Leading political innovation activist Katherine Gehl and world-renowned business strategist Michael Porter bring fresh perspective, deep scholarship, and a real and actionable solution, Final Five Voting, to the grand challenge of our broken political and democratic system. Final Five Voting has already been adopted in Alaska and is being advanced in states across the country. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In The Politics Industry, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. The Politics Industry is an original and completely nonpartisan guide that will open your eyes to the true

dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

[Back to Our Future](#) Harvard Business Press

Finalist for the 2020 National Jewish Book Awards In this dazzling work of historical fiction, the Man Booker International-long-listed author of *War and Turpentine* reconstructs the tragic story of a medieval noblewoman who leaves her home and family for the love of a Jewish boy. In eleventh-century France, Vigdis Adelaïs, a young woman from a prosperous Christian family, falls in love with David Todros, a rabbi's son and yeshiva student. To be together, the couple must flee their city, and Vigdis must renounce her life of privilege and comfort. Pursued by her father's knights and in constant danger of betrayal, the lovers embark on a dangerous journey to the south of France, only to find their brief happiness destroyed by the vicious wave of anti-Semitism sweeping through Europe with the onset of the First Crusade. What begins as a story of forbidden love evolves into a globe-trotting trek spanning continents, as Vigdis undertakes an epic journey to Cairo and back, enduring the unimaginable in hopes of finding her lost children. Based on two fragments from the Cairo Genizah—a repository of more than three hundred thousand manuscripts and documents stored in the upper chamber of a synagogue in Old Cairo—Stefan Hertmans has pieced together a remarkable work of imagination, re-creating the tragic story of two star-crossed lovers whose steps he retraces almost a millennium later. Blending fact and fiction, and with immense imagination and stylistic ingenuity, Hertmans painstakingly depicts Vigdis's terrible trials, bringing the Middle Ages to life and illuminating a chaotic world of love and hate.

Now in a new edition updated through the unprecedented 2016 presidential election, this provocative book makes a compelling case for a hidden "deep state" that influences and often opposes official U.S. policies. Prominent political analyst Peter Dale Scott begins by tracing America's increasing militarization, restrictions on constitutional rights, and income disparity since World War II. With the start of the Cold War, he argues, the U.S. government changed immensely in both function and scope, from protecting and nurturing a relatively isolated country to assuming ever-greater responsibility for controlling world politics in the name of freedom and democracy. This has resulted in both secretive new institutions and a slow but radical change in the American state itself. He argues that central to this historic reversal were seismic national events, ranging from the assassination of President Kennedy to 9/11. Scott marshals compelling evidence that the deep state is now partly institutionalized in non-accountable intelligence agencies like the CIA and NSA, but it also extends its reach to private corporations like Booz Allen Hamilton and SAIC, to which 70 percent of intelligence budgets are outsourced. Behind these public and private institutions is the influence of Wall Street bankers and lawyers, allied with international oil companies beyond the reach of domestic law. Undoubtedly the political consensus about America's global role has evolved, but if we want to restore the country's traditional constitutional framework, it is important to see the role of particular cabals—such as the Project for the New American Century—and how they have repeatedly used the secret powers and network of Continuity of Government (COG) planning to implement change. Yet the author sees the deep state polarized between an establishment and a counter-establishment in a chaotic situation that may actually prove more hopeful for U.S. democracy.

War is the natural occupation of man . war-and gardening. Winston Churchill to Siegfried Sassoon, 1918 In the common public perception, contemporary gardening is understood as suburban, as leisure activity, as television makeover opportunity. Its origins are seen as religious or spiritual (Garden of Eden), military (the clipped lawn, the ha-ha and defensive ditches), aristocratic or monarchical (the stately home, the Royal Horticultural Society). Radical Gardening travels an alternative route, through history and across landscape, linking propagation with propaganda. NATIONAL BESTSELLER, updated with a new afterword "This is the definitive account of what has gone wrong in our two-party system, and how our democracy has to adapt to survive it. I can't say it in strong enough terms: Read. This. Book." —RACHEL MADDOW The award-winning producer of The Rachel Maddow Show exposes the Republican Party as a gang of impostors, meticulously documenting how they have abandoned their duty to govern and are gravely endangering America For decades, American voters innocently assumed the two major political parties were equally mature and responsible governing entities, ideological differences aside. That belief is due for an overhaul: in recent years, the Republican Party has undergone an astonishing metamorphosis, one so baffling and complete that few have fully reckoned with the reality and its consequences. Republicans, simply put, have quit governing. As MSNBC's Steve Benen charts in his groundbreaking new book, the contemporary GOP has become a "post-policy party." Republicans are effectively impostors, presenting themselves as officials who are ready to take seriously the substance of problem solving, but whose sole focus is the pursuit and maintenance of power. Astonishingly, they are winning—at the cost of pushing the political system to the breaking point. Despite having billed itself as the "party of ideas," the Republican Party has walked away from the hard but necessary work of policymaking. It is disdainful of expertise and hostile toward evidence and arithmetic. It is tethered to few, if any, meaningful policy preferences. It does not know, and does not care, about how competing proposals should be crafted, scrutinized, or implemented. This policy nihilism dominated the party's posture throughout Barack Obama's presidency, which in turn opened the door to Donald Trump -- who would cement the GOP's post-policy status in ways that were difficult to even imagine a few years earlier. The implications of this approach to governance are all-encompassing. Voters routinely elect Republicans such as Mitch McConnell and Ted Cruz to powerful offices, expecting GOP policymakers to have the technocratic wherewithal to identify problems, weigh alternative solutions, forge coalitions, accept compromises, and apply some level of governmental competence, if not expertise. The party has consistently proven those hopes misguided. The result is an untenable political model that's undermining the American policymaking process and failing to serve the public's interests. The vital challenge facing the civil polity is coming to terms with the party's collapse as a governing entity and considering what the party can do to find its policymaking footing anew. The Impostors serves as a devastating indictment of the GOP's breakdown, identifying the culprits, the crisis, and its effects, while challenging Republicans with an imperative question: Are they ready to change direction? As Benen writes, "A great deal is riding on their answer."

