Raising Self-Esteem in Adults

Jessica Kingsley Publishers
 Winner of the American Journal of Nursing Book of the Year 2011 (Category: Maternal And Child Health) Building on children's natural inclinations to pretend and reenact, play therapy is widely used in the treatment of psychological problems in childhood. This book is the only one of its kind with more than 200 therapeutic activities specifically designed for working with children and teenagers within the healthcare system. It provides evidence-based, age-appropriate activities

for interventions that promote coping. The activities target topics such as separation anxiety, self-esteem issues, body image, death, isolation, and pain. Mental health practitioners will appreciate its "cookbook" format, with quickly read and implemented activities. *Creativity* Rowman & Littlefield
 Community-Based Qualitative Research: Approaches for Education and the Social Sciences by Laura Ruth Johnson is a practical text that integrates theoretical perspectives with guidelines for designing and implementing community-based qualitative research projects. Coverage of participatory research designs and approaches is complemented by chapters on specific aspects of this research process, such as developing relationships

and sharing findings to strengthen programs. Included are useful handouts and templates for applying to the reader's own projects, and end-of-chapter questions for self-reflection and class discussion. Readers will find the book's engaging case studies, interdisciplinary real-life examples, and insights from project participants as a helpful foundation for future work in the field.  This handbook focuses on the development and nurturance of creativity across the lifespan, from early childhood to adolescence, adulthood, and later life. It answers the question: how can we help individuals turn their creative potential into achievement? Each chapter examines various contexts in which creativity exists, including school, workplace,

community spaces, and family life. It covers various modalities for fostering creativity such as play, storytelling, explicit training procedures, shifting of attitudes about creative capacity, and many others. The authors review research findings across disciplines, encompassing the work of psychologists, educators, neuroscientists, and creators themselves, to describe the best practices for fostering creativity at each stage of development.

Nursing Care of Children Cambridge University Press
Children and teenagers with autism can struggle to cope with the loss of a loved one, and the complicated and painful emotions of bereavement. This book explains death in concrete terms that the child with autism will understand, explores feelings that the child may encounter as a part of bereavement, and offers creative and expressive activities that facilitate healing. With

illustrations throughout, this interactive book begins with a simple story about what happens when people die. Each chapter then expands on the issues that have been raised in the story and offers a variety of coping skills exercises including writing, art and craft, cooking, movement, relaxation, and remembrance activities. Encouraging children with autism to express their loss through discussion, personal reflection, and creative activity, the book is ideal for children and teens to work through by themselves, or with the support of a family member or professional. *Creative Arts-Based Group Therapy with Adolescents* Jessica Kingsley Publishers

A guide for librarians offers tips on planning programs and services based on the needs of middle school students and includes suggestions for fiction books, nonfiction resources, electronic materials, and sample booktalk programs. *The Cambridge Handbook of Lifespan Development of Creativity* Jessica Kingsley Publishers
Create unique and stunning imagery on any exterior with diverse

surface design techniques from Courtney Cerutti, author of *Playing with Image Transfers and Washi Tape*. Whether you are looking to stamp on fabric, marble paper, etch into wood or clay, or create modern looks with neon and metallic, the projects in this book will provide endless inspiration. *Playing with Surface Design* is a practical and modern resource that will teach you the seven techniques of surface design: Paste Paper, Marbling, Monoprinting, Dyeing and Bleaching, Stamping, and Painting and Mark Making. Creative Expression Activities for Teens

Teacher Created Materials Creative Arts-Based Group Therapy with Adolescents provides principles for effective use of different arts-based approaches in adolescent group therapy, grounding these principles in neuroscience and group process practice-based evidence. It includes chapters covering each of the main creative arts therapy modalities—art therapy, bibliotherapy, dance/movement therapy, drama therapy, music therapy, and poetry/expressive writing

therapy—written by respected contributors who are expert in the application of these modalities in the context of groups. These methods are uniquely effective for engaging adolescents and addressing many of the developmental, familial, and societal problems that they face. The text offers theory and guiding principle, while also providing a comprehensive resource for group therapists of diverse disciplines who wish to incorporate creative arts-based methods into their practice with teens. *Modern Techniques for Painting, Stamping, Printing and More* Jessica Kingsley Publishers Moody. Reckless. Impractical. Insecure. Distracted. These are all words commonly used to describe adolescents. But what if we recast these traits in a positive light? Teens possess insight, passion, idealism, sensitivity, and creativity in abundance--all qualities that can make a significant positive contribution to society. In this thought-provoking book, Thomas Armstrong looks at the power and promise of the teenage brain from an empathetic, strength-based

perspective—and describes what middle and high school educators can do to make the most of their students' potential. Thoroughly grounded in current neuroscience research, the book explains what we know about how the adolescent brain works and proposes eight essential instructional elements that will help students develop the ability to think, make healthy choices, regulate their emotions, handle social conflict, consolidate their identities, and learn enough about the world to move into adulthood with dignity and grace. Armstrong provides practical strategies and real-life examples from schools that illustrate these eight key practices in action. In addition, you'll find a glossary of brain terms, a selection of brain-friendly lesson plans across the content areas, and a list of resources to support and extend the book's ideas and practices. There is a colossal mismatch between how the adolescent brain has evolved over the millennia and the passive, rote learning experiences that are all too common in today's test-obsessed educational climate.
