ÉIf my present reader
happens to be a Boy
Scout or a scout-
master who wants the
scouts to build a tower
for exhibition purposes,
he can do so by
following the directions
here given, but if there
is real necessity for
haste in the erection of
this tower, of course
we cannot build one as
tall as we might where
we have more time.
With a small tower all
the joints may be
quickly lashed together
with strong, heavy
twine, rope, or even
wire; and in the
wilderness it will

probably be necessary
to bind the joints with
pliable roots, or
cordage made of bark
or withes; but as this is
not a book on
woodcraft we will
suppose that the
reader has secured the
proper material for
fastening the joints of
the frame of this
signal-tower and he
must now shoulder his
axe and go to the
woods in order to
secure the necessary
timber. First let him cut
eight straight
polesÑthat is, as
straight as he can find
them. These poles
should be about four
and one half inches in
diameter at their base
and sixteen and one
half feet long. After all
the branches are
trimmed off the poles,
cut four more sticks
each nine feet long and
two and a half or three

inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

Take a systematic approach to understanding the fundamentals of machine learning and deep learning from the ground up and how they are applied in

practice. You will use this comprehensive guide for building and deploying learning models to address complex use cases while leveraging the computational resources of Google Cloud Platform. Author Ekaba Bisong shows you how machine learning tools and techniques are used to predict or classify events based on a set of interactions between variables known as features or attributes in a particular dataset. He teaches you how deep learning extends the machine learning algorithm of neural networks to learn complex tasks that are difficult for computers to perform, such as recognizing faces and understanding languages. And you will know how to

leverage cloud computing to accelerate data science and machine learning deployments. Building Machine Learning and Deep Learning Models on Google Cloud Platform is divided into eight parts that cover the fundamentals of machine learning and deep learning, the concept of data science and cloud services, programming for data science using the Python stack, Google Cloud Platform (GCP) infrastructure and products, advanced analytics on GCP, and deploying end-to-end machine learning solution pipelines on GCP.
