 The late twentieth century has witnessed a dramatic upsurge in foreign direct investment in the Third World. Based upon thorough statistical analysis, the book presents exhaustive case-studies of foreign investment policy in 'metropolitan' countries and of the experiences of 'host'

countries throughout Africa, Asia and Latin America. With a wide geographical and historical focus, it also makes an important contribution to current debates on dependency theory.

The Global Economic Crisis Industrial Power Systems Handbook
 Following the stock market crash of 1929 and the ensuing Great Depression, Fisher developed a theory of economic crises called "debt-deflation," which rejected general equilibrium theory and attributed crises to the bursting of a credit bubble. According to the debt deflation theory, a sequence of effects of the debt bubble bursting occurs: 1. Debt liquidation and distress selling. 2. Contraction of the money supply as bank loans are paid off. 3. A fall in the level of asset prices. 4. A still greater fall in the net worth of businesses, precipitating bankruptcies. 5.

A fall in profits. 6. A reduction in output, in trade and in employment. 7. Pessimism and loss of confidence. 8. Hoarding of money. 9. A fall in nominal interest rates and a rise in deflation adjusted interest rates. This theory was ignored in favor of Keynesian economics, partly due to the damage to Fisher's reputation from his overly optimistic attitude prior to the crash, but has experienced a revival of mainstream interest since the 1980s, particularly since the Late-2000s recession, and is now a main theory with which he is popularly associated.

Making Your Case Simon and Schuster Masterful in its simplicity, Chronicle in Stone is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

Documents Oxford University Press, USA In all major regions of the world, the economic recession is deep-seated, resulting in mass unemployment, the collapse of state social programs and the impoverishment of millions of people. The meltdown of financial markets was the result of institutionalized fraud and financial manipulation. The economic crisis is accompanied by a worldwide process of militarization, a "war without borders" led by the U.S. and its NATO allies. This book takes the reader through the corridors of the Federal Reserve, into the plush corporate boardrooms on Wall Street where far-reaching financial transactions are routinely undertaken. Each of the authors in this timely collection digs beneath the gilded surface to reveal a complex web of deceit and media distortion which serves to conceal the workings of the global economic system and its devastating impacts on people's lives.

A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war. On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

This book studies the adoption and diffusion of gender quotas in Latin America and beyond. Gender quotas are institutional mechanisms intended to increase the proportion of women rapidly and effectively in key decision-making

political posts. Since the 1980s, gender quotas have been implemented in various governmental bodies and, more commonly, in legislatures. Starting in Northern Europe, these policies have expanded to other European countries and later to thirteen Latin American countries. Yet, whereas gender quotas in most European countries - with the exception of Belgium and France - have been adopted voluntarily by some political parties, in Latin America national legislation mandates all parties to include in their lists a quota for women candidates to legislatures. Although recent scholarship on gender quotas has been devoted to the adoption of gender quotas in a variety of countries, little has been done on Central and South America, despite the fact that the legislative -quota wave- originated there. Diffusion of Gender Quotas in Latin America and Beyond remedies that situation and provides a rich comparative analysis of this policy proliferation in Latin America as well as outside this region by also examining the adoption of legislative quotas in Armenia, Bosnia-Herzegovina, and Serbia."

When it was first published in the author's native country, THE PALACE OF DREAMS was immediately banned. The novel revolves around a secret ministry whose task is not just to spy on its citizens, but to collect and interpret their dreams. An entire nation's unconscious is thus tapped and meticulously laid bare in the form of images and symbols of the dreaming mind.

"We live in an era where the university system is undergoing great changes owing to developments in financing policies and research priorities, as well as changes in the society in which this system is embedded. This change toward a more market-oriented university, which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of "less profitable" academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history. Because of the absence of a historically grounded establishment of the Humanities, academic peripheries, usually accompanied by a weak civil society infrastructure, seem to offer the most fertile ground for rethinking the Humanities, their pedagogical practice, and their politics, as well as the greatest threats, such as the ongoing capitalization of research, and profitability as the norm of educational achievement. The sprawling

presence of for-profit universities and in academic peripheries such as Albania and Kosovo is indicative of this problematic, as are consistent underfunding of universities and the relentless budget cuts in American and English, and to a lesser extent European, universities. Motivations for this ongoing attack on the university are often driven by a political system or a politics with an aggressive stance to critical thought."

This volume presents the most complete collection available of the work of Victor Zarnowitz, a leader in the study of business cycles, growth, inflation, and forecasting.. With characteristic insight, Zarnowitz examines theories of the business cycle, including Keynesian and monetary theories and more recent rational expectation and real business cycle theories. He also measures trends and cycles in economic activity; evaluates the performance of leading indicators and their composite measures; surveys forecasting tools and performance of business and academic economists; discusses historical changes in the nature and sources of business cycles; and analyzes how successfully forecasting firms and economists predict such key economic variables as interest rates and inflation.

Basic Criminal Procedure Catapult
In the past 50 years, fewer than eighty women worldwide have attained the office of prime minister or president. In 2010, women held just seventeen of the world's 252 executive posts - slightly less than seven percent. In *Shattered, Cracked, or Firmly Intact?*, Farida Jalalzai explores the patterns of women executive's paths, powers, and potential impacts, examining the global and national mechanisms that prevent women from attaining executive office. Combining a broad understanding of global dynamics of executive power with detailed studies of individual women leaders, *Shattered, Cracked, or Firmly Intact?* analyzes how institutionally embedded gender expectations limit women's representational impact.
