 Il termine yoga è di vasta portata: oggi è presente non solo nella cultura asiatica, ma in quella di tutti i continenti, e capire cosa significhi è una priorità poiché esso viene spesso usato per indicare attività che con lo yoga hanno poco a che fare. In questa indagine non si può prescindere dagli Yogasūtra di Patañjali, che sono il principale testo filosofico di riferimento dello yoga contemporaneo. Studiando gli Yogasūtra, ci si imbatte nella teoria dei kleśa, il cuore dell'insegnamento di Patañjali, secondo cui yoga, lungi dal significare "esecuzione di posture", è un metodo che libera l'individuo dalla sofferenza, la cui origine risiede in cinque affezioni mentali, appunto i kleśa: ignoranza, senso dell'io, attaccamento, repulsione e paura della morte. A una prima parte del libro, più tecnica, in cui si inquadra storicamente ed etimologicamente lo yoga cercando di far luce sui non semplici concetti chiave di questa disciplina, segue una sezione dal respiro più ampio, che cerca di comprendere le cinque affezioni mentali esposte negli Yogasūtra, anche abbracciando la lettura che di esse viene proposta negli altri testi classici della filosofia indiana, con fugaci rimandi alla filosofia occidentale e alle recenti scoperte neuroscientifiche e fisiche. La realtà non è così come ci appare. E questa erronea apparenza è la causa della nostra quotidiana sofferenza.

 For the last decade, early modern studies have significantly been reshaped by raising new and different questions on the uses of religion. This 'religious turn' has generated new discussion of the social processes at work in early modern Europe and their cultural effects - from the struggle over religious rites and doctrines to the persecution of secret adherents to forbidden practices. The issue of religious pluralisation has been mostly debated in terms of dissent and escalation. But confessional controversy did not always erupt into hostilities over how to symbolize and perform the sacred nor lead to a paralysis of social agency. The order of the day may often have been to suspend confessional allegiances rather than enforce religious conflict, suggesting a pragmatic rather than polemic handling of religious plurality. This raises the urgent question of how 'normal' transconfessional and even transreligious interaction was produced in a context of highly sharpened and always present reflexivity on religious differences. Our volume takes up this question and explores it from an interdisciplinary and interconfessional perspective. The title

"Forgetting Faith?" raises the question whether it was necessary or indeed possible to sidestep religious issues in specific contexts and for specific purposes. This does not mean, however, to describe early modern culture as a process of secularization. Rather, the collection invites discussion of the specific ways available to deal with confessional conflict in an oblivional mode, precisely because faith still mattered more than many other social paradigms emerging at that time, such as nationhood, ethnic origin or class defined through property.

"A wide range of specialists provide a comprehensive overview of the reception of Pythagorean ideas in the Middle Ages and the Renaissance, shedding new light especially on the understudied 'Medieval Pythagoras' of the Latin West. They also explore the survival of Pythagoreanism in the Arabic, Jewish, and Persian cultures, thus adopting a multicultural perspective. Their common concern is to detect the sources of this reception, and to follow their circulation in diverse linguistic areas. The reader can thus have a panoramic view of the major themes belonging to the Pythagorean heritage - number philosophy and the sciences of the quadrivium; ethics and way of life ; theology, metaphysics and the soul - until the Early Modern times.  Negli anni Trenta, su La Civiltà Cattolica furono pubblicati alcuni articoli sul tema dell'islam. Fu lo stesso Papa Pio XI a commissionarli, convinto che fosse necessario studiare a fondo la lingua, la religione, i costumi, il modo di pensare dei musulmani. La redazione di questi articoli fu affidata a un gesuita missionario in Albania, il quale aveva non solamente una solida competenza in materia, ma conosceva anche direttamente il mondo e la cultura islamica: era padre Giovanni Fausti, convinto sostenitore di un «Vangelo dialogante», inserito nella fede e nella cultura del popolo. Le intuizioni sul dialogo tra islam e cristianesimo,

teorizzate da questo uomo di frontiera, possono essere un terreno privilegiato per cementare il dialogo interreligioso, anche oggi, specialmente alla luce del pontificato di Papa Francesco. Certamente gli articoli che adesso ripubblichiamo (preceduti e illustrati da un saggio di padre Giovanni Sale) fanno parte di un capitale di sapienza che può aiutarci a vivere meglio il momento presente con tutte le sue tensioni e le sue sfide (dalla Prefazione di Antonio Spadaro).

