“Source: Music of the Avant-garde, 1966-1973 brings its extraordinary, historical explorations and experimentations to a new audience of contemporary music devotees, researchers, composers, students, and educators. This welcome volume reproduces Source's original, provocative issues in an unparalleled repository of articles, scores, graphics, photos, editorials, and reviews, featuring contributions by some of the 20th century's leading experimental and pioneering composers and performers. Larry Austin and Douglas Kahn have provided us with a true gem and an invaluable resource for future study.”
 —Elainie Lillios, Associate Professor of Composition at Bowling Green State University “Source was an audacious piece of new music entrepreneurship that could only have happened in the 1960s. I well recall discovering it in the stacks at the university library, flipping the pages and learning that you could just jump right off the edge of the known musical world. This was not a

journal that provided information or mere perspectives on new music: it showed you the music itself. It brought you into direct contact with the excitement, provocation, beauty, audacity, ingenuity, and insight of the leading experimental musicians of the day. You might be offended, intrigued, inspired, amused, baffled, but the point was that you were right in there, seeing what was going on and deciding for yourself what you wanted to make out of it. How wonderful it is for this liberating historical moment to be reincarnated; who knows what musical adventures this re-publication will inspire.” —James Pritchett, author of *The Music of John Cage* “This long awaited reissue of important documents from the late 1960s, including graphic scores, essays, and articles, is an indispensable anthology of cross-disciplinary ideas about music and composition. This is a fascinating treasure trove of musical counterculture, absolutely relevant today.”
 —Christian Marclay, visual artist and composer “Source was an essential document of its time, a music magazine that made beautiful music—and beautiful art. This was one of the reasons why I was delighted to be able to reissue all the recordings on a three CD set on Pogus. This book now puts all the print issues in one's hand, bringing us as close to having Source again as we are

ever likely to get." —Al Margolis, Pogus Productions (www.pogus.com) "There was a glorious moment at the cusp of the 1970s when all our musical road maps became obsolete overnight. Young composers relied instead on the accounts of voyageurs, many of which were printed in the pages of Source. Austin and Kahn's meticulous compendium carries us back to that heady, pre-Web time when anything seemed possible."

This book explores the view that normative behaviour is part of a complex of social mechanisms, processes and narratives that are constantly shifting. From this perspective, norms are not a kind of self-contained social object or fact, but rather an interplay of many things that we label as norms when we 'take a snapshot' of them at a particular instant. Further, this book pursues the hypothesis that considering the dynamic aspects of these phenomena sheds new light on them. The sort of issues that this perspective opens to exploration include: Of what is this complex we call a "social norm" composed of? How do new social norms emerge and what kind of circumstances might facilitate such an appearance? How context-specific are the norms and patterns of normative behaviour that arise? How do the cognitive and the social aspects of norms interact over time? How do expectations, beliefs and individual rationality interact with social norm complexes to effect behaviour? How does our social embeddedness relate to social constraint upon behaviour? How might the socio-cognitive complexes that we call norms be usefully researched?

New York Times Bestseller • Finalist for the 2018 National Book Critics Circle Award in Nonfiction • A New York Times Notable Book • Bloomberg Best Book of 2018 "Their distinctive contribution to the higher-education debate is to meet safetyism on its own, psychological turf . . . Lukianoff and Haidt tell us that safetyism undermines the freedom of inquiry and speech that are indispensable to universities." —Jonathan Marks, Commentary "The remedies the book outlines should be considered on college campuses, among parents of current and future students, and by anyone longing for a more sane society." —Pittsburgh Post-Gazette Something has been going wrong on many college campuses in the last few years. Speakers are shouted down. Students and professors say they are walking on eggshells and are afraid to speak honestly. Rates of anxiety, depression, and suicide are rising—on campus as well as nationally. How did this happen? First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education: What doesn't kill you makes you weaker; always trust your feelings; and life is a battle between good people and evil people. These three Great Untruths contradict basic psychological principles about well-being and ancient wisdom from many cultures. Embracing these untruths—and the resulting culture of safetyism—interferes with young people's social, emotional, and

intellectual development. It makes it harder for them to become autonomous adults who are able to navigate the bumpy road of life. Lukianoff and Haidt investigate the many social trends that have intersected to promote the spread of these untruths. They explore changes in childhood such as the rise of fearful parenting, the decline of unsupervised, child-directed play, and the new world of social media that has engulfed teenagers in the last decade. They examine changes on campus, including the corporatization of universities and the emergence of new ideas about identity and justice. They situate the conflicts on campus within the context of America's rapidly rising political polarization and dysfunction. This is a book for anyone who is confused by what is happening on college campuses today, or has children, or is concerned about the growing inability of Americans to live, work, and cooperate across party lines.

