A Gift of Hope from the Book of Revelation Oxford University Press, USA

'Hope for the Earth' explores the viability of an eschatological approach to an ecological theology, spirituality, and praxis in the South African context. The basic intuition of such an eschatological approach is that an environmental praxis can only be empowered on the basis of an adequate understanding of Christian hope. Despair in the face of environmental destruction

will inevitably lead to a spirit of resignation. Where, then, can a vision of hope that includes hope for the earth be found? The author proposes a road map for eschatology based on the observation that eschatology has traditionally responded to three aspects of the human predicament, namely 1) the evil effects of sin; 2) the problem of finitude and transience; and 3) the limitations of human power and knowledge in space (Part A). This analysis is used to fathom the depths of despair as a result of environmental destruction (Part B). The Biblical roots and subsequent history of Christian eschatology are discussed briefly (Part C). Recent contributions in Christian eschatology, ecological theology, cosmology, and South African expressions of hope are

explored in depth in search of a vision of hope that includes hope for the earth itself (Part D). The eschatological road map is used to develop a vision of hope for the earth on the basis of a theology of life: life amidst death and destruction, life beyond death and eternal life in the presence of God (Part E). Finally the implications of this vision for an ecological ethos, spirituality, and praxis in the South African context are indicated (Part F).

Facing the Dawn Anchor

Human history has been marked by the great number of people born into conditions of war, violence, oppression and social exclusion. But at the same time, this history has been shaped by the long struggle for human rights and the people who have committed themselves to the practices of solidarity and nonviolence. The *Power of Hope: Thoughts on Peace and Human Rights in the Third Millennium* is a dialogue between two high-profile activists and thinkers who discuss the concrete ways we can shift to a world that prioritises justice and human dignity. Adolfo Pérez Esquivel - Argentinian human rights activist and winner of the 1980 Nobel Peace Prize - played a vital role in resisting military dictatorship and was arrested and tortured under the Argentine militarist government. Daisaku Ikeda is a peacebuilder, Buddhist philosopher, educator, author and poet as well as being the founding president of Soka Gakkai International (SGI), the world's largest Buddhist lay organisation. Their dialogue intertwines their rich personal experiences in the struggle for human rights with wider reflections on how to make the Third Millennium the millennium of peace. The book combines rich accounts of Latin America under the brutality of the 1970s military regimes; insights from the Buddhist faith on the role of

meditation for human rights activists; recognition of the crucial role of women in the practice of nonviolence; thoughts on international geopolitics and the legacies of Hiroshima; and discussion of the perilous role of globalisation in the loss of identities and ethical values.

In a future so distant it looks like our past, Sevara has seen centuries come and go like so many sunrises and sunsets. After Sevara and a group of shapeshifting immortals guide humanity to peace, one final task remains - to give up their memories, and their immortality, and live one last life. All they have to do is sleep for ten thousands years, and forget. All the immortals keep their promise and give up their powers. Everyone that is, except Sevara. Sevara awakens to find that suffering and cruelty returned to the world, while all her friends have had their memories wiped clean. You'd think that being the only shapeshifting immortal would be a good thing. But Sevara soon finds that the memories of her mortal life infected humanity while she slept, and her very own past may destroy the future.

Based on interviews with family members, former associates, prominent historians, and never-before-seen papers written by Geneviève de Gaulle, *The General's Niece* is the first English-language biography of Charles de Gaulle's niece and daughter-figure, Geneviève. Journalist Paige Bowers leads readers through the remarkable life of this young woman who risked death to become one of the most devoted foot soldiers of the French Resistance. Beginning with small acts of defiance, she eventually

ferried arms and false transit letters to fellow résistants and distributed the nation's largest underground newspaper, until she was finally arrested and sent to the infamous Ravensbrück concentration camp. The General's Niece reveals the horrors the young de Gaulle witnessed and endured there that could have broken her spirit, but instead inspired her many remaining years of activism on behalf of former prisoners. Bowers details de Gaulle's later years, during which she continued to stand up for what was humane and just, participating in campaigns to help France's neediest citizens and to force the Germans to pay restitution to a group of Polish women on whom the Nazis had performed crippling experiments at Ravensbrück.

Only then does he begin to understand his calling—a calling no other man in the entire kingdom of Arrethtrae can fulfill—a calling given him by the King himself. Teamed with a young slave girl, Leinad is thrust into adversity and danger—for the Dark Knight and his vicious Shadow Warriors will stop at nothing to thwart the King’s plan to restore the kingdom. Leinad will need more than a sharp blade and a swift hand to fulfill his mission and survive the evil plots of the King’s sworn enemies! Journey to Arrethtrae, where the King and His Son implement a bold plan to save their kingdom; where courage, faith, and loyalty stand tall in the face of opposition; where good will not bow to evil—and the future of a kingdom lies in the hands of a young man. DISCUSSION QUESTIONS INCLUDED Story Behind the Book “When my six kids’ eyes glossed over during a reading from the Bible, I paused to explain the significance of redemption to a sin-sick soul. I was rewarded with patronizing elephant nods and more blank stares. Shortly thereafter, I awoke in the middle of the night with a medieval story enveloping my mind. I wrote it down and later read it to my children. Their waning attention transformed into complete anticipation. I was amazed and disappointed. Why did it take a fictional story, not a Bible passage, to get that response? Then I realized—that is how Jesus taught! Parables are powerful! I penned the Kingdom series to help young people get excited about the supremely significant story of Jesus Christ and His mission to save mankind.” — Chuck Black

