Trans Dilemmas presents the findings of a three-year research project which examined the lived experiences of trans people in Australia's Northern Territory. The book argues that whilst trans people, who live in remote areas, experience issues which may not be distinct from those living in urban areas and the inner-city, these issues can be aggravated by geographic and

demographic factors. By conducting online surveys and in-depth interviews, Stephen Kerry brings to light the issues for transgender people which are compounded by living in sparsely populated, remote communities. Namely social isolation, maintaining relationships with friends, family and partners, and the difficulties accessing health care. The book also includes significant findings on the experiences and treatment of Australia's trans Aboriginal people, also known as sistergirls and brotherboys. An analysis of first-person narratives by sistergirls and brotherboys reveals the racism within predominantly white trans communities and transphobia within traditional Aboriginal communities, which they are uniquely faced with. *Trans Dilemmas* represents an important contribution to contemporary research into the lives of transgender Australians. It gives a voice to those transgender people living in the more isolated communities in Australia, which up until now, have been largely unheard. For students and researchers in Queer Studies and Gender Studies, this is valuable reading.

Their History & Their Culture Cengage Learning

The field of material culture, while historically well established, has recently enjoyed something of a renaissance. Methods once dominated by Marxist- and commodity-oriented analyses and by the study of objects as symbols are giving way to a more ethnographic approach to artifacts. This orientation is the cornerstone of the essays presented in *Material Cultures*. A collection of case studies which move from the domestic sphere to the global arena, the volume includes examinations of the soundscape produced by home radios, catalog shopping, the role of paper in the

workplace, and the relationship between the production and consumption of Coca-Cola in Trinidad. The diversity of the essays is mediated by their common commitment to ethnography with a material focus. Rather than examine objects as mirages of media or language, *Material Cultures* emphasizes how the study of objects not only contributes to an understanding of artifacts but is also an effective means for studying social values and contradictions.

Ideas, Politics and Society Wadsworth Publishing Company

The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-

civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. The Clash of Civilizations and the Remaking of World Order explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly “universal” Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.

Western Civilization W. W. Norton

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.
