Study & Master Life Skills has been specially developed to support the Curriculum and Assessment Policy Statement (CAPS). The innovative Teacher's Guide with CD-ROM includes: \* a detailed work schedule for the whole year \* step-by-step guidance on the teaching of each lesson and form of assessment, as well as Remedial and Extension activities for each Unit \* photocopiable record sheets and templates \* recordings to support the Performing Arts topic.

*Study and Master Natural Sciences and Technology Grade 6 CAPS Teacher's Guide* Schwartz & Wade

Cassia has always trusted the Society to make the right choices for her: what to read, what to watch, what to believe. So when Xander's face appears on-screen at her Matching ceremony, Cassia knows with complete certainty that he is her ideal mate . . . until she sees Ky Markham's face flash for an instant before the screen fades to black. The Society tells her it's a glitch, a rare malfunction, and that she should focus on the happy life she's destined to lead with Xander. But Cassia can't stop thinking about Ky, and as they slowly fall in love, Cassia begins to doubt the Society's infallibility and is faced with an impossible choice: between Xander and Ky, between the only life she's known and a path that no one else has dared to follow. Look for **CROSSED**, the sequel to **MATCHED**, in Fall 2011! Watch a Video **Being the Early Experiences of an Intelligent Stingray, a Brave Buffalo, and a Brand-New Someone Called Plastic**

A step-by-step program that shows parents, simply and clearly, how to teach their child to read in just 20 minutes a day.

**Being the Adventures of a Knowledgeable Stingray, a Toughy Little Buffalo, and Someone Called Plastic** National Academies Press

Study & Master Social Sciences has been specially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). The comprehensive Learner's Book: \* provides activities that develop learners' skills and understanding of each of the modules specified by the CAPS curriculum \* includes good-quality illustrations, photographs and diagrams in full colour \* offers current and relevant content clearly set out according to the curriculum document. The innovative Teacher's Guide includes: \* step-by-step guidance on the teaching of each lesson and activity as well as each form of assessment \* Remedial and Extension activities for each module \* bright ideas to extend the curriculum into the world outside the classroom \* a complete section on Formal Assessment, with sample examinations and their memoranda as well as photocopyable record sheets and templates.

**Study and Master Life Skills, Grade 3** Simon and Schuster Children today want and need answers to questions about physical changes in puberty and related matters, much sooner than their parents did. They are more sexualised, growing up faster, and entering puberty earlier than ever before. Yet many parents still either avoid sexuality education or miss it completely through their own ignorance or fears. This book is the answer! Written for children between the ages of 8 and 13 in an easy

question and answer format, with delightful illustrations to add a fun element, it will double as an invaluable guide for parents so that they can answer their children's questions candidly, with knowledge, sensitivity and humour.

*Spot on Life Orientation* John Wiley & Sons

Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we're teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre-kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.

*Life Skills, Grade 6* IGI Global

Study & Master Life Skills has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps

learners to master essential content and skills to build their life skills knowledge. The innovative Teacher's File includes:

### Economic and Management Sciences, Grade 9

"A bit like the great movie Toy Story and a bit like the wonderful Kate DiCamillo book The Miraculous Journey of Edward Tulane. This is a great family book." —The Washington Post on Toys Go Out, the companion to Toys Come Home Here is the final book in the highly acclaimed Toys trilogy, which includes the companion

books *Toys Go Out* and *Toy Dance Party* and chronicles the unforgettable adventures of three brave and loving toys. Fans of the series, as well as newcomers, will happily discover how Lumphy, StingRay, and Plastic came to live with the Girl. In six linked adventures, readers will also learn how the one-eared Sheep became one-eared, watch a cranky toy meet an unfortunate end, and best of all, learn why it's okay for someone you truly love to puke on you. This is perhaps the most charming of three inimitably charming books destined to become classics. A Wall Street Journal Best Children's Book of the Year A Bank Street College of Education Best Children's Book of the Year A Junior Library Guild Selection "A timeless story of adventure and friendship to treasure aloud or independently. Wholly satisfying, this may well leave readers expecting to see the Velveteen Rabbit peeking in the bedroom window and smiling approvingly." —Booklist, Starred "The best talking toy stories since Winnie-the-Pooh." —Kirkus Reviews "A book destined to be read to children at bedtime for decades (nay, centuries?) to come. It is rare that prequels exceed the books they are meant to simply introduce, but this is one of the few." —Betsy Bird, A Fuse #8 Production

English First Additional Language, Grade 6

### Strategies, Activities, and Instructional Resources

The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant considered exploration. *Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education* develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students.

A resource for middle and high school teachers offers activities, lesson plans, experiments, demonstrations, and games for teaching physics, chemistry, biology, and the earth and space

sciences.

*Teach Your Child to Read in 100 Easy Lessons*

The call for science curriculum reform has been made over and over again for much of the twentieth century. Arguments have been made that the content of the curriculum is not appropriate for meeting the individual and social needs of people living in the modern world; that the curriculum has become overstuffed with topics and does not serve students especially well; and above all, that the curriculum does not generate the student learning it is expected to produce. The latest volume in a continuing series of publications from the AAAS designed to reform science education, *Designs for Science Literacy* presupposes that curriculum reform must be considerably more extensive and fundamental than the tinkering with individual courses and subjects that has been going on for decades. *Designs* deals with the critical issues involved in assembling sound instructional materials into a new, coherent K-12 whole. The book pays special attention to the need to link science-oriented studies to the arts and humanities, and also proposes how to align the curriculum with an established set of learning goals while preserving the American tradition of local responsibility for the curriculum itself. If fundamental curriculum reform is ever to occur, a new process for creating alternatives will have to be developed. *Designs for Science Literacy* provides the groundwork for such a process.

*Life skills*

"A bit like the great movie *Toy Story* and a bit like the wonderful Kate DiCamillo book *The Miraculous Journey of Edward Tulane*. This is a great family book." —The Washington Post Here is the first book in the highly acclaimed *Toys* trilogy, which includes the

companion books *Toy Dance Party* and *Toys Come Home* and chronicles the unforgettable adventures of three brave and loving toys. In these six linked stories from Emily Jenkins, and illustrated by Caldecott Medal winner Paul O. Zelinsky, readers will meet three extraordinary friends. Lumphy is a stuffed buffalo. StingRay is a stuffed stingray. And Plastic... well, Plastic isn't quite sure what she is. They all belong to the Little Girl who lives on the high bed with the fluffy pillows. A very nice person to belong to. Together is best for these three best friends. Together they look things up in the dictionary, explore the basement, and argue about the meaning of life. And together they face dogs, school, television commercials, the vastness of the sea, and the terrifying bigness of the washing machine. A Parents' Choice Silver Honor Winner, an ALA-ALSC Notable Children's Book, and an Oppenheim Toy Portfolio Platinum Book Award Winner, *Toys Go Out* is truly a modern classic.

**Study and Master Technology Grade 7 for CAPS Teacher's Guide**