"Dawn Mortenson moved to Fair Shore, Connecticut and within 24 hours of her arrival at Fair Shore High she realized that the town condoned the sexual assault of young girls. She alienated most of the population of the town after her confrontation with the All American football hero found him in the hospital. The ensuing battle landed many friends and foes in jail, the hospital or an early grave. Dawn uses music, the media, a team of young and old allies and a combination of personal courage and mental toughness to change the town's attitude toward the sexual abuse of young people forever, although at a huge personal cost."--

At the beginning of the twenty-first century, the vocabulary of civility and civilization is very much at the forefront of political debate. Most of these debates proceed as if the meaning of these words were self-evident. This is where *Civilizing Emotions* intervenes, tracing the history of the concepts of civility and civilization and thus adding a level of self-reflexivity to the present debates. Unlike previous histories, *Civilizing Emotions* takes a global perspective, highlighting the roles of civility and civilization in the creation of a new and hierarchized global order in the era of high imperialism and its entanglements with the developments in a number of well-chosen European and Asian countries. Emotions were at the core of the practices linked to the creation of a new global order in the nineteenth century. *Civilizing Emotions* explores why and how emotions were an asset in civilizing peoples and societies - their control and management, but also their creation and their ascription to different societies and social groups. The study is a contribution to the history of emotions, to global history, and to the history of

concepts, three rapidly developing and innovative research areas which are here being brought together for the first time.

Civilizing Emotions Michael Hanrahan Publishing

The New York Times Science Bestseller from Robert Wachter, Modern Healthcare's #1 Most Influential Physician-Executive in the US While modern medicine produces miracles, it also delivers care that is too often unsafe, unreliable, unsatisfying, and impossibly expensive. For the past few decades, technology has been touted as the cure for all of healthcare's ills. But medicine stubbornly resisted computerization - until now. Over the past five years, thanks largely to billions of dollars in federal incentives, healthcare has finally gone digital. Yet once clinicians started using computers to actually deliver care, it dawned on them that something was deeply wrong. Why were doctors no longer making eye contact with their patients? How could one of America's leading hospitals give a teenager a 39-fold overdose of a common antibiotic, despite a state-of-the-art computerized prescribing system? How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point? Logically enough, we've pinned the problems on clunky software, flawed implementations, absurd regulations, and bad karma. It was all of those things, but it was also something far more complicated. And far more interesting . . . Written with a rare combination of compelling stories and hard-hitting analysis by one of the nation's most thoughtful physicians, *The Digital Doctor* examines healthcare at the dawn of its computer age. It tackles the hard questions, from how technology is changing care at the bedside to whether government intervention has been

useful or destructive. And it does so with clarity, insight, humor, and compassion. Ultimately, it is a hopeful story. "We need to recognize that computers in healthcare don't simply replace my doctor's scrawl with Helvetica 12," writes the author Dr. Robert Wachter. "Instead, they transform the work, the people who do it, and their relationships with each other and with patients. . . . Sure, we should have thought of this sooner. But it's not too late to get it right." This riveting book offers the prescription for getting it right, making it essential reading for everyone – patient and provider alike – who cares about our healthcare system.

Voyages of Hope Barbour Pub Incorporated

Hope: what it can do, means you must not give up and those in Christ should not be afraid of the temporary pains they faced through loyalty to God's word. I believe strongly that everyone on this planet earth can change from worst attitude to the best and be useful in the kingdom of God. Our hope in Our Lord Jesus's coming back heals all our pain and focus our minds on the glories and joys ahead. We are living in a world full of frustrations, distrust, dishonest, faithless, sorrowful, unpredictable and a world where Jesus Christ's name is gradually removed from public places like schools and becoming irrelevant in the mind of our rulers both (political and religious). A world where religious leaders supported things that Christ hates and preaches against while on earth. A world where the church powers over evil and wickedness is shut down by ruler's laws and bars and sexy clubs etc are encouraged to increase. Unless you have a personal hope in God you cannot survive in the midst of these wickedness. We are living in a generation of scams, a generation of anger, a generation of vampires and murderers. A generation that prefers evil

to peaceful co-existence and harmony and a generation where the Saints in Christ are without a genuine shepherd. The book points us to God's hope alone to produce results, and to know the facts and the truth about Jesus Christ for us to be established and bear fruits. We should hope in God's words, his promises and power to provide remedies to our sufferings, pains and human sorrows. This book points to us the need to serve God, believe in Him, and to put all our hope on His holy begotten Son – Jesus Christ.

Dawn of Hope Wizards of the Coast

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful

critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

One girl, proposed to on the spot, accepted equally quickly and left town with her new husband. Why did these women leave everything behind in England and come to the west coast? Neither a commentary on the book of Revelation nor a devotional work -- though it offers aspects of both -- Joy in Our Weakness is instead a theological and practical guide that ushers readers into the very presence of Christ and His Lordship over the powers of evil. Marva Dawn writes compassionately for those who suffer, for

this book was born out of her own struggles with physical limitations and chronic illness, and it is intended to help the whole Church learn how to find joy in every circumstance of life, especially in trials and sufferings. After outlining some important foundational principles in three introductory chapters, Dawn guides readers through the whole book of Revelation, pointing out the errors of those who try to calendarize the end of the world and instead delineating how The Revelation reveals Christ's Lordship, exposes the workings of the powers, and sustains those who suffer until evil is ultimately defeated. Now thoroughly revised for a wider readership, Joy in Our Weakness highlights The Revelation's original purpose -- to comfort afflicted, suffering believers -- and spells out a biblically grounded "theology of weakness," offering a rare gift to the Church today. A wealth of insight and encouragement truly awaits the readers of these pages.
