Credited with cofounding the movement with his Edwardian/Victorian themed albums, Paul Roland traces the history of the genre, drawing on exclusive quotes from leading writers, artists, musicians, and filmmakers in the field. What began in the late 1980s as an underground

community of science fiction and fantasy aficionados with a fetish for Victoriana now pervades almost every aspect of popular culture from music and movies to comics and computer games. Written by one of the godfathers of steampunk, this cultural history includes exclusive interviews with key figures including Cherie Priest, Mark Hodder, Kris Kukski, Chaz Kemp, Professor Elemental, and Abney Park. This account demonstrates that steampunk is much more than a retro-futuristic fashion statement or a subgenre of science fiction. On the surface its adherents profess a penchant for neo-Victorian fashion, fanciful clockwork accessories, and have a desire to live in an alternative reality inhabited by airships and eccentric inventions. But the literature, art, music, and movies of

this burgeoning community offer a radical and irreverent reimagining of society the way it might have evolved had history taken a sharp detour prior to the industrial revolution giving us a world without electricity, the infernal (sic) combustion engine, and the technology that we take for granted today. The world of steampunk as explored here is the elegant gas lit world of Jules Verne and H. G. Wells, of Michael Moorcock and their literary antecedents for whom the digital age never dawned. *Cole for Christmas* Educa Books

Some girls get presents under the tree, but only the very best girls get Cole for Christmas... Tall, Dark, and Delicious real estate mogul Elias Cole is more Scrooge than Kris Kringle. A broken heart vetoed celebrating Christmas years ago, but when his parents decide to make an unexpected visit, Elias is in desperate need of some Christmas magic. When he hires interior designer Chloe Craig, the last thing he expects is to find himself drawn to his sweet and sexy new employee. Chloe Craig has just moved to Aspen to make a fresh start. She has two

goals: to find a job and forget about the betrayal that forced her to move. So, when Mr. Cole hires her to create a picture-perfect Christmas, she's thrilled. Using her infectious joy, she's determined to soften the heart of her new employer and to bring warmth and cheer to his cold Aspen home. But will her undeniable attraction to him ruin everything? Or will Chloe get a little Cole for Christmas?

The dream of capturing and organizing knowledge is as old as history. From the

archives of ancient Sumeria and the Library of Alexandria to the Library of Congress and Wikipedia, humanity has wrestled with the problem of harnessing its intellectual output. The timeless quest for wisdom has been as much about information storage and retrieval as creative genius. In *Cataloging the World*, Alex Wright introduces us to a figure who stands out in the long line of thinkers and idealists who devoted themselves to the task. Beginning in the late nineteenth century, Paul Otlet, a librarian by training, worked at expanding the potential of the catalog card, the world's first information chip. From there followed universal libraries and museums, connecting his native Belgium to the world by means of a vast intellectual enterprise that attempted to

organize and code everything ever published. Forty years before the first personal computer and fifty years before the first browser, Otlet envisioned a network of "electric telescopes" that would allow people everywhere to search through books, newspapers, photographs, and recordings, all linked together in what he termed, in 1934, a *réseau mondial*--essentially, a worldwide web. Otlet's life achievement was the construction of the Mundaneum--a mechanical collective brain that would house and disseminate everything ever committed to paper. Filled with analog machines such as telegraphs and sorters, the Mundaneum--what some have called a "Steampunk version of hypertext"--was the embodiment of Otlet's ambitions. It was also short-lived.

By the time the Nazis, who were pilfering libraries across Europe to collect information they thought useful, carted away Otlet's collection in 1940, the dream had ended. Broken, Otlet died in 1944. Wright's engaging intellectual history gives Otlet his due, restoring him to his proper place in the long continuum of visionaries and pioneers who have struggled to classify knowledge, from H.G. Wells and Melvil Dewey to Vannevar Bush, Ted Nelson, Tim Berners-Lee, and Steve Jobs. Wright shows that in the years since Otlet's death the world has witnessed the emergence of a global network that has proved him right about the possibilities--and the perils--of networked information, and his legacy persists in our digital world today, captured for all time.
