A TRAGICOMIC TALE ABOUT LOVE, DELUSION, CORPORATE GREED AND THE HAZARDS OF USING A PINEAPPLE CUTTER WHILE HALLUCINATING LIGHT DUTIES, LARGE PAY, NO QUESTIONS ASKED... OR ANSWERED After seeing a curious flyer, Freya takes a job caring for Elijah, the comatose son of the eccentric Vincetti family. She soon discovers that the Vincetti's labyrinthine mansion hides a wealth of secrets, their corporate rivals have a nasty habit of being extravagantly executed, and Elijah is not the saint they portray him to be. As well, Marilyn Monroe keeps showing up, unaware she's

very much deceased. And there's something very strange about the story that Elijah's brother Jack is writing...

The BrickGun Book shows you how to build five remarkably sleek LEGO® handgun replicas, like the classic Berreta 92FS and a formidable rubber-band-firing MAC-11. Each chapter includes step-by-step building instructions and a complete parts list using only readily available LEGO pieces.

Builder Jeff Boen has designed each model with stunning accuracy and attention to detail, focusing on everything from 1:1 real-life scale to functioning cocking and trigger mechanisms. Each BrickGun is ultra-realistic in look and feel, but mostly harmless—perfect for display or your next backyard battle. NOTE: Adult supervision is required. These models are not suitable for children under the age of 12.

Perhaps never before has an objective, evidence-based review of the intersection between gun violence and mental illness been more sorely needed or more timely. Gun Violence and Mental Illness, written by a multidisciplinary roster of authors who are leaders in the fields of mental health, public health, and public policy, is a practical guide to the issues surrounding the relation between firearms deaths and mental illness. Tragic mass shootings that capture headlines reinforce the mistaken beliefs that people with mental illness are violent and responsible for much of the gun violence in the

United States. This misconception stigmatizes individuals with mental illness and distracts us from the awareness that approximately 65% of all firearm deaths each year are suicides. This book is an apolitical exploration of the misperceptions and realities that attend gun violence and mental illness. The authors frame both pressing social issues as public health problems subject to a variety of interventions on individual and collective levels, including utilization of a novel perspective: evidence-based interventions focusing on assessments and indicators of dangerousness, with or without indications of mental illness. Reader-friendly, well-structured, and accessible to professional and lay audiences, the book: * Reviews the epidemiology of gun violence and its relationship to mental illness, exploring what we know about those who perpetrate mass shootings and school shootings. * Examines the current legal provisions for prohibiting access to firearms for those with mental illness and whether these provisions and new mandated reporting interventions are effective or whether they reinforce negative stereotypes associated with mental illness. * Discusses the issues raised in accessing mental health treatment in regard to diminished treatment resources, barriers to access, and involuntary commitment.* Explores novel interventions for addressing these issues from a multilevel and multidisciplinary public health perspective that does not stigmatize people with mental illness. This includes reviews of suicide risk assessment; increasing treatment engagement; legal, social, and psychiatric means of restricting access to firearms when people are in crisis; and, when appropriate, restoration of firearm rights. Mental health clinicians and trainees will especially appreciate the risk assessment strategies presented here, and mental health, public health, and public policy researchers will find *Gun Violence and Mental Illness* a thoughtful and thought-provoking volume that eschews sensationalism and embraces serious scholarship.

Bond is back with a license to thrill. Forty-three years ago, Ian Fleming wrote his last great 007 adventure. Now, in *Devil May Care*, the world's most iconic spy returns in a Cold War story spanning the world's exotic locations. By invitation of the Fleming estate to mark the centenary of his birth, acclaimed novelist Sebastian Faulks picks up where Fleming left off, writing a tour de force that will electrify every James Bond fan. A fitting tribute to the Bond tradition, *Devil May Care* stands on its own as a triumph of witty prose and plenty of double-0 action. "In his house in Jamaica, Ian Fleming used to write a thousand words in the morning, then go snorkeling, have a cocktail, lunch on the terrace, more diving, another thousand words in the late afternoon, then more martinis and glamorous women. In my house in London, I followed this routine exactly, apart from the cocktails, the lunch, and the snorkeling." —Sebastian Faulks

Sig Hansen has been a star of the Channel 4's *The Deadliest Catch* from the pilot to the present. Seen in over 150 countries, the show attracts more than 49 million viewers per season, making it one of the most successful series in the history of cable TV. With its daredevil camera work, unpredictably dangerous weather, and a setting as unforgivable and unforgettable as the frigid Bering Sea, *The Deadliest Catch* is unlike anything else on television. But the weatherworn fishermen of the fishing vessel *Northwestern* have stories that don't come through on TV. For Sig Hansen and his brothers, commercial fishing is as much a part of their Norwegian heritage as their names. Descendants of the Vikings who roamed and ruled the northern seas for centuries, the Hansens' connection to the sea stretches from Alaska to Seattle and all the way to Norway. And after twenty years as a skipper on the commercial fishing vessel the *Northwestern*-- which was his father's before him -- Sig has lived to tell the tales. To be a successful fisherman, you need to be a mechanic, navigator, welder, painter, carpenter, and sometimes, a firefighter. To be a successful fisherman year after year, you need to be a survivor. This is the story of a family of survivors; part memoir and part adventure tale, *North by Northwestern* brings readers on deck, into the dockside bars and into the history of a family with a common destiny. Built around a gripping tale of a deadly shipwreck like *The Perfect Storm*, *North by Northwestern* is the multi-generational tale of the Hansen family, a clan of tough Norwegian-American fishermen who, through the popularity of *The Deadliest Catch*, have become modern folk-heroes.