Published Once a Month To be sure drinking and duelling do form the bulk of the occupation of some of the society men for three years. But it is indeed a mistaken idea that all students are society men or that all society men fight, or further, that all that the society men do do, is fight. The society man, as the fraternity man with us, is most conspicuous because of his faultless dress, in addition to his lively cap and his face which cannot escape notice. He is the man of whom the stories are told and the plays written, the humorists never failing source, the caracatrists constant delight. Still in the large and famous universities, Berlin, Munich and Leipsic, bently thirty-five per cent are active, that is, belong to societies. In smaller universities such as Keil and Wurzburg, it is apt to be over half, while in the smallest universities and notably in Bonn and Heileberg, which draw the sons of the richest and most in uential families of the continent, a goodly majority belong to societies. In March 2017, Bob Lee--freelance writer, community organizer, social worker, social justice warrior, child of Houston's Fifth Ward and its advocate, former Chicago Black Panther--died at the age of 74. Alongside his larger legacy, he left behind this collection of fourteen stories published in the Houston Chronicle's Sunday Texas Magazine between 1989 and 2000. Framed by journalist and scholar Michael Berryhill, these youthful recollections and tales of his East Texas relatives reveal Lee's shock at learning that his elderly aunt and uncle, who lived in Jasper, Texas, were lifelong Republicans; recount his discovery at the age of 19 that white people, too, could be poor; recall integrating a small-town restaurant with the help of the white rancher who hired him; explore the world of Black longshoremen and offer meditations

on the mysteries of death. As he lay suffering from cancer, Lee told Berryhill that he wasn't thinking about dying, but focusing on love. Berryhill, who was Lee's first editor at the Houston Chronicle, has lovingly collected and edited Lee's stories, which are complemented by an introduction and biographical essay. Treasured storyteller Bob Lee's essays offer to readers the experience of Black history in both urban and rural settings by invoking the simple details and events of everyday life.

"In February 1965, novelist and 'poet of the Black Freedom Struggle' James Baldwin and political commentator and father of the modern American conservative movement William F. Buckley met in Cambridge Union to face-off in a televised debate. The topic was 'The American Dream is at the expense of the American Negro.' Buccola uses this momentous encounter as a lens through which to deepen our understanding of two of the most important public intellectuals in twentieth century American thought. The book begins by providing intellectual biographies of each debater. As Buckley reflected on the civil rights movement, he did so from the perspective of someone who thought the dominant norms and institutions in the United States were working quite well for most people and that they would eventually work well for African-Americans. From such a perspective, any ideology, personality, or movement that seems to threaten those dominant norms and institutions must be

deemed a threat. Baldwin could not bring himself to adopt such a bird's eye point of view. Instead, he focused on the 'inner lives' of those involved on all sides of the struggle. Imagine what it must be like, he told the audience at Cambridge, to have the sense that your country has not 'pledged its allegiance to you?' Buccola weaves the intellectual biographies of these two larger-than-life personalities and their fabled debate with the dramatic history of the civil rights movement that includes a supporting cast of such figures as Robert Kennedy, Martin Luther King Jr., Malcolm X, Lorraine Hansberry, and George Wallace. Buccola shows that the subject of their debate continues to have resonance in our own time as the social mobility of blacks remains limited and racial inequality persists"--

'Every kind of love, whether happy or unhappy, is a real calamity if you surrender to it wholly...' This heart-felt sentiment, expressed by Turgenev's unfortunate character Rakitin sums up the central predicament of *A Month in the Country*, Turgenev's most celebrated play. Completed in 1850, it explores the complexities of that most universal of themes, the eternal love triangle; and in it Turgenev uses his grasp of psychology and brilliant technique to turn this subject into a dazzling tragicomedy.

Social Mobility Among the Professions

Fred Chappell's *The Gaudy Place* is perhaps the first novel to depict the society of the street people of the New South and their relationship to the middle class. For its wry portrayal of displacement and injustice this novel was awarded the Sir Walter Raleigh Prize. The street-smart teenager Arkie triggers the events of the story with his ambition to rise in economic status. He proposes business deals to the prostitute Clemmie and the successful con man Oxie, a hustler who aspires to political office. When the prank of a middle-class teenager, Linn Harper, offers Oxie the surprising opportunity to gain a foothold in respectable society, an unexpected climax reveals the interdependence of all social levels in a culture too quickly changing from a rural to an urban character. Here is a small world in which quick wits and wily survival skills are necessary and admirable, even though the race is not always to the swift. Originally published in 1973, *The Gaudy Place* is drily humorous, darkly ironic, fast-moving, and entertaining. Its best strength is its gallery of sharply drawn, fondly observed characters unknowingly at odds with one another.