 The aesthetic changes in late Roman literature speak to the foundations of modern Western culture. The dawn of a modern way of being in the world, one that most Europeans and Americans would recognize as closely ancestral to their own, is to be found not in the distant antiquity of Greece nor in the golden age of a Roman empire that spanned the Mediterranean, but more fundamentally in the original and problematic fusion of Greco-Roman culture with a new and unexpected foreign element-the arrival of Christianity as an exclusive state religion. For a host of reasons, traditionalist scholarship has failed to give a full and positive account of the formal, aesthetic and religious transformations of ancient poetics in Late Antiquity. The Poetics of Late Latin Literature attempts to capture the excitement and vibrancy of the living ancient tradition reinventing itself in a new context in the hands of a series of great Latin writers mainly from the fourth and fifth centuries AD. A series of the most distinguished expert voices in later Latin poetry as well as some of the most exciting new scholars have been specially commissioned to write new papers for this volume.

 This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.

A lively debate is currently being conducted in the social sciences around the concepts of "tribe", "segmentary societies" and "Islam in society". This wide-ranging collection by thirteen distinguished anthropologists contributes to the debate by examining various segmentary Islamic tribal societies from Morocco to Pakistan.

 Europe (in Theory) is an innovative analysis of eighteenth- and

nineteenth-century ideas about Europe that continue to inform thinking about culture, politics, and identity today. Drawing on insights from subaltern and postcolonial studies, Roberto M. Dainotto deconstructs imperialism not from the so-called periphery but from within Europe itself. He proposes a genealogy of Eurocentrism that accounts for the way modern theories of Europe have marginalized the continent's own southern region, portraying countries including Greece, Italy, Spain, and Portugal as irrational, corrupt, and clan-based in comparison to the rational, civic-minded nations of northern Europe. Dainotto argues that beginning with Montesquieu's *The Spirit of Laws* (1748), Europe not only defined itself against an "Oriental" other but also against elements within its own borders: its South. He locates the roots of Eurocentrism in this disavowal; internalizing the other made it possible to understand and explain Europe without reference to anything beyond its boundaries. Dainotto synthesizes a vast array of literary, philosophical, and historical works by authors from different parts of Europe. He scrutinizes theories that came to dominate thinking about the continent, including Montesquieu's invention of Europe's north-south divide, Hegel's "two Europes," and Madame de Staël's idea of opposing European literatures: a modern one from the North, and a pre-modern one from the South. At the same time, Dainotto brings to light counter-narratives written from Europe's margins, such as the Spanish Jesuit Juan Andrés's suggestion that the origins of modern European culture were eastern rather than northern and the Italian Orientalist Michele Amari's assertion that the South was the cradle of a social democracy brought to Europe via Islam.

Gli autori propongono una visione multidisciplinare che integra settori apparentemente lontani fra loro ma uniti dal tema della globalizzazione. Il volume raccoglie contributi di Economia, Giurisprudenza, Agraria, Ingegneria, Medicina, Farmacia, Biologia e Scienze della Terra. I diversi capitoli forniscono uno sguardo d'insieme sul tema della globalizzazione in maniera accessibile a tutti coloro che desiderano conoscere meglio la realtà dei nostri giorni senza rassegnarsi ad accettarne gli aspetti negativi.

Religious Narratives in Italian Literature after the Second Vatican Council Castelvecchi

"Many famous artworks of the Italian Renaissance were made to celebrate love, marriage, and family. They were the pinnacles of a tradition, dating from early in the era, of commemorating betrothals, marriages, and the birth of children by commissioning extraordinary objects - maiolica, glassware, jewels, textiles, paintings - that were often also exchanged as gifts. This volume is

the first comprehensive survey of artworks arising from Renaissance rituals of love and marriage and makes a major contribution to our understanding of Renaissance art in its broader cultural context. The impressive range of works gathered in these pages extends from birth trays painted in the early fifteenth century to large canvases on mythological themes that Titian painted in the mid-1500s. Each work of art would have been recognized by contemporary viewers for its prescribed function within the private, domestic domain."--BOOK JACKET.