While the PP and PPK were intended for police work, the Walther P 38 was produced for the Germany military; all three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP (Polizeipistole), a double-action semi-automatic pistol intended for the

law-enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931. Intended to replace the P 08 Luger, the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II, but never entirely replaced the Luger in German service. All three pistols went on to have lengthy and varied service across the world after 1945. Both the PP and the PPK remain in production today, while the P 38 re-emerged as the P1 and equipped West German forces from 1963 until 2004, when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants, such as the tiny .25 ACP Modell 9.

Def Leppard have stayed together through all the disasters that have occurred. They lost their first guitarist to alcoholism. Next, their drummer lost his arm in a car crash, and took four years to learn how to play one-handedly. Then guitarist Steve Clarke died of a drink and drug overdose in 1991, after which the group kept a low profile. Def Leppard reappeared at the Freddie Mercury concert at Wembley, gleaned a multi-platinum CD in "Adrenalize" and finished their 1994 tour with a huge open air show at the Don Valley Stadium in their home town of Sheffield. Biographize traces Def Leppard's story from their formation in the late 1970's to their current status as a best-selling band.

Quotes, maxims, short stories to provoke thought and give tired warrior's purpose and direction. The author is the founder of the website Spotterup.com. Spotter Up has 35+ writers who are accomplished former or active duty members of the Special Operations community (Green Berets, Navy SEALs, Rangers, Marine Scout Snipers, S.W.A.T, etc.), master-level shooters, special agents, case officers, athletes, and outdoor enthusiasts who like to share their knowledge with anyone interested in learning more about subjects such as fitness, nutrition, shooting, martial arts, mindset, survival, and far more. The writers of Spotter Up have completed nearly 900+ gear reviews on subjects such as: footwear, body, tactical clothing, armor, optics, and firearms and is known as a credible site for its opinions by the tactical industry. Spotter Up is about "spotting" a problem and coming up with solutions. Spotter Up promotes the idea of the classical "whole" man found in ancient texts. For our modern day he is a person who aspires to be the GUNFIGHTER, WRITER, WILDMAN, MONK: Man of Action, Man of Intellect, Man of Emotion, Man of Spirit. Consider the Athenian ideal of a balanced education from the book *Greek Realities: Life and Thought in Ancient Greece*, By Finley Hooper "They could play some flute but should not neglect wrestling. They avoided the excesses of life. They might focus on music or philosophy but spent enough time so that their bodies did not become soft." Spotter Up is for anyone, whether they are military, law-enforcement, emergency response or not, that is searching for ways to become more well-rounded. *We Fight Monsters* is a collection of quotes, maxims, poems and more written and posted by the author originally on Instagram, over a four-year period of time, as a way to provoke thought, and simultaneously inspire men and women. The author of *We Fight Monsters* hopes it helps readers transcend the ordinary world by relishing the unexpected. The book was written because many of the followers of Spotter Up's social media sites stated, "the writing got me through some very hard times." The cover illustration is based off the Greek Hydra and the Hercules myth. Man has an internal struggle after he's battled a beast, and sometimes he must battle the beast within himself. He isn't a demigod. He's just a regular Joe who is a hero to many, that lives to win against evil. Maybe he's a Marine who did several deployments and lost some friends, maybe she's a cop fighting crime on the streets. The illustration symbolizes the brotherhood of man, (men and women), that fight the good fight despite experiencing PTSD, physical injuries, loss of friends, lovers etc. "WE FIGHT MONSTERS. I'm not afraid of anything in this world that's been seen. I have scars on the inside. My badges of honor. There's a light inside my heart; it's for others to see. I live to show the way to those lost and in pain. And you? Walk with magnificence. Cock of the walk. Lead the way or follow those who use their pain to fight monsters and the injustices in this world" ~Michael Kurcina.

Future Weapons Penguin

A "well-researched and very readable new biography" (*The Wall Street Journal*) of "the Thomas Edison of guns," a visionary inventor who designed the modern handgun and whose awe-inspiring array of firearms helped ensure victory in numerous American wars and holds a crucial place in world history. Few people are aware that John Moses Browning—a tall, humble, cerebral man born in 1855 and raised as a Mormon in the American West—was the mind behind many of the world-changing firearms that dominated more than a century of conflict. He invented the design used in virtually all modern pistols, created the most popular hunting rifles and shotguns, and conceived the machine guns that proved decisive not just in World Wars I and II but nearly every major military action since. Yet few in America knew his name until he was into his sixties. Now, author Nathan Gorenstein brings firearms inventor John Moses Browning to vivid life in this riveting and revealing biography. Embodying the tradition of self-made,

self-educated geniuses (like Lincoln and Edison), Browning was able to think in three dimensions (he never used blueprints) and his gifted mind produced everything from the famous Winchester "30-30" hunting rifle to the awesomely effective machine guns used by every American aircraft and infantry unit in World War II. The British credited Browning's guns with helping to win the Battle of Britain. His inventions illustrate both the good and bad of weapons. Sweeping, lively, and brilliantly told, this fascinating book that "gun collectors and historians of armaments will cherish" (Kirkus Reviews) introduces a little-known legend whose impact on history ranks with that of the Wright Brothers, Thomas Edison, and Henry Ford.
