"Release any concerns that you have about this path you're about to walk on, and just go into it with the curiosity of a child, knowing that you'll come out on the other side as a new person, or to be more accurate, far more of the person who you truly are and have been created to be." Jack Valentine seemed to have it all. He made good money as an adman, and looked good doing it. He had a hot apartment, cool friends, even a slick car—at least until the hectic Monday morning a truck smashed into it, sending the critically injured Jack to the hospital. Everything happens for a reason, though, and Jack's reason reveals itself in the silver-haired cancer patient who becomes his roommate one evening. The elderly man, Cal, shares his life story—one not dissimilar to Jack's—of material wealth masking a gaping hole within. Cal ultimately found salvation through philosophy ("the love of wisdom"), and now offers to help Jack by prepping the younger man for the Final Questions we all must face: Have I lived wisely? Have I loved well? Have I served greatly? Presenting Jack with three plane tickets, each accompanied by a map marked with a red X, Cal sends Jack to meet with three great teachers, each of whom will help Jack answer one of the Final Questions—just as they once helped Cal. First, in Rome, Jack will meet "the Saint." Then a haunted beach in Hawaii introduces him to "the Surfer." And finally the grandeur of New York City sets the stage for his last encounter: with "the CEO." Along the way, Jack will learn to do his interior work, discover that our negative traits offer gateways to higher versions of ourselves, and understand that figuring things out in your head can distract you from the powerful whispers of your heart. Join Jack on his journey and step into the you that you were always meant to be.

"Jim Crimmins explains what really drives human behavior. For anyone who hopes to influence what people do or what they buy, Jim's book is required reading." —Keith Reinhard, chairman emeritus of DDB Worldwide and a member of the Advertising Hall

of Fame 7 Secrets of Persuasion is the first book to take the latest scientific insights about the mind and apply them to the art of persuasion. It directly translates the revolution in neuroscience that has occurred over the last 40 years into practical new techniques for effective persuasion. Whether your goal is to persuade one person—a husband, child, or boss—or the millions who might purchase an Apple Watch or a Budweiser, 7 Secrets of Persuasion will show you how to: Unearth the motivation that actually changes a behavior like smoking, voting, or buying, even though people don't know why they do what they do. Tap into the mental process that gives religious symbols, political symbols, and commercial logos their power. Make a promise that is delayed, uncertain, and rational more compelling by making it immediate, certain, and emotional. Transform your candidate, service, or product into the one people want by utilizing what psychologists call the "fundamental attribution error."

The brave woman, Maharani Lakshmibai, is a grand personality and inspiring chapter of Indian history. Even today her name inspires a new zeal in the hearts of all those who are struggling against injustice and cruelties. Her life was a strange combination of rise and fall. A seven-year-old innocuous madonna, the daughter of Moropant Tambe, a very ordinary common man, by quirk of circumstances, became the queen of nearly middle aged

Raja Gangadhar Rao?Maharani Lakshmibai. She became a widow at the tender age of nineteen years. And from here began her life of struggles. At the time of merger of her state in the British empire, she thundered, "I will not give my Jhansi."

While it is often said that a person with a negative attitude cannot be helped, it is also true that a person with a positive attitude cannot be stopped. Life is an obstacle course in which we can often become our own biggest obstacle, but a positive attitude can be transformational. In one sense, this book is a road map for a life journey in achieving more. It offers direction and can help you make positive decisions in a noisy and cluttered environment. Success is neither a miracle nor a mystery. It is the natural outcome of consistently applying certain principles on an ongoing basis. Success does not depend upon special skills, formal education or superior intelligence. Success is a matter of understanding and acting upon principles that have been in existence for centuries. These principles may be simple in themselves but none of them will work unless they are put into firm and decisive action. This book effectively teaches not only the principles of success but also how to avoid expensive and demoralising mistakes. The principles themselves are universal, cutting across country, culture and religion. Diligently practising them will help you develop confidence and allow your life to become more meaningful and rewarding. Applying these principles may require a lot of self-discipline and commitment but, once learned and applied, the results can be rewarding and gratifying. If you want to be successful and happy, then become a student and study the life of successful people in depth; if you want to become wealthy, then study the principles of acquiring wealth. Learning to make a living and learning to live are two different things. This book helps you design a more meaningful life, by making positive choices and avoiding the most common pitfalls. Acquiring facts is knowledge; interpreting facts is understanding; and the proper application of facts is wisdom. This book by Shiv Khera is designed to help you create an action plan to optimize your potential - in other words, to achieve more.

#1 New York Times bestselling author John C. Maxwell's latest book will enhance the lives of leaders, professionals, and anyone who wants to achieve success and personal growth. We often treat the word capacity as if it were a natural law of limitation. Unfortunately, most of us are much more comfortable defining what we perceive as off limits rather than what's really possible. Could it be that many of us have failed to expand our potential because we have allowed what we perceive as capacity to define us? What if our limits are not really our limits? In his newest book, John Maxwell identifies 17 core capacities. Some of these are abilities we all already possess, such as energy, creativity and leadership. Others are aspects of our lives controlled by our choices, like our attitudes, character, and intentionality. Maxwell examines each of these capacities, and provides clear and actionable advice on how you can increase your potential in each. He will guide you on how to identify, grow, and apply your critical capacities. Once you've blown the "cap" off your capacities, you'll find yourself more successful--and fulfilled--in your daily life.
