information for anyone interested in how to refocus the energy and idealism of the progressive movement on the building of institutions that are relevant to the lives of most Americans.' -- Wilma Mankiller, from the Foreword Jean Hardisty, draws a map of the political battles now being fought in America and offers lessons for progressives confronting, combating and constructively

engaging the Right in more productive ways. In this provocative book, Jean Hardisty details the formation of right-wing movements in opposition to the struggle for expansion of rights for women, people of color, and lesbians and gays. Her own experiences spanning three decades as both an activist and observer undergird her analysis in riveting ways. We see her in a stadium filled with

Promise Keepers, watching thousands of men pledge in unison to take control of their families, with a mixture of awe, fear, and a lucid understanding of what draws people to such charismatic events. *The U. S. Army's Transition to the All-Volunteer Force (1968-1974)* University of Chicago Press The all-volunteer force, the historic norm in peacetime America, was reestablished

in the U.S. on 30 June 1973, when induction authority expired. But never before had the U.S. attempted to field a standing Army in peacetime - based on voluntary enlistments -- with the worldwide responsibilities that faced this force. Since the mid-1980s the ability of the armed forces to recruit and retain quality volunteers has not been seriously questioned. This book takes us

through those years of transition, examining both the context in which the end of the draft occurred and the perspective which the Army's leaders brought to bear on the challenge they faced. *Toward Combined Arms Warfare* DIANE Publishing This anthology serves as a fundamental guide to PSYOP philosophy, concepts, principles, issues, and

thought for both those new to, and those experienced in, the PSYOP field and PSYOP applications. It clarifies the value of PSYOP as a cost-effective weapon and incorporates it as a psychological instrument of U.S. military and political power, especially given our present budgetary constraints. Presents diverse articles that portray the value of the planned use of

human actions to influence perceptions, public opinion, attitudes, and behaviors so that PSYOP victories can be achieved in war and in peace.

Mentor Military The Vaisnavasahajiya cult that arose in Bengal in the

sixteenth century was an intensely emotional attempt to reconcile the sensual and the ascetic. Exploring the history and doctrine of this cult, Edward C. Dimock, Jr., examines the works of numerous poets who are the source of knowledge about this sect. Dimock examines the life of the saint Caitanya, the mad Baul singers, the doctrines of Tantrism, the origins of the figure of

Radha, and the worship of Krishna. His study will appeal to students of the history of religion as well as of Indian culture. This edition includes a new Foreword by Wendy Doniger. "This is a magnificent book—painstakingly researched and gracefully written. . . . Professor Dimock's book is one of the most rewarding and stimulating studies to appear in recent years."—G.

 In this volume, Koistinen examines war planning and mobilizing in an era of rapid industrialization and reveals how economic mobilization for defense and war is shaped at the national level by the

interaction of political, economic, and military institutions and by increasingly powerful and expensive weaponry. Mobilizing Resentment

 In every major city in the world there is a housing crisis. How did this happen and what can we do about it? Everyone needs and deserves housing. But today our homes are being transformed into

commodities, making the inequalities of the city ever more acute. Profit has become more important than social need. The poor are forced to pay more for worse housing. Communities are faced with the violence of displacement and gentrification. And the benefits of decent housing are only available for those who can afford it. In *Defense of Housing* is the definitive statement on

this crisis from leading urban planner Peter Marcuse and sociologist David Madden. They look at the causes and consequences of the housing problem and detail the need for progressive alternatives. The housing crisis cannot be solved by minor policy shifts, they argue. Rather, the housing crisis has deep political and economic roots—and therefore requires a radical response. The Whirlwind

War DIANE Publishing Force Structure, Tactics, and Modernization of the Russian Ground Forces The mighty Soviet Army is no more. The feckless Russian Army that stumbled into Chechnya is no more. Today's Russian Army is modern, better manned, better equipped and designed for maneuver combat under nuclear-threatened conditions. This is your source for the tactics,

equipment, force structure and theoretical underpinnings of a major Eurasian power. Here's what the experts are saying: "A superb baseline study for understanding how and why the modern Russian Army functions as it does. Essential for specialist and generalist alike." - Colonel (Ret) David M. Glantz, foremost Western author on the Soviet Union in World War II

and Editor of The Journal of Slavic Military Studies. "Congratulations to Les Grau and Chuck Bartles on filling a gap which has yawned steadily wider since the end of the USSR. Their book addresses evolving Russian views on war, including the blurring of its nature and levels, and the consequent Russian approaches to the Ground Forces' force structuring, manning, equipping, and tactics.