The Indian religion of Jainism, whose central tenet involves non-violence to all creatures, is one of the world's oldest and least-understood faiths. Dundas looks at Jainism in its social and doctrinal context, explaining its history, sects, scriptures and ritual, and describing how the Jains have, over 2500 years, defined themselves as a unique religious community. This revised and expanded edition takes account of new research into Jainism.

In time for the one hundred and fiftieth anniversary of his birth, a specially curated collection of Mahatma Gandhi's writings on nonviolent resistance and activism. A Penguin Classic The year 2019 marks the 150th anniversary of Mohandas Karamchand (Mahatma) Gandhi's birth, and Penguin Classics presents a short but comprehensive selection of text by Gandhi that speaks to non-violent civil disobedience and activism. In excerpts drawn from his books, letters, and essays--including from *Hind Swaraj*, *Satyagraha in South Africa*, *Yeravda Mandir*, *Ashram Observances in Action*, his readings of Thoreau and Tolstoy, and his essays on the life of Socrates--the reader observes the power and eloquence in which Gandhi expressed his views on non-violent resistance, which have inspired activists from the U.S. Civil Rights movement and around the world. *The Power of Nonviolent Resistance* includes a new introduction and suggestions for further exploration by renowned Gandhi scholar Tridip Suvrud, which gives context to the time of Gandhi's writings while placing them

firmly into the present-day political climate, inspiring a new generation of activists to follow the civil rights hero's teachings and practices.

Dalla medicina tradizionale cinese ai tempi islamici medievali EDT srl

La medicina tradizionale cinese è una branca della medicina tradizionale che si dice sia basata su oltre 3, 500 anni di pratica medica cinese che comprende varie forme di fitoterapia, agopuntura, terapia a coppa, gua sha, massaggio (tui na), bonesetter(die-da), esercizio (qigong) e terapia dietetica, ma recentemente influenzato anche dalla moderna medicina occidentale. La medicina islamica preservò, sistematizzò e sviluppò le conoscenze mediche dell'antichità classica, comprese le principali tradizioni di Ippocrate, Galeno e Dioscoride. Durante l'era post-classica, la medicina islamica era la più avanzata al mondo, integrando i concetti della medicina antica greca, romana e persiana e l'antica tradizione indiana dell'Ayurveda, facendo al contempo numerosi progressi e innovazioni. La medicina islamica, insieme alla conoscenza della medicina classica, fu in seguito adottata nella medicina medievale dell'Europa occidentale, dopo che i medici europei acquisirono familiarità con gli autori medici islamici durante il Rinascimento del XII secolo.

Poesia Penguin

Dopo aver riflettuto nei precedenti volumi sul possibile percorso individuale verso una libera adesione al messaggio evangelico (in "Fede Laica") e sulla grande influenza da esso esercitata - fra smaglianti luci e pesanti ombre - nella storia del mondo (ne "La Perla dai mille riflessi"), il presente lavoro conclude la trilogia con uno sguardo sui principali sentieri religiosi dell'umanità e sui gravi conflitti generati dai loro irremovibili valori fondanti. Conflitti tanto più sorprendenti in quanto i viandanti impegnati a raggiungere per diversi sentieri la medesima unica vetta non dovrebbero contrapporsi tra loro ma procedere con saggezza accumulati nell'impegno di superare le asperità teologiche, storiche e culturali generate da fanatismi, strumentalizzazioni e rivalità spesso gonfiate a fini di potere. Ciò, specialmente nell'attuale fase storica caratterizzata dall'inedita mescolanza di popoli, etnie e religioni prodotta dall'inarrestabile processo di globalizzazione dei mercati e delle culture. Come per i precedenti volumi, anche in questo lavoro si è cercato di privilegiare la chiarezza espositiva rifuggendo dalla retorica e non ignorando ma evidenziando e affrontando dubbi e contraddizioni con ampi riferimenti alle diversificate visioni dei pensatori e teologi di ogni tempo.
