existing narratives about intimate partner violence and abuse (IPVA). Key to the analysis, the book argues, is the extent to which Michael Johnson's landmark typology of IPVA can be used to make sense of the survey data and accounts of 'abusive' behaviours given by LGB and/or T+ participants. As well as calling for IPVA scholars to challenge heteronormativity and cisnormativity and improve IPVA measurement, this book offers guidance and a new tool to assist practitioners from a variety of relationships services with identifying victims/survivors and perpetrators in LGB and/or T+ people's relationships. It will appeal to academics and practitioners in the field of domestic violence and abuse.

Classic Edition A Typology of Domestic Violence Intimate Terrorism, Violent Resistance, and Situational Couple Violence

Moving beyond the narrow clinical perspective sometimes applied to viewing the emotional and developmental risks to battered children, *The Batterer as Parent: Addressing the Impact of Domestic Violence on Family Dynamics, Second Edition* offers a view that takes into

account the complex ways in which a batterer's abusive and controlling behaviors are woven into the fabric of daily life. This book is a guide for therapists, child protective workers, family and juvenile court personnel, and other human service providers in addressing the complex impact that

batterers—specifically, male batterers of a domestic partner when there are children in the household—have on family functioning. In addition to providing an understanding of batterers as parents and family members, the book also supplies clearly delineated approaches to such practice issues as assessing risk to children (including perpetrating incest), parenting issues in child custody and visitation evaluation, and impact on children's therapeutic process and family functioning in child protective practice.

Toxic Couples: The Psychology of Domestic Violence UPNE

This open access book draws on a broad study on violence against men, from both male and female partners in Norway, to contribute to the research on intimate partner violence. It identifies similarities in men's experiences and backgrounds,

including in their perceptions of their own victimisation. Marianne Inez Lien and Jørgen Lorentzen argue that the traditional gender power model should be modified and supplemented, and propose that we consider violence in terms of psychological supremacy, rather than in terms of femininity and masculinity. Men's Experiences of Violence in Intimate Relationships will appeal to students and scholars across a range of areas including criminology, sociology and family violence, and gender studies.

Coercive Control Routledge

Research and clinical expertise are brought together in this practical volume to examine whether the following violence can be predicted : battered women being killed by their partners; battered women killing their partners; children being physically and/or sexually abused; and sexual offenders and batterers re-offending. Following an introduction to theoretical and clinical issues involved in the prediction of violence, the contributors present research and theory in language that is accessible to clinicians. They discuss accurate measurement using tested instruments, the role of clinical

observations, and health and judicial implications.

A Balanced Policy Approach to Intimate Partner Violence Springer Nature

Workplace violence has emerged as a growing concern in today's interdependent political economy, and increasing attention is being paid to the phenomenon both by business and in the academic world to identifying its causes and to devise strategies to prevent it. In this book a distinguished international team, composed of both academics and practitioners, identify and address the key issues. It reviews the earlier literature on workplace violence, identifying and assessing key trends and patterns of violence at work, and reapplying traditional theories of victimisation and approaches to prevention, security and safety. Particular attention is paid to case studies which reflect innovative practice in prevention strategies, and in assessing informal frameworks which have been developed in response to this. Overall this book provides a foundation on which to base ways of better explaining, predicting, understanding and preventing workplace

violence.

Linking the Circles of Compassion for Prevention and Intervention UPNE

This book addresses the intersection of two current major concerns in Australia: law and justice responses to domestic violence - including harsher punitive measures - and the over-representation of Indigenous Australians in the criminal justice system, which are similar concerns in New Zealand, Canada and the US. Nancarrow re-conceptualises typologies of violence and provides a means of understanding and explaining female use of violence without undermining the hard-won gains of the women's movement. It does, however, argue for a paradigm shift, which has implications for every aspect of the system we have built to stop men's violence against women (law, police policy and practice, counselling and advocacy for victims, and interventions for those who perpetrate violence). The book is based on quantitative and qualitative research and explores the nature of Indigenous intimate partner violence and the types of violence that domestic violence law sought to address.

Domestic and family violence (DFV) is an enduring social and public health issue of endemic proportions and global scale, with multiple and lasting consequences for those directly affected. This book tackles current debates in the field and addresses the social norms and settings that perpetuate this type of violence, along with implications for service delivery. The book offers a thorough introduction into the nature and extent of DFV in contemporary social contexts and serves as a foundation for informed practice. It provides a firm theoretical and empirical overview of core issues, covering the challenges and support needs experienced by those affected, along with the implications this raises for the range of relevant response services. The authors also offer insight into the predominantly gendered nature of DFV and its influence beyond the traditional couple context, across age, gender, sexual orientation, cultural background and family relationships. Drawing on theoretical explanations, international research, and practice experience, they highlight

examples of good practice and holistic responses, including primary, secondary, and tertiary prevention. Written in a clear and direct style, this book will appeal to students and scholars of criminology, sociology, and social work engaged in studies of domestic and family violence, violence against women, and intimate partner violence. It will be an invaluable resource for those designing, coordinating and conducting service responses. "Pence and Paymar are right on target again. Their analysis of battering is

excellent and their approach...is straightforward, useful and clear. [The book] tells you what to do with abusive men and how to do it well. [The authors] challenge practitioners to do their work in a manner that is compassionate yet never colluding. Accountability and safety to battered women and creating a process of change for abusive men are central to its success." --Susan Schechter, author of *Women and Male Violence* "Drawing upon years of experience...Pence and Paymar have written a practical and conceptually sound curriculum for batterers' groups. This book offers an effective guide to both the beginning facilitator and the experienced clinician for engaging batterers in the lifelong process of changing their intimate relationships, from those based on coercive control to those based on equality. [They] accomplish this task without compromising their commitment to advocacy with battered women." --Anne L. Ganley, PhD, Domestic Violence Program Seattle Veterans Administration Medical Center "Presents the most comprehensive and successful methods for working with men who batter. Mixing discussion, self-analysis and

