Over the years, pragmatics - the study of the use and meaning of utterances to their situations - has become a more and more important branch of linguistics, as the inadequacies of a purely formalist, abstract approach to the study of language have become more evident. This book presents a rhetorical model of pragmatics: that is, a model which studies linguistic communication in terms of communicative goals and principles of 'good communicative behaviour'. In this respect, Geoffrey Leech argues for a rapprochement between linguistics and the traditional discipline of rhetoric. He does not reject the Chomskian revolution of linguistics, but rather maintains that the language system in the abstract - i.e. the 'grammar' broadly in Chomsky's sense - must be studied in relation to a fully developed theory of language use. There is therefore a division of labour between grammar and rhetoric, or (in the study of meaning) between semantics and pragmatics. The book's main focus is thus on the development of a model of pragmatics within an overall functional model of language. In this it builds on the speech act theory of Austin and

Searle, and the theory of conversational implicature of Grice, but at the same time enlarges pragmatics to include politeness, irony, phatic communion, and other social principles of linguistic behaviour.

In **THE LIFE OF MUHAMMAD**, Haykal achieves two objectives admirably: first, a biography which reveals the career of Prophet Muhammad (peace be upon him) in the full light of historic reality; second, bringing out the essence of Islam, as exemplified in the life of the greatest Muslim. It includes complete coverage of the Prophet's life, a detailed analysis of pre-Islamic Arabia, the situational context of revelation, and a comparative study of the basics of Islamic and western civilizations. It is based upon a scholarly examination of all of the extant Sirah and Hadith literature (the Prophet's life, his sayings and narrations of his teachings by his contemporaries) with the eye of an objective, scientific and critical scholar who is well-versed in modern historical critical methodology. **THE LIFE OF MUHAMMAD** is an essential book for all English-speaking Muslims, as well as non-Muslims. This English version has been approved by the Supreme Council for Islamic Affairs, Cairo.

Ride. Protect. Defend. Anna Kloss grew up as a smart girl in the Sinister Knights Motorcycle Club, an above-the-law group of misfits that fights to safeguard the women of their town. Straddling both worlds, she's lived the last few years in a college dorm, losing herself in the promise of her future and trying to forget the lost love of her past. As Vice President of the Sinister Knights, Ryker Beckett has proven his dedication and loyalty by sitting in a county jail cell for three years for saving one woman from a nightmarish assault. The woman. The only one who matters. Prez's young, innocent, and untouched daughter, Anna. But now, Ryker is back, his sights set on reconnecting with the woman who occupied every minute of his thoughts while he was away. Anna's all grown up, but she's still the only one he can't have, the only one he craves... Is she ready for this giant, rough-around-the-edges biker to protect and defend her forever? Warning: Ryker is hard in all the right places-a tall, tattooed drink of water

sitting on a powerful engine. He's got his mind on one woman only, and when he sees her again, he's determined to get her bred and on his bike for their sultry ride into the sunset.

A new integration of Goleman's emotional, social, and ecological intelligence Hopeful, eloquent, and bold, Ecoliterate offers inspiring stories, practical guidance, and an exciting new model of education that builds - in vitally important ways - on the success of social and emotional learning by addressing today's most important ecological issues. This book shares stories of pioneering educators, students, and activists engaged in issues related to food, water, oil, and coal in communities from the mountains of Appalachia to a small village in the Arctic; the deserts of New Mexico to the coast of New Orleans; and the streets of Oakland, California to the hills of South Carolina. Ecoliterate marks a rich collaboration between Daniel Goleman and the Center for Ecoliteracy, an organization best known for its pioneering work with school gardens, school lunches, and integrating ecological principles and sustainability into school curricula. For nearly twenty years the Center has worked with schools and organizations in more than 400 communities across the United States and numerous other countries. Ecoliterate also presents five core practices of emotionally and socially engaged ecoliteracy and a professional development guide.
