Chevy Tri-Five Custom Interiors features four, two-page photographic spreads for beautiful, custom, award-winning 1955, 1956, and 1957 Chevy hot rods. The cars and interiors presented in the book will inspire readers and help them visualize interior design possibilities for their own cars. Detailed photographs of the interior features accompanied by Ron's captions explain the ideas behind the interiors—the design process, color and material selections, unique features, challenges, sound system solutions, and some of the creative problem-solving needed to work out the design. Ron is continually asked by customers and hotrod enthusiasts for pictorials of his interiors to enjoy and inspire, and this series answers the desire for a presentation of his creativity and innovation.

Contextual teaching and learning (CTL) is a system for teaching that is grounded in brain research. Brain research indicates that we learn best when we see meaning in new tasks and material, and we discover meaning when we are able to connect new information with our existing knowledge and experiences. Students learn best, according to neuroscience, when they can connect the content of academic lessons with the context of their own daily lives. Johnson discusses the elements of the brain-compatible contextual teaching and learning system: making meaningful connections; investing school work with significance; self-regulated learning; collaboration; critical and creating thinking; nurturing the individual; reaching high standards; and using authentic assessment. Drawing on the practices of teachers in kindergarten through university, Johnson provides numerous examples of how to use each part of the CTL system.
