The Golem at Large
Dafina Books
Betrayal in the City,
first published in 1976
and 1977, was Kenya's
national entry to the
Second World Black

and African Festival of
Arts and Culture in
Lagos, Nigeria. The
play is an incisive,
thought-provoking
examination of the
problems of
independence and
freedom in post-
colonial African states,
where a sizeable
number of people feel
that their future is
either blank or bleak.
In the words of Mosese,
one of the characters:
"It was better while we
waited. Now we have

nothing to look forward to. We have killed our past and are busy killing our future."--

Something Rising (light and Swift) IGI Global

How can African theology survive the self-repetition of mere cultural apologia or contextualization-stereotypes, and mature into a critical theoretical discipline responding to the challenges of the postmodern world-order? Dr. Humphrey M. Wawe contributes here a sound theological reflection using the hitherto unused methodological paradigm of mapping the inroads in the transaction between the Bible and African culture.

Kiwi Leadership for Principals Cambridge

University Press

This analysis is directed at the farm equipment mechanic who is capable of setting up, performing pre-delivery work, servicing, and repairing modern farm tractors, machinery, and attachments used in farm enterprises. The analysis identifies tasks and sub-tasks performed by such a mechanic, arranged in blocks of distinct operations relevant to that occupation. These blocks include workplace safety, basic job skills, engines & engine systems, drive train & drive train systems, hydraulics & hydraulic systems, electrical & electronic systems, steering & braking systems, structural components & accessories, and crop equipment. For

each task, the document outlines the element of skill and knowledge needed to perform the task adequately, identifies any shifts or changes in technology that affect the task, lists tools and equipment required for the task, and provides an indication of whether the task has been validated by each province and territory. The appendix includes a list of tools and equipment used in the occupation, and a tabulation of the percentage of time a worker spends performing each block and task in a given year (by province/territory and for Canada as a whole).

 "I Love You Better

Than I Love Life..."
 ...Donald Thornton told his six daughters. "But I'm not always gonna be around to look after you, and no man's gonna come along and offer to take care of you because you ain't light-skinned. That's why you gotta be able to look after yourselves. And for that you gotta be smart." The Ditchdigger's Daughters is an inspiring portrait by a loving daughter of a father whose pervasive common sense, folk wisdom, and untutored but right-on insights gave his children their road map to a better life. It is the story of a man who dared to dream that his black daughters would someday become doctors—and who guided them to

achieve the seemingly impossible goals he set for them. From the tenements of East Harlem to the footlights of the Apollo Theatre to the halls of an Ivy League medical school, Dr. Yvonne Thornton has written a family biography that is as moving as it is inspiring. Here is the story of a poor black father and his unimaginable dream of seeing all six of his daughters become doctors; of the wisdom and guidance that gave his girls the strength to keep striving; and of the remarkable way that each one of them transcended race, color, and gender to fulfill the promise of the American Dream. "Dr. Thornton's story shows that a family that stays together,

that holds fast to traditional values, can make a quantum leap up the social mobility scale in one generation." —Wall Street Journal
"Entertaining yet inspiring...a welcome antidote to the many recent books that have shown the underside of growing up black."

The wife of convicted killer Erik Menendez discusses her husband's painful life,

his trial for the murder of his parents, the brutality of his life in a maximum security prison, and their struggle to preserve their marriage.

Privatisation of Higher Education

Soul University

From the author of the #1 "New York Times" bestselling memoir "A Girl Named Zippy" comes a heartbreaking novel about a young female pool hustler trapped in a small Indiana town.

Building Upon Building

Legare Street Press

The book presents case studies from Africa, Asia and Latin America addressing global development issues in the fields of health, energy, ICT and urbanism in an interdisciplinary way. The book illustrates key issues at the

interface of technology, human, social, and economic development. Bringing together the best papers of the 2014 EPFL-UNESCO Conference on Technologies for Development, this book explores innovative technologies in the global South. It will be a valuable reference for researchers from engineering, natural sciences, information management, quantitative social sciences, and business faculties, as well as for development practitioners and policy makers. It shows the development potential of technologies, and discusses successful processes to develop and deploy them, as well how to evaluate their impact. The

introduction to the book begins with a reflection on key issues regarding technologies for development. The following four sections focus on; (i) Innovative Technologies for Development, (ii) Open Source-Open Access-Open Innovation, (iii) Medical Technologies for the Global South, and (iv) Impact Assessment of Technologies for Development. Individual chapters explore issues such as a need for solid standards for newly developed technologies, how to successfully up-scale technology to a larger region, and how to involve private industry in the development of a technology.

