Dr Edward de Bono, founder of lateral thinking, has changed the way countless Australians - young and old - think. Rethink explores how de Bono unique thinking tools and training courses have influenced Australian businesses, organisations, schools and communities. A passionate advocate for transformational change in education, the book also looks at de Bono influence on the Australian education system. Both biographical and instructive, Rethink shows de Bono's fondness for, and contribution to, Australia, where he has been a regular visitor since 1972. It also includes details on the work of the de Bono Institute, the Melbourne-based not-for-profit group that represents Edward de Bono in Australia. Rethink demonstrates how de Bono's tools and techniques can be used to: * generate creativity, fresh new ideas and better solutions * increase productivity * encourage teamwork and dispute resolution * improve effectiveness of meetings.

[How to Have Creative Ideas](#) McGraw Hill Professional

Traditional thinking habits of businesses need to be greatly improved. Analysis and judgement are no longer enough to make important corporate decisions; you can analyse the past but you have to design the future. Corporate decisions depend on values. Disputes and conflicts often arise because of a clash of those values; each party in the dispute wants to pursue its own values, often at the expense of the other party. It is therefore essential that companies, managers and employees have a full understanding of the values of everyone involved to design a way forward that benefits all parties. From the bestselling author of How to Have a Beautiful Mind and Six Thinking Hats, this groundbreaking business book provides a basis for value assessment, an essential tool in decision-making for 21st century corporations. De Bono demonstrates that values come into all areas of thinking, behaviour and decision-making and outlines a framework to focus employees' attention on a variety of values including human values, organisational values, cultural values and perceptual values. By introducing a scoring system to rate different values as strong, sound, weak or remote de Bono helps readers to prioritise and make executive decisions that count.

Our happiness and success depend on clear thinking. But too many of us are compromised by confusion, trying to do too much at once, and not knowing what to do next. In Teach Yourself to Think, Edward de Bono shows that good thinking depends on a simple five-stage process that anyone can learn. It will enable you to assess your goals, sort available information, identify the available choices, make a decision and, finally, turn thought into action. This book offers brilliant advice for anyone who needs to be able to respond to and deal with a vast range of situations at work and in life quickly, efficiently and intelligently.

The classic work about meetings and decision-making. Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles have been adopted by businesses and governments around the world,

ending conflict and confusion in favour of harmony and productivity. The Six Hats strategy will fundamentally change the way you work and interact. 'An inspiring man with brilliant ideas. De Bono never ceases to amaze with his clarity of thought.' Sir Richard Branson

Edward de Bono invented the concept of lateral thinking. A world-renowned writer and philosopher, he is the leading authority in the field of creative thinking and the direct teaching of thinking as a skill. Dr de Bono has written more than 60 books, in 40 languages, with people now teaching his methods worldwide. He has chaired a special summit of Nobel Prize laureates, and been hailed as one of the 250 people who have contributed most to mankind.

Tap into your Creative potential Creativity was once thought to be a talent bestowed upon a lucky few. Today it is understood as a skill that we can all learn, develop and apply. And in today's economy--with information available to everyone and support services outsourced overseas - creativity is the most valuable asset you can possess and the ...

The 2,000 Percent Solution Crisp Pub Incorporated

In Practical Thinking de Bono's theme is everyday thinking, how the mind actually works - not how philosophers think it should. Based on the results of his famous Black Cylinder Experiment (a critical thinking task that asks participants why they think a black cylinder falls over), de Bono explores the four practical ways of being right. From there he picks out and names the five levels of understanding - and the five major mistakes in thinking. From memes and Instagram to twitter and bestselling books like Mistakes I Made At Work, mistakes - and what we can learn from them - are a hot topic. With Edward you'll learn exactly why we all make them.

[A Brief Guide for Teachers](#) Blackhall Publishing, Limited

Intended for business men and women as an aid to producing effective business strategy, this pack contains dozens of thought-provoking and enjoyable games, it is a step-by-step course in thinking for doing. It could also be an enjoyable thinking tool for families and schools. The pack contains a 96-page book Thinking for Action.

