For courses in Forensic Accounting An inside view into the practice of forensic accounting As a result of increased litigation and regulatory enforcement, the demand for forensic accountants has never been higher. This area of specialty is considered the top niche market in the accounting profession. The new Forensic Accounting is the first text of its kind to provide a comprehensive view of what forensic accountants actually do and how they do it. With experience as both practitioners and educators, authors Robert Rufus, Laura Miller, and William Hahn offer a unique perspective that bridges the gap between theory and practice. They present concepts in the context of a scientific approach, emphasizing critical thinking, reasoning, and problem solving-skills that are useful in a wide variety of academic and professional environments. And because its content is consistent with the AICPA curriculum for the Certified in Financial Forensics (CFF) credential, this text gives your students a head start on the path toward career advancement. Forensic Accounting facilitates an outstanding teaching and learning experience-for you and your students. It will help you to: \* Introduce the requisite forensic accounting skills: The text identifies a three-layer skill set and provides students instruction in the key areas of forensic accounting expertise. \* Offer an inside view into forensic accounting practice: Integrated case studies and sample documents give students a glimpse into the actual practice of forensic accounting. \* Highlight the importance of a scientific approach: The authors explain the benefits of utilizing a scientific approach and provide opportunities for students to practice its application. \* Foster thorough understanding via learning aids: Various tools, throughout the text and at the end of each chapter, support students as they learn and review.

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.