Ever feel undervalued in some way? Yes? No? Where do you start to answer this question? How do you define worth? Money? Health? Love? Power? Property? Reputation? Respect? Time? Wisdom? Pay Me What I'm Worth helps you discover answers to this question with common-sense and unique exercises. Each exercise explores what you have RIGHT NOW (and most likely forgotten). No calculators, spreadsheets or number-crunching involved - EVER Enjoy a healthier self-esteem, more unconditionally loving relationships, long-term business connections - all willing, ready and able to fully value YOU for who you are RIGHT NOW. Join us to take a

life-changing journey one day, one reasonable step at a time. As you learn and grow more aware of all your worth, you'll naturally attract what you're worth with ease and grace. How? Do the exercises. Discover the secret to giving and receiving MORE each and every day with ease and grace.

A Woman of Thirty

East African Publishers
Forty-five contemporary European architects were given the task to design a fictional building expansion in line with the principles of the existing building -- a relevant question in an era when architecture increasingly seems to occur without the context being taken into account. The result is a collection of

dialogues between contemporary architects and the past. A new generation of European architects is looking for rooted values rather than indiscriminate forms. Architecture as evolution, rather than revolution. How can the views that underlie the historical city be interwoven with the stories of the present? This question is answered in 45 designs and four essays.

Determinants of Information Technology Outsourcing Paul Vitta

Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first

ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal

that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has

identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions.

Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

Value Nets East African Publishers
The very best of the world's best

researchers have discovered a way to develop Africa: Way Omega. Now Africa's heads of state are at a summit to approve it. If they do, it promises Africa will start developing immediately. Unknown to the summit are aggrieved conspirators plotting to defeat Way Omega and replace it with a rival strategy: Path Alpha. Their path, they say, is the only way. Should the summit still follow Way Omega, or make a U-turn? *Fathers of Nations* is a satire on contemporary African politics.

Digital classrooms have become a common addition to curriculums in higher education; however, such learning systems are only successful if students are properly motivated to learn. *Optimizing Student Engagement in Online Learning Environments* is a critical scholarly resource that examines the importance of motivation in digital classrooms and outlines methods to reengage learners. Featuring coverage on a broad range of topics such as motivational strategies, learning assessment, and student involvement, this book is geared toward academicians, researchers, and students seeking current research on the importance of maintaining ambition

among learners in digital classrooms.

They Said We'd Never Make It John Wiley & Sons

This is the proceedings of the XVI International Congress of Graphic Design in Architecture, EGA 2016, held in Alcalá de Henares, Spain, in June 2016.

About 200 professionals and researchers from 18 different countries attended the Congress. This book will be of interest to researchers in the field of architecture and Engineering. Topics discussed are Innovations in Architecture, graphic design and architecture, history and heritage among others.

The Ditchdigger's Daughters Chelsea Green Publishing

Expanding Tertiary education with quality, relevance and equity is one of the most decisive challenges for Kenya's future, including the achievement of the ideals of the 2010 Constitution and, especially, its 2030 vision, which aims at transforming Kenya into a "newly industrializing, middle income, globally competitive and prosperous country?". That is because tertiary education can contribute in a critical manner to successfully overcome several of the country's challenges. This book provide analysis and policy recommendations to Government of Kenya, tertiary education leaders and the many stakeholders on

managing the massive tertiary education expansion facing the country. This book, first, discusses the motivation for the analysis and its choice of three critical topics: quality and relevance; governance, and student financing. Secondly, it reviews findings on each area, and, third, it ends with a set of policy recommendations.