In schools we are taught to meet problems head-on: what Edward de Bono calls vertical thinking. This works well in simple situations but we are at a loss when this approach fails.

Lateral thinking is all about freeing up your imagination. Through a series of special techniques, in groups or working alone, Edward de Bono shows us how to look at problems from a variety of angles and in so doing offer up solutions that are as ingenious as they are effective. After reading this book you will become a much more productive and formidable thinker.

[How to be More Interesting](#) Wrightbooks

I Am Right, You Are Wrong is THE classic work about choice in business and in life from world-renowned writer and philosopher Edward de Bono. Most of our everyday decision-making tends to be confrontational. Whether in large meetings, one-to-one or even in our own heads, opposite view points are pitted against each other. Ultimately, there must be a winner and a loser. In I Am Right, You Are Wrong, lateral-thinking guru Edward de Bono challenges this 'rock logic' of rigid categories and point-scoring arguments which is both destructive and exhausting. Instead he reveals how we can all be winners. Clearer perception is the key to constructive thinking and more open-minded creativity. In overturning conventional wisdom, Edward de Bono will help you to

become a better thinker and decision maker. 'An inspiring man with brilliant ideas. De Bono never ceases to amaze with his clarity of thought' Sir Richard Branson

Is the way you think like the colour of your eyes something you are born with and cannot alter? Or is thinking a skill that can be improved with practice, like swimming, tennis or cooking?

The Six Value Medals Six Thinking Hats

People spend a fortune on their bodies, their faces, their hair, their clothes. Cosmetics, plastic surgery, diets, gym membership - everyone's trying to be more attractive. But there's an easier way to become a beautiful person. It doesn't have to be physical. No matter how you look, if you have a mind that's fascinating, creative, exciting - if you're a good thinker - you can be beautiful. And being attractive doesn't necessarily come from being intelligent or highly-educated. It isn't about having a great personality. It's about using your imagination and expanding your creativity. And it's when talking with people that we make the greatest impact. A person may be physically beautiful, but when speaking to others a dull or ugly or uncreative mind will definitely turn them off. In clear, practical language, de Bono shows how by applying lateral and parallel thinking skills to your conversation you can improve your mind. By learning how to listen, make a point, and manoeuvre a discussion, you can become creative and more appealing - more beautiful.

Critical and Creative Thinking: A Guide for Teachers reveals ways to develop a capacity to think both critically and creatively in practical and productive ways. Explains why critical and creative thinking complement each other with clear examples Provides a practical toolkit of cognitive techniques for generating and evaluating ideas using both creative and critical thinking Enriches the discussion of

creative and critical intersections with brief "inter-chapters" based on the thinking habits of Leonardo da Vinci Offers an overview of current trends in critical and creative thinking, with applications across a spectrum of disciplines

The Story of Edward De Bono in Australia Viking

Organizations, like people, are creatures of habit. They tend to approach problems in predictable ways. This revolutionary book argues that such ingrained habits, which often masquerade as efficient procedures, actually obstruct growth. The 2,000 Percent Solution introduces "stall busting," a process that shows you how to recognize typical stalls (like poor communications, disbelief, misconceptions, procrastination, tradition and bureaucracy) and how to overcome them. Through unorthodox examples ranging from the sinking of the Titanic to sketches attributed to Leonardo da Vinci for a bicycle, The 2,000 Percent Solution redirects knee-jerk reactions onto more productive paths. In addition, you'll learn about a new set of thought processes for designing and implementing solutions that will reap benefits 20 times greater or faster than the same tired "normal" solutions. Packed with specific examples, advice and questions to help you improve your organization's process weaknesses, you'll learn how to go beyond today's best practices into the uncharted realm of what needs to be imagined and accomplished. Since the first printing of this book in 1999, organizations all over the world have made The 2,000 Percent Solution a daily resource for overcoming the dual challenges of tough competitors and a difficult business environment. We are particularly pleased that the book has become popular in the rapidly growing and changing markets of China. Readers say the advice and examples are as timely today as when the book was first published. We look forward to hearing your comments and questions at mitchell@mitchellandco.com.
