Focus: Music of Northeast Brazil examines the historical and contemporary manifestations of the music of Brazil, a country with a musical landscape that is layered with complexity and diversity. Based on the author's field research during the past twenty years, the book describes and analyzes the social/historical contexts and contemporary musical practices of Afro-Brazilian religion, selected Carnival traditions, Bahia's black cultural renaissance, the traditions of rural migrants, and currents in new popular music. Part One, Understanding Music in Brazil, presents important issues and topics that encompass all of Brazil, and provides a general survey of Brazil's diverse musical landscape. Part Two, Creating Music in Brazil, presents historical trajectories and contemporary examples of Afro-Brazilian

traditions, Carnival music, and northeastern popular music. Part Three, Focusing In, presents two case studies that explore the ground-level activities of contemporary musicians in Northeast Brazil and the ways in which they move between local, national, and international realms. The accompanying downloadable resources offer vivid musical examples that are discussed in the text

This book sheds light on the integration processes and identity patterns of Angolan, Brazilian and Eastern European communities in Portugal. It examines the privileged position that immigrant organisations hold as interlocutors between the communities they represent and various social service mechanisms operating at national and local levels. Through the collection of ethnographic data and the realisation of 110 interviews with community insiders and middlemen, culled over a year's time, Joo Sardinha provides insight into how the three groups are perceived by their respective associations and representatives. Following up on the rich data is a discussion of strategies of coping with integration and identity in the host society and reflections on Portuguese social and community services and institutions.

The conventions of the nation-state have shaped our contemporary understanding of the process and politics of social movements. Keck and Sikkink sketch for the first time the dynamics of emergence, strategies, and impact of activists from different nationalities working together on particular issues. This eagerly awaited work will alter the way scholars conceptualize the making of international society and the practice of international politics.

'This extraordinary collection is a game-changer. Featuring the cutting-edge work of over forty scholars from across the globe, The Routledge Handbook of the Global Sixties is breathtaking in

its range, incisive in analyses, and revolutionary in method and evidence. Here, fifty years after that iconic "1968," Western Europe and North America are finally de-centered, if not provincialized, and we have the basis for a complete remapping, a thorough reinterpretation of the "Sixties.'" —Jean Allman, J.H. Hexter Professor in the Humanities; Director, Center for the Humanities, Washington University in St. Louis 'This is a landmark achievement. It represents the most comprehensive effort to date to map out the myriad constitutive elements of the "Global Sixties" as a field of knowledge and inquiry. Richly illustrated and meticulously curated, this collection purposefully "provincializes" the United States and Western Europe while shifting the loci of interpretation to Africa, the Middle East, Asia, and Latin America. It will become both a benchmark reference text for instructors and a gateway to future historical research.' —Eric Zolov, Associate Professor of History; Director, Latin American & Caribbean Studies, Stony Brook University 'This important and wide-ranging volume de-centers West-focused histories of the 1960s. It opens up fresh and vital ground for research and teaching on Third, Second, and First World transnationalism(s), and the many complex connections, tensions, and histories involved.' —John Chalcraft, Professor of Middle East History and Politics, Department of Government, London School of Economics and Political Science 'This book globalizes the study of the 1960s better than any other publication. The authors stretch the standard narrative to include regions and actors long neglected. This new geography of the 1960s changes how we understand the broader transformations surrounding protest, war, race, feminism, and other themes. The global 1960s described by the authors is more inclusive and relevant for our current day. This book will influence all future research and teaching about the postwar world.' —Jeremi Suri, Mack Brown Distinguished Chair for Leadership in Global Affairs; Professor of Public Affairs and History, The University of Texas at Austin As the fiftieth anniversary of 1968 approaches, this book reassesses the global causes, themes, forms, and legacies of that tumultuous period.

While existing scholarship continues to largely concentrate on the US and Western Europe, this volume will focus on Asia, Africa, the Middle East, and Eastern Europe. International scholars from diverse disciplinary backgrounds explore the global sixties through the prism of topics that range from the economy, decolonization, and higher education, to forms of protest, transnational relations, and the politics of memory.

Husserl and Spatiality is an exploration of the phenomenology of space and embodiment, based on the work of Edmund Husserl. Little known in architecture, Husserl's phenomenology of embodied spatiality established the foundations for the works of later phenomenologists, including Maurice Merleau-Ponty's well-known phenomenology of perception. Through a detailed study of his posthumously published and unpublished manuscripts on space, DuFour examines the depth and scope of Husserl's phenomenology of space. The book investigates his analyses of corporeity and the "lived body," extending to questions of intersubjective, intergenerational, and geo-historical spatial experience, what DuFour terms the "environmentality" of space. Combining in-depth architectural philosophical investigations of spatiality with a rich and intimate ethnography, Husserl and Spatiality speaks to themes in social and cultural anthropology, from a theoretical perspective that addresses spatial practice and experience. Drawing on fieldwork in Brazil, DuFour develops his

analyses of Husserl's phenomenology through spatial accounts of ritual in the Afro-Brazilian religion of Candomblé. The result is a methodological innovation and unique mode of spatial description that DuFour terms a "phenomenological ethnography of space." The book's profoundly interdisciplinary approach makes an incisive contribution relevant to academics and students of architecture and architectural theory, anthropology and material culture, and philosophy and environmental aesthetics.

 "In this book, Roberto Saba investigates how the antislavery struggle led Brazil and the United States to cooperate, and how this dynamic collaboration helped establish capitalism and free wage labor as the norm in the Western world. Drawing on overlooked writings from entrepreneurs, scientists, planters, Confederate refugees in Brazil, and journalists, Saba's extensive research reveals that while United States Southerners terrified Brazil with aggressive projects to perpetuate and expand slave labor, reform-minded Brazilians-including slaveholders looked to the American North as a powerful instrument of state- and nation-building. They welcomed advocates from the northern United States who helped them to spread labor-saving machinery, expand large-scale coffee production, advance technical education, diversify economic activities, develop urban centers, and expand transportation infrastructure. Saba shows that the binational collaboration of radical modernizers in the United States and Brazil transformed the political economy of both

countries, consolidated wage labor as the dominant production system in the Western hemisphere, and laid the groundwork for the demise of Brazilian slavery and the expansion of American capitalism"--

An exploration of the innovative, quintessentially Brazilian painter who merged modernism with the brilliant energy and culture of her homeland Tarsila do Amaral (1886-1973) was a central figure at the genesis of modern art in her native Brazil, and her influence reverberates throughout 20th- and 21st-century art. Although relatively little-known outside Latin America, her work deserves to be understood and admired by a wide contemporary audience. This publication establishes her rich background in European modernism, which included associations in Paris with artists Fernand Léger and Constantin Brancusi, dealer Ambroise

Vollard, and poet Blaise Cendrars. Tarsila (as she is known affectionately in Brazil) synthesized avant-garde aesthetics with Brazilian subjects, creating stylized, exaggerated figures and landscapes inspired by her native country that were powerful emblems of the Brazilian modernist project known as Antropofagia. Featuring a selection of Tarsila's major paintings, this important volume conveys her vital role in the emerging modern-art scene of Brazil, the community of artists and writers (including poets Oswald de Andrade and Mário de Andrade) with whom she explored and developed a Brazilian modernism, and how she was subsequently embraced as a national cultural icon. At the same time, an analysis of Tarsila's legacy questions traditional perceptions of the 20th-century art world and asserts the significant role that Tarsila and others in Latin America had in shaping the global trajectory of modernism.