"The national electoral map has split into warring regional bastions of Republican red and Democratic blue, producing a deep and enduring partisan divide in American politics. In *Red Fighting Blue*, David A. Hopkins places the current partisan and electoral era in historical context, explains how the increased salience of social issues since the 1980s has redefined the parties' geographic bases of support, and reveals the critical role that American political institutions play in intermediating between the behavior of citizens and the outcome of public policy-making. The widening geographic gap in voters' partisan preferences, as magnified further by winner-take-all electoral rules, has rendered most of the nation safe territory for either Democratic or Republican candidates in both presidential and congressional elections - with significant consequences for party competition, candidate strategy, and the operation of government!"--

The foremost American musician of the eighteenth century, William Billings wrote more than three hundred compositions and six musical collections at a time when Americans were singing almost nothing but British music. In this study, David McKay and Richard Crawford depict the man, his music, and his place in the tradition of American psalmody. The authors examine Billings' methods, innovations, and interaction with the Boston society in which he lived, placing overall emphasis on his influence on American Protestant sacred music. David McKay is Associate Professor of English at Worcester Polytechnic Institute. Richard Crawford is Associate Professor of Music at the University of Michigan. He is the author of *Andrew Law, American Psalmist* (Northwestern, 1968). Originally published in 1975. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Wall Street scandals. Fights over taxes. Racial resentments. A Lakers-Celtics championship. The Karate Kid topping the box-office charts. Bon Jovi touring the country. These words could describe our current moment—or the vaunted iconography of three decades past. In this wide-ranging and wickedly entertaining book, New York Times bestselling journalist David Sirota takes readers on a rollicking DeLorean ride back in time to reveal how so many of our present-day conflicts are rooted in the larger-than-life pop culture of the 1980s—from the “Greed is good” ethos of Gordon Gekko (and Bernie Madoff) to the “Make my day” foreign policy of Ronald Reagan (and George W. Bush) to the “transcendence” of Cliff Huxtable (and Barack Obama). Today’s mindless militarism and hypernarcissism, Sirota argues, first became the norm when an ’80s generation weaned on Rambo one-liners and “Just Do It” exhortations embraced a new religion—with comic books, cartoons, sneaker commercials, videogames, and even children’s toys serving as the key instruments of cultural indoctrination. Meanwhile, in productions such as Back to the Future, Family Ties, and The Big Chill, a campaign was launched to reimagine the 1950s as America’s lost golden age and vilify the 1960s as the source of all our troubles. That 1980s revisionism, Sirota shows, still rages today, with Barack Obama cast as the 60s hippie being assailed by Alex P. Keaton-esque Republicans who long

for a return to Eisenhower-era conservatism. “The past is never dead,” William Faulkner wrote. “It’s not even past.” The 1980s—even more so. With the native dexterity only a child of the Atari Age could possess, David Sirota twists and turns this multicolored Rubik’s Cube of a decade, exposing it as a warning for our own troubled present—and possible future.

Ezra Taft Benson's ultra-conservative vision made him one of the most polarizing leaders in the history of the Church of Jesus Christ of Latter-day Saints. His willingness to mix religion with extreme right-wing politics troubled many. Yet his fierce defense of the traditional family, unabashed love of country, and deep knowledge of the faith endeared him to millions. In *Thunder from the Right*, a group of veteran Mormon scholars probe aspects of Benson's extraordinary life. Topics include: how Benson's views influenced his actions as Secretary of Agriculture in the Eisenhower Administration; his dedication to the conservative movement, from alliances with Barry Goldwater and the John Birch Society to his condemnation of the civil rights movement as a communist front; how his concept of the principal of free agency became central to Mormon theology; his advocacy of traditional gender roles as a counterbalance to liberalism; and the events and implications of Benson's term as Church president.
