This book can be a godsend for many persons--for those who suffer from alcohol addiction, for their friends and loved ones, and for those in the relevant helping professions. Its central message is that alcoholism is primarily a metabolic disease that should be treated with due consideration of its physiological roots. The old moralistic approach and the more recent behavioral and psychological treatment approaches have a dismal record of failure, largely because they pay little or no attention to the crucial physiological and nutritional needs of alcoholics.
