This book is a collection of nearly 250 shortened or adapted business letters that were actually emailed, faxed, or posted. While the letters vary in complexity and length, all samples are comprised of straightforward sentences that upper intermediate readers of English as a second language should have no difficulty understanding and using. The book should also be useful for native English speakers seeking a fundamental approach to written business communication and for teachers in need of business-writing source material and exercises. The book is divided into three parts: Part 1: Letter samples and answers to the exercises (usually letter revisions). Part 2: Exercises (original letters, situational assignments, and sequencing assignments). Part 3: Hotel and travel matters.

The first page of each unit has a list of all the words and phrases to be learned in that unit, together with a pronunciation guide. At the end of each unit, an interesting story which uses the language that has just been learned is presented. The fifth unit in each group contains exercises designed to reinforce the language learned in the first four units.

This book brings together a collection of high-quality empirical studies which examine multiple aspects involved in the acquisition, teaching and assessment of pragmatics in Chinese as a second language (L2). The studies collectively address some of the most cutting-edge issues in the field of L2 pragmatics, such as the acquisition of key pragmatic features, methodological innovations in pragmatics assessment, individual difference factors and virtual learning contexts. The majority of the chapters include detailed descriptions of the instruments used and additional material in the appendices, making it a truly valuable collection for researchers and students alike. Furthermore, the publication includes the most comprehensive, state-of-the-art review of empirical research in L2 Chinese pragmatics published bilingually (in English and Chinese) between 1995 and 2022, along with a supplemental annotated bibliography. While the empirical studies all focus on Chinese as the target language, the issues they

address have implications for L2 pragmatics research in general and this book will appeal to those interested in the latest developments in the field.

This book articulates the complexities inherent in higher education's multi-faceted response to the forces of mediatization—or how institutions change when their social communication gets mediated by technology—and introduces a novel perspective to comprehend them in a systematic way. By drawing on archival analysis and six organizational case studies, the author empirically traces the emergence of a cyber-cultural institution within higher education. As these case studies demonstrate, this new institutional logic requires creativity, individual recognition, and an underlying platform powered by cyber technologies and digitization of content. Using an analytical lens, this cyber-cultural perspective answers many questions about why faculty refuse to adopt online education, why students struggle with mediated teaching, and what possibly could be done to take online education to its next level.
