Geological, Mineral/Mining, & Petroleum Engineering; and Industrial Engineering contains a wealth of information on colleges and universities that offer graduate degrees in these exciting fields. The profiled institutions include those in the United States, Canada, and abroad that are accredited by U.S. accrediting bodies. Up-to-date data, collected through Peterson's Annual Survey

of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/week end programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application

contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance

and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies. *A Text Book of Applied Physics* Tata McGraw-Hill Education Unit 1: Relativity And Interference Theory Of Relativity Interference Unit 2: Diffraction
