Classifying Rocks Guided Chapter 5
Igneous Rocks Test Answer Key
Geologists classify metamorphic rocks according to how much they have been changed from the original, or parent, rock. Low-grade metamorphic rocks still appear very similar to the parent rock, while high-grade metamorphic rocks have

been changed so much that they look very different from the parent rock.
Types of Rocks Facts, Worksheets & Classification of Rocks ...
CLASSIFICATION OF ROCKS.
Rocks are composed of grains of minerals which are homogeneous solids formed from a chemical compound arranged in an orderly manner. The aggregate minerals forming the rocks are held together by chemical

bonds. The types and abundance of minerals in a rock are determined by the way in which it was formed.
