Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen

Veränderungen zu nutzen. Mit Beiträgen von Volker Stanzel, Sascha Lohmann, Andrew Cooper, Christer Jönsson, Corneliu Bjola, Emillie V. de Keulenaar, Jan Melissen, Karsten D. Voigt, Kim B. Olsen, Hanns W. Maull und R. S. Zaharna

This is the first book to explore the concept of 'Grotian Moments'. Named for Hugo Grotius, whose masterpiece *De jure belli ac pacis* helped marshal in the modern system of international law, Grotian Moments are transformative developments that generate the unique conditions for accelerated formation of customary international law. In periods of fundamental change, whether by technological advances, the commission of new forms of crimes against humanity, or the development of new means of warfare or terrorism, customary international law may form much more rapidly and with less state practice than is normally the case to keep up with the pace of developments. The book examines the historic underpinnings of the

Grotian Moment concept, provides a theoretical framework for testing its existence and application, and analyzes six case studies of potential Grotian Moments: Nuremberg, the continental shelf, space law, the Yugoslavia Tribunal's Tadic decision, the 1999 NATO intervention in Serbia and the 9/11 terrorist attacks. *Critical Past and Pending Futures* Princeton University Press

Grewe's "Epochen der Völkerrechtsgeschichte", published in 1984, is widely regarded as one of the classic twentieth century works of international law. This revised translation by Michael Byers of Duke University, Durham, North Carolina, makes this important book available to non-German readers for the first time. "The Epochs of International Law" provides a theoretical overview and detailed analysis of the history of international

law from the Middle Ages, to the Age of Discovery and the Thirty Years War, from Napoleon Bonaparte to the Treaty of Versailles, the Cold War and the Age of the Single Superpower, and does so in a way that reflects Grewe's own experience as one of Germany's leading diplomats and professors of international law. A new chapter, written by Wilhelm G. Grewe and Michael Byers, updates the book to October 1998, making the revised translation of interest to German international relations scholars and historians as well. Wilhelm G. Grewe was one of Germany's leading diplomats, serving as West German ambassador to Washington, Tokyo and NATO, and was a member of the International Court of Arbitration in The Hague. Subsequently professor of International Law at the University of Freiburg, he remains one of Germany's most famous academic lawyers. Wilhelm G. Grewe died in January 2000. Professor Dr. Michael Byers, Duke University, School of Law, Durham, North Carolina, formerly a Fellow of Jesus College, Oxford, and a visiting Fellow of the Max-Planck-Institute for

Comparative Public Law and International Law, Heidelberg.

Placing a rights-based approach to the Israeli-Palestinian conflict at the centre of discussions over its peaceful resolution, this book provides detailed consideration of international law and its application to political issues. Contributions from leading scholars in their respective fields give an in-depth analysis of key issues, ranging from security, through legal and political frameworks to refugees and Jerusalem.

**The Law of the Common Market**

Springer

The book explores the various means of making non-conventional/non-treaty law and the cross-cutting issues that they raise. Law-making by technical/informal expert bodies, Conferences of Parties, international organizations, the UN Security Council, regional organizations and arrangements and non-state actors is examined in turn. This forms the basis for the analysis of the complementarity of

international treaty law, customary international law and non-traditional law-making, potential subject matters of non-treaty law-making, domestic consequences of non-treaty law-making, proliferation of actors, commissions and treaty bodies of the UN system, and International courts and tribunals.

This book provides an accessible and highly engaging discussion of customary international law. It employs an original theoretical perspective to unpack the structures of thought that lie beneath any claims made regarding customary international law.

### The Epochs of

International Law BRILL

In 1955, a conference was held in Bandung, Indonesia that was attended by representatives from twenty-nine nations. Against the backdrop of crumbling European empires, Asian and African leaders forged new alliances and established anti-imperial principles for a new world order. The conference came to capture popular imaginations across the Global South and, as counterpoint to the

dominant world order, it became both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements, diplomatic efforts, institutional experiments and heterodox visions of the history and future of the world. In this book, leading international scholars explore what the spirit of Bandung has meant to people across the world over the past decades and what it means today. It analyzes Bandung's complicated and pivotal impact on global history, international law and, most of all, justice struggles after the end of formal colonialism.

