## HINTON CARLA

---

*Resources in Education* JIST Works

Describes 250 occupations which cover approximately 107 million jobs.

**Hearings Before a Subcommittee of the Committee on Appropriations, House of Representatives, One Hundred Eighth Congress, First Session** CRC Press

Provides the most recent government information on jobs and careers in the United States, includes data about salaries and occupational advancement, and describes positions for the professional through entry level.

Monthly Catalogue, United States Public Documents Bernan Reprints

Looks at a variety of careers in the green energy business, with information on education requirements and training programs, job duties, earnings potential, and trade and professional organizations.

*Environmental Impact Statement* DIANE Publishing

In 'Giving Aid Effectively', Mark T. Buntaine argues that countries that are members of international organizations have prompted multilateral development banks to give development and environmental aid more effectively by generating better information about performance.

Publishing

A nationally recognized, best-selling reference work. An easy-to-use, comprehensive "encyclopedia" of today's occupations & tomorrow's hiring trends. Describes in detail some 250 occupations -- covering about 104 million jobs, or 85% of all jobs in the U.S. Each description discusses the nature of the work; working conditions; employment; training, other qualifications, & advancement; job outlook; earnings; related occupations; & sources of additional information. Revised every 2 years.

**The Education of Native and Minority Groups** M.E. Sharpe

If you're looking for a school that offers "green" education then this ebook is for you. In this ebook the reader will find a listing of 25 four-year schools and 25 two-year schools that have great "green" programs. There is also a chapter on union training programs for green jobs. For more information see Peterson's *Green Careers in Building and Landscaping*.

*Hearings* IDEA Health & Fitness Association

A nationally recognized, best-selling reference work. An easy-to-use, comprehensive encyclopedia of today's occupations & tomorrow's hiring trends. Describes in detail some 250 occupations -- covering about 104 million jobs, or 85% of all jobs in the U.S. Each description discusses the nature of the work; working conditions; employment; training, other qualifications, & advancement; job outlook; earnings; related occupations; & sources of additional information. Revised every 2 years.

*Green Careers in Energy* Peterson's

Covers receipts and expenditures of appropriations and other funds.

Green Careers in Building and Landscaping: Colleges and Union Organizations with Great Green Programs Springer Science & Business Media

Many buildings fail to perform adequately, causing illness and productivity loss among the inhabitants. The growing impact of this problem on people and property values - and the increasing litigation to which it gives rise - clearly reveals the limitations in and piecemeal character of the current education of building and health professionals in addressing the relationship between a building and its occupants. Education and Training in Indoor Air

Sciences introduces examples of existing educational programs that seek to bridge the gap between health and building sciences. The contributors - selected among architects, engineers, clinicians, physicists, psychologists and policymakers - discuss the design of a core curriculum for all those holding a degree within building design, construction, operation and maintenance, investigation, and all occupational / environmental health and general practitioners. The book also examines the obstacles to such a curriculum and ways to overcome them.

**Application of Radon Reduction Methods** Peterson's

Helps readers make the most of job opportunities that have arisen from the New Energy for America plan, providing information on projected salary ranges, where jobs are most available and how to find jobs and including articles on green topics and job data. Original.

**Report of the Clerk of the House from ...** Oxford University Press

A thorough revision of the previous "Environmental Engineer's Mathematics Handbook," this book offers readers an unusual approach to presenting environmental math concepts, emphasizing the relationship between the principles in natural processes and environmental processes. It integrates the fundamental math operations performed by environmental practitioners for air, water, wastewater, solid/hazardous wastes, biosolids, environmental economics, stormwater operations, and environmental health, safety, and welfare. New material includes quadratic equations, Quadratic equations, Boolean algebra, statistics review, fundamental fire science, basic electricity for environmental practitioners, and environmental health computations and solutions.

*Occupational Outlook Handbook* Peterson's

Thinking about a green career or looking for a college or university that promotes great green programs? Peterson's *Green Careers in Building and Landscaping* pinpoints the best opportunities in building design and construction; installation, operations, and energy efficiency; commercial industrial, and residential design; landscaping, groundskeeping, and turf care;

and policy, analysis, advocacy, and regulatory affairs-with job details as well as info on colleges, organizations, and institutions that offer courses, degrees, certification, and training/retraining-that can lead to a green career. Green Careers in Building and Landscaping offers inspirational and insightful essays on the importance of sustainability, written by individuals at the forefront of environmental organizations, university sustainability efforts, and college training programs. Essay writers include folks with the

U.S. Green Building Council (USGBC), Second Nature, Earth911.com, University of Arizona, Philadelphia University, and Skanska USA Building Inc. Green Careers in Building and Landscaping also features an exclusive bonus section, "What Is the New Green Economy," which examines the current interest in sustainability. You'll also find building and landscaping-related features, including interviews with individuals in a variety of green careers. Other feature articles offer useful tips and advice for a more sustainable life.
