"That relatively few criminal cases in this country are resolved by full Perry Mason-style trials is fairly common knowledge. Most cases are settled by a guilty plea after some form of negotiation over the charge or sentence. But why? The standard explanation is case pressure: the enormous volume of criminal cases, to be processed with limited staff, time and

resources. . . . But a large body of new empirical research now demands that we re-examine plea negotiation. Milton Heumann's book, *Plea Bargaining*, strongly and explicitly attacks the case-pressure argument and suggests an alternative explanation for plea bargaining based on the adaptation of attorneys and judges to the local criminal court. The book is a significant and welcome addition to the literature. Heumann's investigation of case pressure and plea negotiation demonstrates solid research and careful analysis."—Michigan Law Review

"This book offers an empirically grounded theory that reframes the study of law and

society from a predominantly national context, which dichotomizes the study of international law and national compliance into a dynamic perspective that places national, international, and transnational lawmaking and practice within a coherent single frame. By presenting and elaborating on a new concept, transnational legal orders it offers an original approach to the emergence of legal orders beyond nation-states. It shows how they originate, where they compete and cooperate, and how they settle on institutions that legally order fundamental economic and social behaviors that transcend national borders. This original theory is applied and developed by distinguished scholars from North America and Europe in business law, regulatory law and human rights"--

Title and Title Conflicts in respect of Intermediated Securities under English Law Pearson UK

This book offers an original academic study of the Rotterdam Rules. It analyses the salient articles that will have an impact on international sale contracts governed by English law, including the most popularly used international law instruments, terms and standard sale contracts. Looking beyond the legal relationship of carrier-shipper and carrier-receiver, this book examines the important articles of the Rotterdam Rules that affect the ability of the trading protagonists to perform their sale contract.

Commercial Law has been written principally for students taking an elective in commercial law on the Legal Practice Course. It covers all the core areas of general commercial practice, including agency and distribution agreements; sale and supply of goods and services; international sales contracts; credit and security; bills of exchange; competition law; intellectual property law and commercial contracts including specimen sets of terms of sale and purchase. Diagrams and examples ensure that the

practical aspects of the subject area are emphasised, while the detailed coverage gives students a good introduction to the practitioner style texts they will use once in practice. Coverage of new cases such as *Aerotel Ltd v Telco Holdings Ltd and Others*; *Re Macrossani's Application* and *Lonsdale v Howard and Hallam Ltd* ensure that the most recent developments are considered. This text offers an excellent bridge between the notes, exercises and case studies provided by lecturers, giving students a well-rounded view of commercial law.

Gano's Commercial Law Routledge

Sealy and Hooley's Commercial Law Penguin UK

This book examines property issues in respect of intermediated securities under English law, namely title and title conflicts between a true owner and a purchaser. Intangible book entry securities held with an intermediary, often commingled with the holdings of other clients of the intermediary, often give rise to uncertainty in property rights in the securities of an investor under most legal systems, for example, whether property rights can be established and how title conflicts are dealt with. This book identifies the flexible framework of English property law for establishing property rights over commingled intangibles, in particular through trusts; establishes the policy of priority rules as of comparing the merits of rights and preferring a vested right of a true owner over a subsequent purchaser, particularly a vested right under fiduciary relations. The book works towards the conclusion that, given the general principle of English property law for vested rights, title conflicts may be tilted towards purchasers in a mild rather than a radical way, by introducing a good faith purchaser rule to intermediated securities or leaving it to judicial discretion where an estoppel might work in favour of a purchaser. This book is suitable for lawyers, officials and academics in the field of intermediated securities, as well as trust, property and financial regulation.

In 2014 the Commercial Bar Association celebrated its 25th anniversary. When Lord Mackay's Green papers, and especially that on 'The Work and Organisation of the Legal Profession', were published, the survival of the Bar was brought into question and this was the catalyst for the formation of COMBAR. Since then, it has gone from strength to strength. This volume is a collection of contributions from a number of different people who have been involved with COMBAR over the years. It includes text from senior judiciary, past chairs, honorary overseas members, VIP annual lectures and lectures from guest speakers, amusing anecdotes and much more. *Commercial Remedies: Resolving Controversies* Oxford University Press

Examined here are the legal and practical reasons for the inefficiency of the legal framework of creditor protection in Nigeria. This is amply justified considering the critical role of credit in the promotion of economic growth and development and also bearing in mind the near calamitous

consequences the 2009 financial crisis unleashed not only among Nigerian banks and financial institutions, and in the international financial system. The latter nearly led to socioeconomic catastrophe in Nigeria, as well as globally. It is hoped that book is found useful by government, policy makers, academics, corporate financial experts, investment bankers and other stakeholders to initiate and implement efficient policy actions to protect creditors in order to sustain the flow of credit, the engine of any economy.

