minerals is identified to be 9.3. Above this pH calcite is more stable than apatite. Chapter 3 Mineral-solution equilibria - ScienceDirect

3. SOLUTION-MINERAL EQUILIBRIA PART 1: CARBONATES. Carbonic acid and the carbonate minerals provide another good illustration of the use of equilibrium reasoning in geochemistry. Interactions among these compounds determine the conditions

under which limestones and dolomites are formed or dissolved, and likewise the conditions of formation of carbonate minerals as cements in soils and sandstones and as vein fillings. SOLUTION-MINERAL EQUILIBRIA PART 1: CARBONATES resulted in the final version, Solutions, Minerals, and Equilibria, about twice as long, in 1965. The original edition was published by Harper;

Harper was taken over by Harper & Row, which permitted the book to go out of print. Fortunately, W.H. Freeman of Freeman, Cooper & Company re-printed the book, and since 1975, it has been selling successfully.
