students' opportunities to pursue higher education and engage in the college choice process. Based on a case study with accounts from rural high school students and counselors, this book examines how these communities perceive higher education and what challenges arise for both rural students and counselors. The book addresses how college knowledge and university jargon illustrate the gap between rural cultural capital and higher education cultural capital. Insights about approaches to reduce barriers created by college knowledge and university jargon are shared and strategies for offering rural students pathways to learn academic language and navigate higher education are presented for both secondary and higher education institutions.

Beyond Fitting In interrogates how the cultural capital and lived experiences of first-generation college students inform literacy studies and the writing-centered classroom. Essays, written by scholar-teachers in the field of rhetoric and composition, discuss best practices for teaching first-generation students in writing classrooms, centers, programs, and other environments. The collection considers how first-gen students of different demographics interact with and affect literacy instruction in a variety of public and private, rural and urban schools offering two- or four-year programs, including Hispanic-serving institutions, historically Black colleges and universities, and public research universities. By exploring the experiences of students, teachers, writing program administrators, and writing center directors, the volume gives readers an inside view of the practices and structures that shape the literacy of first-generation students.