Basic Administrative Law for Paralegals
Cambridge University Press

The third edition of this acclaimed book continues to provide a discussion of key theoretical and policy issues in corporate finance law. It has been fully updated to reflect developments in the law and the markets. One of the book's distinctive features is its equal coverage of both the equity and debt sides of corporate finance law, and it seeks, where possible, to compare and contrast the two. This book covers a broad range of topics regarding the debt and equity-raising choices of companies of all sizes, from SMEs to the largest publicly traded enterprises, and the mechanisms by which those providing capital are protected. Each chapter provides a critical analysis of the present law to enable the reader to understand the difficulties, risks and tensions in this area, and the attempts by the legislature, regulators and the courts, as well as the parties involved, to deal with them. The book will be of interest to practitioners, academics and students engaged in the practice and study of corporate finance law.

This book is the first to provide an extensive analysis of the range of defences to payment under letters of credit and demand guarantees. It considers the extent to which different defences undermine the abstraction of these instruments. This is a fundamental issue, since letters of credit and demand guarantees are designed to be abstract, or autonomous, from the underlying contract that called for their use. The purpose of that abstraction is to provide certainty of payment, but the various defences diminish that certainty. The book examines the spectrum of defences that are frequently litigated and debated in international practice: fraud in the documents, nullity, fraud affecting deferred payment letters of credit, fraud as no honest belief, unconscionable conduct and illegality. Vitally, the book provides analysis of the relevant judicial decisions and offers clear practical

guidance on which defences are most suitable for each instrument. As the instruments are heavily used in international trade, this work is particularly suited to financial and commercial law practitioners who draft agreements, as well as those who advise on disputes concerning these instruments. Accessible and engaging, the book is also relevant for academics and students.

"Once more, we were delighted to take on the task of updating this text for its 14th edition, having taken over editorial responsibilities from the late John Adams from the 13th edition. In our preface to the previous edition, we recorded the sudden passing of Professor Adams. Sadly, in this preface, we must note another passing: on 30 March 2018, Patrick Atiyah, who wrote the 1st-8th editions of this book and continues to give the book its name, passed away at the age of 87. Patrick was one of those giants of academic contract law whose contributions continue to be read and to inspire scholars everywhere. We are both mindful of our task to maintain the scholarly rigour which he gave to this book as we take it into the future. This edition is also the first time since the 9th edition without a Scottish editor. Professor Hector MacQueen had been responsible for adding Scottish content since the 10th edition (2001), but decided that he would discontinue this role after the 13th edition was published in 2016. We are very grateful for Hector's contributions to the work. On the advice of the book's publishers, this edition has been put together without the benefit of a

Scottish editor, although we have, of course, continued to take decisions from the Scottish courts into account in updating the various chapters. Since the last edition was published, there have been few major developments in the law on the sale of goods, aside from the difficult ruling by the Supreme Court in *PST Energy 7 Shipping LLC v OW Bunker Malta Ltd* [2016] UKSC 23 (which arrived too late for proper consideration in the previous edition). We have updated the text in light of recent cases and academic writings where appropriate. Furthermore, we have continued our task of streamlining the running order of the chapters, and we have sought to make gentle updates to the language of the book, preserving its rigour but ensuring it remains accessible to a contemporary audience. In some instances, we have ^curtailed or removed altogether the detailed discussion of the pre-1994 case-law which had become redundant as a result of the changes made to the Sale of Goods Act at that time. The rise of digital technology and new business models in the digital economy will invariably have an impact on the law concerning the sale of goods, but at this point, the real impact is not yet known. In some places, we have alluded to the possible significance of digital technology, and this could well become a more significant theme in future editions"--

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including

the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments. **Celebrating the First 25 years** Oxford University Press
