For his twentieth-century successors the formal experiments that underpin Madame Bovary look forward to the innovations of

contemporary fiction. Flaubert's protagonist in particular has never ceased to fascinate. Romantic heroine or middle-class neurotic, flawed wife and mother or passionate protester against the conventions of bourgeois society, simultaneously the subject of Flaubert's admiration and the butt of his irony - Emma Bovary remains one of the most enigmatic of fictional creations. Flaubert's meticulous approach to the craft of fiction, his portrayal of contemporary reality, his representation of an unforgettable cast of characters make Madame Bovary one of the major landmarks of modern fiction.

The only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers

Although lasers are becoming increasingly important in our high-tech environment, many of the technicians and engineers who install, operate, and maintain them have had little, if any, formal training in the field of electro-optics. This can result in less efficient usage of these important tools. Introduction to Laser Technology, Fourth Edition provides readers with a good understanding of what a laser is and what it can and cannot do. The book explains what types of laser to use for different purposes and how a laser can be modified to improve its performance in a given application. With a unique combination of clarity and technical depth, the book explains the characteristics and important applications of commercial lasers worldwide and discusses light and optics, the fundamental elements of lasers, and laser modification. In addition to new chapter-end problems, the Fourth Edition includes new and expanded chapter material on: Material and wavelength Diode Laser Arrays Quantum-cascade lasers Fiber lasers Thin-disk and slab lasers

Ultrafast fiber lasers  
Raman lasers Quasi-phase  
matching Optically

lasers Introduction to  
Laser Technology, Fourth  
Edition is an excellent  
book for students,

seeking a fuller, more  
formal introduction to the  
field of laser technology.

Circuits IIS and from the  
Endowed Chair of  
Information Technologies  
with a Focus on  
Communication

From a two-time winner of the Philip K. Dick award, and one of the founding fathers of cyberpunk comes a novel about a very modern nightmare: the most destructive computer virus ever has been traced to your machine. Computer programmer Jerzy Rugby spends his days blissfully hacking away in cyberspace — aiding the GoMotion Corporation in its noble quest to create intelligent robots. Then an electronic ant gets into the machinery ... then more ants .... then millions and millions of

the nasty viral pests appear out of nowhere to wreak havoc throughout the Net. And suddenly Jerzy Rugby is Public Enemy Number One, wanted for sabotage, computer crime, and treason — a patsy who must now get to the bottom of the virtual insectile plague. "Rudy Rucker warms the cockles of my heart ... I think of him as the Scarlet Pimpernel of science fiction." — Philip Jose Farmer

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the

expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