Confidence is conferred on the validity of their arguments and conclusions by copious footnoting, mostly from an impressive array of primary sources. It is this firm grounding in Russian military writings, coupled with the authors' understanding of war and the Russian way of thinking about it, that imparts such an authoritative tone to this impressive work." -

<p>Charles Dick, former Director of the Combat Studies Research Centre, Senior Fellow at the Defence Academy of the United Kingdom, author of the 1991 British Army Field Manual, Volume 2, A Treatise on Soviet Operational Art and author of From Victory to Stalemate The Western Front, Summer 1944 and From Defeat to Victory, The Eastern Front, Summer 1944. "Dr. Lester</p>	<p>Grau's and Chuck Bartles' professional research on the Russian Armed Forces is widely read throughout the world and especially in Russia. Russia's Armed Forces have changed much since the large-scale reforms of 2008, which brought the Russian Army to the level of the world's other leading armies. The speed of reform combined with limited information about their core mechanisms</p>	<p>represented a difficult challenge to the authors. They have done a great job and created a book which could be called an encyclopedia of the modern armed forces of Russia. They used their wisdom and talents to explore vital elements of the Russian military machine: the system of recruitment and training, structure of units of different levels, methods and tactics in</p>

defense and offence and even such little-known fields as the Arctic forces and the latest Russian combat robotics." -Dr. Vadim Kozyulin, Professor of Military Science and Project Director, Project on Asian Security, Emerging Technologies and Global Security Project PIR Center, Moscow. "Probably the best book on the Russian Armed Forces published in

North America during the past ten years. A must read for all analysts and professionals following Russian affairs. A reliable account of the strong and weak aspects of the Russian Army. Provides the first look on what the Russian Ministry of Defense learned from best Western practices and then applied them on Russian soil." - Ruslan Pukhov, Director of the Moscow-based

Centre for the Analysis of Strategies and Technologies (CAST) and member of the Public Council of the Russian Federation Ministry of Defense. The U.S. Army War College (USAWC) is proud to

present the 28th Edition of How the Army Runs: A Senior Leader Reference Handbook, 2011-2012. Publication of this text at this time, when the Army has been at war for almost a decade, has almost completed restructuring of its operating force, and is addressing the structure of the generating force, as well as completing formidable base closure and restationing

actions, gives credence to the enduring truth that in order to be successful the Army must sustain and improve itself while it is fully committed to the Nation's bidding. The systems and processes documented and explained in this work are designed to do just that. This text was prepared under the direction of the faculty of the Department of Command, Leadership, and Management. It is intended

to be used in an academic environment during the study of the systems and processes used to develop and sustain trained and ready combat forces to be used by the Combatant Commanders. *The Fall of the Philippines* Beacon Press "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and

security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and

describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics -by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics- increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world

will increase water, food, and health insecurity. - Technology- the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading. anniversary edition of *Bowling Alone* remains a seminal work of social analysis, and its examination of what happened to our sense of community remains more relevant than ever in today's fractured America. Twenty years, ago, Robert D. Putnam made a seemingly simple observation: once we bowled in leagues, usually after work; but no longer. This seemingly

small phenomenon symbolized a significant social change that became the basis of the acclaimed bestseller, *Bowling Alone*, which *The Washington Post* called “a very important book” and Putnam, “the de Tocqueville of our generation.” *Bowling Alone* surveyed in detail Americans’ changing behavior over the decades, showing how we had become increasingly disconnected

from family, friends, neighbors, and social structures, whether it’s with the PTA, church, clubs, political parties, or bowling leagues. In the revised edition of his classic work, Putnam shows how our shrinking access to the “social capital” that is the reward of communal activity and community sharing still poses a serious threat to our civic and personal health, and how these consequences

have a new resonance for our divided country today. He includes critical new material on the pervasive influence of social media and the internet, which has introduced previously unthinkable opportunities for social connection—as well as unprecedented levels of alienation and isolation. At the time of its publication, Putnam’s then-groundbreaking work showed how social bonds

are the most powerful predictor of life satisfaction, and how the loss of social capital is felt in critical ways, acting as a strong predictor of crime rates and other measures of neighborhood quality of life, and affecting our health in other ways. While the ways in which we connect, or become disconnected, have changed over the decades, his central argument remains as powerful and