opportunities for learning new behaviors, this well-mapped-out intervention strategy helps counselors hold men accountable while teaching non-abusive behaviors." -- Fernando Merderos, Executive Director of Common Purpose, Boston, MA "Education Groups for Men Who Batter is a curriculum and a methodology which unequivocally identifies the exercise of violent and coercive tactics against women in intimate relationships as intentional, strategic behavior....[It] is an essential training tool for all actors in the justice and human services systems. Only when tactics of control are seen as intentional intimate terrorism can these systems construct responses effectively to end the violence." --Barbara J. Hart, Esq., Pennsylvania Coalition Against Domestic Violence "Presents the leading approach to undoing men's abuse of women...The Duluth Model has pioneered an approach based on the experiences of abused women and consequently tailored to their circumstances. It tackles the social dimensions of woman abuse more directly and decisively than any of the psychological or skill-building approaches circulating in the field." -- Edward W.

Gondolf, author of *Men Who Batter, Battered Women as Survivors, and Psychiatric Response to Family Violence* "The Duluth Model has inspired activists all over the world, and its principles are being followed in programs in several countries. We predict that this book will become the standard text for those who work with men who batter." --Rebecca Emerson Dobash and Russell P. Dobash authors of *Violence Against Wives; Women, Violence and Social Change; and Women Viewing Violence* *Contagion of Violence* Policy Press Noblit and Hare propose a method - meta-ethnography - for synthesizing from qualitative, interpretive studies. They show that ethnographies themselves are interpretive acts, and demonstrate that by translating metaphors and key concepts between ethnographic studies, it is possible to develop a broader interpretive synthesis.

Intimate Terrorism, Violent Resistance, and Situational Couple Violence Duke University Press

Since the 1970s the issue of intimate partner violence (IPV) has been explained through the patriarchal desire of men to

control and dominate women, but this gendered perspective limits both our understanding of IPV and its treatment. *Intimate Partner Violence: New Perspectives in Research and Practice* is the first book of its kind to present a detailed and rigorous critique of current domestic violence research and practice within the same volume. In this challenging new text, with contributions from the UK, the US, and Canada, the subject is assessed from a more holistic position. It provides a critical analysis of the issue of domestic violence including issues that are often not part of the mainstream discussion. Each of the chapters tackles a different area of research or practice, from a critical review of contemporary topics in domestic violence research, including a critical review of men's use of violence in relationships, a consideration of male victims, IPV within the LGBTQ+ community, perceptions of perpetrators and victims, and IPV within adolescent populations. The second half of the book examines challenges and opportunities for professionals working in the field and includes an analysis of an evidence

informed perpetrator programme, the challenges faced working with male victims, and a discussion of the impact of domestic violence on children. Culminating with a series of evidence-based recommendations to bridge the divide between academic and practitioner stakeholders and to inform future working practices, this is an essential resource for students and practitioners alike.

Interdisciplinary perspectives SAGE

This classic volume provides a solid foundation for thinking about creative ways in which our society can work to prevent or minimize destructive couple conflict and enhance couples' abilities to constructively handle their differences. A common thread throughout is that constructive conflict and negotiation are beneficial for relationships. The new introduction provides an overview of how this classic text is still relevant today. Divided into four parts, this book: *addresses the societal and bio-evolutionary underpinnings of couple conflict; *presents the interpersonal roots of couple conflict and the consequences for individuals and couples; *discusses what effects couple conflict have on

children and how individual differences in children moderate these effects; *outlines policies and programs that address couple conflict; and * concludes with an essay that pulls these four themes together and points to new directions for research and program efforts. This book serves as a supplement in graduate or advanced undergraduate courses on interpersonal relationships, couples and/or family and conflict, divorce, couples and/or family therapy taught in human development and family studies, clinical or counseling psychology, social work, sociology, and communications and it is also a helpful compendium for researchers and clinicians/counselors interested in couple conflict.

Violent Crime Springer Publishing Company

This book offers a critical appreciation of the nature and impact of coercive control in interpersonal relationships. It examines what this concept means, who is impacted by the behaviours it captures, and how academics, policy-makers and policy advocates have responded to the increasing recognition of the deleterious effects that coercive control has on

especially women's lives. The books discussed the historical emergence of this concept, who its main proponents have been, and how its effects have been understood. It considers the role of coercive control in making sense of women's pathway into crime as well as their experiences of it as victims. Coercive control has been presented predominantly as a gendered process and consideration is given in this book to the efficacy of this assumption as well as the extent to which the concept makes sense for a wide constituency of marginalised women. In recent years, much energy has been given to efforts to criminalise coercive control and the concerns that these efforts generate are discussed in detail, alongside what the limitations to such initiatives might be. In conclusion the book situates the rising pre-occupation with coercive control within the broader concerns with policy transfer, ways of taking account of victim-survivor voices, alongside the importance of working towards more holistic policy responses to violence(s) against women. The book will be of particular interest to academics, policy-makers and practitioners working in

criminal justice who wish to both understand the nature and extent of coercive control, as well the importance of appreciating the role of nuance in translating that understanding into practice.

This book clearly elucidates many of the key issues found in the disparate literature on sex-based differences in health and

illness. It provides primary care clinicians with a practical, up-to-date source of information that can lead to optimal, targeted care for women. Among the topics examined in this comprehensive volume are treating and preventing osteoporosis, diabetes, cervical cancer, eating disorders, and more.