### The Function of Politics in International Law

Cambridge University Press

This book, written by one of the leading participants of the debate on a "constitutionalization" of international law, explains why the Charter of the United Nations must be understood as the constitution of the international community, and the legal consequences arising from that characterization.

### International Law

The fundamental recognition in this book is that the issue of what international legal principles are applicable to the operations of the IFIs is an important topic that would benefit from more rigorous study. Twelve deeply committed contributors - whose work spans the academic, policy, and activist spectrum - suggest that a better understanding of these legal issues could help both the organizations and their Member States structure their transactions in ways that are more compatible with their developmental objectives and their international responsibilities.

International Law BWV Verlag

Law Without Force is a landmark in political and social philosophy. It proposes nothing less than a completely new basis for international law. As relevant today as when it was first published nearly sixty years ago, it commands the attention of all concerned with what the future may bring to the law of nations. The great scope of Niemeyer's undertaking draws

respect even from those who disagree with his challenging analysis of the historical past and his suggestions for the future of international law. In his new introduction, Michael Henry observes that *Law Without Force* provides us with a foundation of Niemeyer's thinking. Published in 1941, when Hitler was swallowing up Europe, this volume shows how a first-rate mind grappled with a legal, historical, social, and ultimately metaphysical problem. It provides in detail the reasoning behind Niemeyer's rejection of a foreign policy based on morality and his distinction between authoritarian and totalitarian governments; and it provides us with the first stage of his lengthy and prodigious effort to understand "this terrible century." It is a book that no serious student of Niemeyer can afford to ignore. At the very heart of the author's vigorous discussion may be found his rejection of a moral basis for international law and his suggestion that a functional basis should be substituted for it. The book incisively reviews the relation between traditional international law and the changing

structure of international politics concluding that the traditional system of law has operated as an agency of disharmony and conflict. After an investigation of the traditional legal system, the author then asks, "What type of law fits the social structure of this modern world?" The answers are presented in the last part of the book, as Niemeyer offers his case for a functional system of law, divorced from moral exhortations or appeals to shattered authority. Philosophy, sociology, and legal theory are brilliantly interwoven in this volume, which will engage serious readers interested in political and social theory.

In recent years there has been a flourishing body of work on the Law of Treaties, crucial for all fields within international law. However, scholarship on modern treaty law falls into two distinct strands which have not previously been effectively synthesized. One concerns the investigation of concepts which are fundamental to or

inherent in the law of treaties generally - such as consent, object and purpose, breach of obligation and provisional application - while the other focuses upon the application of treaties and of treaty law in particular substantive (e.g. human rights, international humanitarian law, investment protection, environmental regulation) or institutional contexts (including the Security Council, the World Health Organization, the International Labour Organization and the World Trade Organization). This volume represents the culmination of a series of collaborative explorations by leading experts into the operation, development and effectiveness of the modern law of treaties, as viewed through these contrasting perspectives. *The Codification of Public International Law* Nomos Verlag

A Modern Introduction to International Law, By

Michael Akehurst OUP Oxford

This book examines theoretical and practical issues concerning the relationship between international law, time and history. Problems relating to time and history are ever-present in the work of international lawyers, whether understood in terms of the role of historic practice in the doctrine of sources, the application of the principle of inter-temporal law in dispute settlement, or in gaining a coherent insight into the role that was played by international law in past events. But very little has been written about the various different ways in which international lawyers approach or understand the past, and it is with a view to exploring the dynamics of that engagement that this book has been compiled. In its broadest sense, it is possible to identify at

least three different ways in which the relationship between international law and (its) history may be conceived. The first is that of a "history of international law" written in narrative form, and mapped out in terms of a teleology of origins, development, progress or renewal. The second is that of "history in international law" and of the role history plays in arguments about law itself (for example in the construction of customary international law). The third way of understanding that relationship is in terms of "international law in history": of understanding how international law has been engaged in the creation of a history that in some senses stands outside the history of international law itself. The essays in this collection make clear that each type of engagement with history and international law interweaves various different types of historical narrative, pointing to the typically multi-layered nature of international lawyers' engagement with the past and its importance in shaping the present and future of international law.