urgent as ever: mending our frayed social capital is key to preserving the very fabric of our society. **Maneuver and Firepower** DIANE Publishing Recognizing that the story of Negro participation in military service during World War II was of national interest as well as of great value for future military planning, the Assistant Secretary of War in February 1944 recommended

preparation of a book on this subject. The opportunity to undertake it came two years later with the assignment to the Army's Historical Division of the author, then a captain and a man highly qualified by training and experience to write such a work. After careful examination of the sources and reflection Captain Lee concluded that it would be impracticable to write a comprehensive and

balanced history about Negro soldiers in a single volume. His plan, formally approved in August 1946, was to focus his own work on the development of Army policies in the use of Negroes in military service and on the problems associated with the execution of these policies at home and abroad, leaving to the authors of other volumes in the Army's World War II series, then taking shape,

the responsibility for covering activities of Negroes in particular topical areas. This definition of the author's objective is needed in order to understand why he has described his work "in no sense a history of Negro troops in World War II." Writing some years ago, he explained: "The purpose of the present volume is to bring together the significant experience of the Army in dealing with

an important national question: the full use of the human resources represented by that 10 percent of national population that is Negro. It does not attempt to follow, in narrative form, the participation of Negro troops in the many branches, commands, and units of the Army. . . . A fully descriptive title for the present volume, in the nineteenth century

manner, would read: 'The U.S. Army and Its Use of Negro Troops in World War II: Problems in the Development and Application of Policy with Some Attention to the Results, Public and Military.'" Thus, in accordance with his objective, the author gives considerably more attention to the employment of Negroes as combat soldiers than to their use as service troops

overseas. Even though a large majority of the Negroes sent overseas saw duty in service rather than in combat units, their employment in service forces did not present the same number or degree of problems. US Army Order of Battle, 1919-1941: The services : air service, engineers, and special troops, 1919-41 CreateSpace "Recent discussions about granting direct

commissions as field-grade officers (major, lieutenant colonel, and colonel) to people with highly-desirable civilian experience are often couched in terms of "that was done during World War II." Responses that such wartime commissions were temporary commissions in the Army of the United States (AUS), rather than in the Regular Army (RA), are usually met

with blank looks. During World War II, almost all Army commissions-- the authorization from the government that gives a military officer the right to command-- were temporary AUS commissions. The AUS commission saw continued use in limited numbers after the war, but has been in hiatus since the early 1980s. The AUS commission was the last of several types

of temporary commissions the United States government used to expand the Army officer corps during wartime. The use of temporary commissions to provide enough officers to lead the quickly growing ranks was the standard practice during most of the major wars fought by the United States until after the end of the Vietnam War, varying only in the type of

commission and method for raising additional wartime forces. Only since 1980 has the US Army sought to wage war without issuing some sort of temporary commission to expand the officer corps"--

 Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the

appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation.

Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable

reference source for anyone interested in the institutional history of the branch. *So Many, So Much, So Far, So Fast* Government Printing Office An analysis of the complex tasks associated with Army procurement and economic mobilization featuring the War Department's business relationships from prewar planning and the determination of military requirements

to the settlement and liquidation of the wartime procurement effort.

In this comprehensive study, Keith E. Eiler documents Judge Patterson's extraordinary and largely unrecognized contributions to the defense and war efforts. He also offers a provocative count of the manner in which the national

government managed to transform itself for war, and convert a vast market-oriented economy into an effective war machine. At the same time, the author sheds revealing new light on numerous issues of war policy and on the evolution of civil-military relations during the emergency. The vast, and vastly influential, American military machine has been aided and abetted by cinema

since the earliest days of the medium. The US military realized very quickly that film could be used in myriad ways: training, testing, surveying and mapping, surveillance, medical and psychological management of soldiers, and of course, propaganda. Bringing together a collection of new essays, based on archival research, Wasson and Grieveson seek to cover the complex

history of how the military deployed cinema for varied purposes across the the long twentieth century, from the incipient wars of US imperialism in the late nineteenth century to the ongoing War on Terror. This engagement

includes cinema created and used by and for the military itself (such as training films), the codevelopment of technologies (chemical, mechanical, and digital), and the use of film (and related mass media) as a

key aspect of American "soft power," at home and around the world. A rich and timely set of essays, this volume will become a go-to for scholars interested in all aspects of how the military creates and uses moving-image media.
