Motilal Nehru and

Jawaharlal Nehru are both

prominent Indian men in

their own right. Motilal is

known as a widely

successful civil lawyer and

a popular political figure,

while Jawaharlal made his

mark as a firm nationalist

leader and possible heir of

the Mahatma. This book

serves as a discussion of

Motilal's life and

achievements, and looks

into the first four decades

of Jawaharlal's life. It

shows that while the

father-son tandem played

different roles in the

nationalist struggle of

India, their close

emotional bonds helped
them influence each
other. Their story can be
combined with that of the
Indian freedom

movement. The book

covers a number of

important events in the

lives of the Nehrus—from

Motilal's childhood in

Agra, Jawaharlal's

acceptance into Trinity

College, and Jawaharlal's

entry into the political

arena, to the father-son

conflict over the changing

political atmosphere in

India. This book also takes

a look at several notable

individuals who play

important roles in Motilal

and Jawaharlal's lives.

These include Annie

Besant, the leader of the

Home Rule movement,

and Mahatma Gandhi, the

fierce fighter for India's

independence.

The Wrestler's Body tells the story of a way of life organized in terms of physical self-development. While Indian wrestlers are competitive athletes, they are also moral reformers whose conception of self and society is fundamentally somatic. Using the insights of anthropology, Joseph Alter writes an ethnography of the wrestler's physique that elucidates the somatic structure of the wrestler's identity and ideology. Young men in North India may choose to join an akhara, or gymnasium, where they subject themselves to a complex program of physical and moral fitness. Alter's first-hand description of each detail of the wrestler's regimen

offers a unique perspective on South Asian culture and society. Wrestlers feel that moral reform of Indian national character is essential and advocate their way of life as an ideology of national health. Everyone is called on to become a wrestler and build collective strength through self-discipline.

India's struggle for Independence by Bipin Chandra is your go to book for an in-depth and detailed overview on Indian independence movement. Indian freedom struggle is one of the most important parts of its history. A lot has been written and said about it, but there still remains a gap. Rarely do we get to hear accounts of the independence from the entire country and not just one region at one place. This book fits in perfectly in this gap and also provides a narration on the impact this

movement had on the people. Bipin Chandra's book is a well-documented history of India's freedom struggle against the British rule. It is one of the most accurate books which have been painstakingly written after thorough research based on legal and valid verbal and written sources. It maps the first war of independence that started with Mangal Pandey's mutiny and witnessed the gallant effort of Sri Rani Laxmi Bai. Many of the pages of this book are dedicated to Mahatma Gandhi's non-cooperation and the civil disobedience movements. It contains detailed description of Subash Chandra Bose's weapon heavy tactics and his charisma. This book includes all the independence movements and fights, irrespective of their size and impact, covering India in its entirety. Although these movements varied in means and ideas, but they shared a common goal of independence. This book contains oral and written narratives from different parts of the country, making this book historically rich and diverse. The book captures the evolution of Indian independence

struggle in full detail and leaves no chapter of this story untouched. This book is a good read for the students of Indian modern history and especially for students who are preparing for UPSC examination and have taken History as their subject.

The first installment of
Massimo Mangialavori's
Materia Medica Clinica
presents fourteen
remedies-some old, some

new-in colorful and
extensive detail. Here is

ambitious yet troubled
king; Lac equinum, the

Lac delphinium, the warm-
hearted humanitarian.
Important questions are
asked and answered: How
do Milk remedies struggle
to overcome dependence
upon their family? Why
are they so indecisive?
What differences emerge
between remedies made
from the milk of wild vs.
domesticated, and
predator vs. prey
animals? Mangialavori
elucidates his Method of
Complexity via natural
history, personality,
prominent themes and
symptoms with an
engaging style that is
