EDWARD KARSYN

Overcoming Our Racism Henry Holt and Company (BYR)

An intersectional history of the shared struggle for African American and Latinx civil rights Spanning more than two hundred years, *An African American and Latinx History of the United States* is a revolutionary, politically charged narrative history, arguing that the “Global South” was crucial to the development of America as we know it.

Scholar and activist Paul Ortiz challenges the notion of westward progress as exalted by widely taught formulations like “manifest destiny” and “Jacksonian democracy,” and shows how placing African American, Latinx, and Indigenous voices unapologetically front and center transforms US history into one of the working class organizing against imperialism. Drawing on rich narratives and primary source documents, Ortiz links racial segregation in the Southwest and the rise and violent fall of a powerful tradition of Mexican labor organizing in the twentieth century, to May 1, 2006,

known as International Workers' Day, when migrant laborers—Chicana/os, Afrocubanos, and immigrants from every continent on earth—united in resistance on the first “Day Without Immigrants.” As African American civil rights activists fought Jim Crow laws and Mexican labor organizers warred against the suffocating grip of capitalism, Black and Spanish-language newspapers, abolitionists, and Latin American revolutionaries coalesced around movements built between people from the United States and people from Central America and the Caribbean. In stark contrast to the resurgence of “America First” rhetoric, Black and Latinx intellectuals and organizers today have historically urged the United States to build bridges of solidarity with the

nations of the Americas. Incisive and timely, this bottom-up history, told from the interconnected vantage points of Latinx and African Americans, reveals the radically different ways that people of the diaspora have addressed issues still plaguing the United States today, and it offers a way forward in the continued struggle for universal civil rights. 2018 Winner of the PEN Oakland/Josephine Miles Literary Award

 "The field of elementary social studies is a specific space that has historically

been granted unequal value in the larger arena of social studies education and research. This reader stands out as a collection of approaches aimed specifically at teaching controversial issues in elementary social studies. This book challenges social studies education (i.e., classrooms, teacher education programs, and research) to engage controversial issues--those topics with opposing, often politically, religiously, or are otherwise ideologically charged which make people, especially teachers, uncomfortable--in profound ways at the elementary level. This reader, meant for elementary educators and social studies teacher educators offers an innovative vision from a new generation of social studies teacher educators and researchers fighting against the forces of

neoliberalism and the marginalization of our field. The reader is organized into three sections: 1) pushing the boundaries of how the field talks about elementary social studies, 2) elementary social studies teacher education, and 3) elementary social studies teaching and learning. Individual chapters either A) conceptually unpack a specific controversial issue (e.g. Islamophobia, Indian Boarding Schools, LGBT issues in schools) and how that issue should be/are incorporated in an elementary social studies methods courses and classrooms or B) present research on elementary preservice teachers' or how elementary teachers and students engage controversial issues. This reader unpacks specific controversial issues for elementary social studies for readers to

gain critical content knowledge, teaching tips, lesson ideas, and recommended resources"--

The Story of an American Family

Routledge

Newly updated: "An enjoyable introduction to American working-class history." —The American Prospect Praised for its "impressive even-handedness", From the Folks Who Brought You the Weekend has set the standard for viewing American history through the prism of working people (Publishers Weekly, starred review). From indentured servants and slaves in seventeenth-century Chesapeake to high-tech workers in contemporary Silicon Valley, the book "[puts] a human face on the people, places, events, and social conditions that have shaped the

evolution of organized labor", enlivened by illustrations from the celebrated comics journalist Joe Sacco (Library Journal). Now, the authors have added a wealth of fresh analysis of labor's role in American life, with new material on sex workers, disability issues, labor's relation to the global justice movement and the immigrants' rights movement, the 2005 split in the AFL-CIO and the movement civil wars that followed, and the crucial emergence of worker centers and their relationships to unions. With two entirely new chapters—one on global developments such as offshoring and a second on the 2016 election and unions' relationships to Trump—this is an "extraordinarily fine addition to U.S. history [that] could become an evergreen . . . comparable to Howard

Zinn's award-winning *A People's History of the United States*" (Publishers Weekly). "A marvelously informed, carefully crafted, far-ranging history of working people." —Noam Chomsky
A Multicultural History of America in World War II Fighting for Justice
The inequalities that persist in America have deep historical roots. Evelyn Nakano Glenn untangles this complex history in a unique comparative regional study from the end of Reconstruction to the eve of World War II. During this era the country experienced enormous social and economic changes with the abolition of slavery, rapid territorial expansion, and massive immigration, and struggled over the meaning of free labor and the essence of citizenship as people who previously had been

excluded sought the promise of economic freedom and full political rights. After a lucid overview of the concepts of the free worker and the independent citizen at the national level, Glenn vividly details how race and gender issues framed the struggle over labor and citizenship rights at the local level between blacks and whites in the South, Mexicans and Anglos in the Southwest, and Asians and haoles (the white planter class) in Hawaii. She illuminates the complex interplay of local and national forces in American society and provides a dynamic view of how labor and citizenship were defined, enforced, and contested in a formative era for white-nonwhite relations in America.

THE WORDS WE LIVE BY takes an entertaining and informative look at

America's most important historical document, now with discussions on new rulings on hot button issues such as immigration, gay marriage, gun control, and affirmative action. In THE WORDS WE LIVE BY, Linda Monk probes the idea that the Constitution may seem to offer cut-and-dried answers to questions regarding personal rights, but the interpretations of this hallowed document are nearly infinite. For example, in the debate over gun control, does "the right of the people to bear arms" as stated in the Second Amendment pertain to individual citizens or regulated militias? What do scholars say? Should the Internet be regulated and censored, or does this impinge on the freedom of speech as defined in the First Amendment? These and other

issues vary depending on the interpretation of the Constitution. Through entertaining and informative annotations, *THE WORDS WE LIVE BY* offers a new way of looking at the Constitution. Its pages reflect a critical, respectful and appreciative look at one of history's greatest documents. *THE WORDS WE LIVE BY* is filled with a rich and engaging historical perspective along with enough surprises and fascinating facts and illustrations to prove that your Constitution is a living--and entertaining--document. Updated now for the first time, *THE WORDS WE LIVE BY* continues to take an entertaining and informative look at America's most important historical document, now with discussions on new rulings on hot button issues such as

immigration, gay marriage, and affirmative action.

The Diversity Paradox Little, Brown Winner of the 2015 Avery O. Craven Prize from the Organization of American Historians Winner of the 2015 Sidney Hillman Prize A groundbreaking history demonstrating that America's economic supremacy was built on the backs of slaves Americans tend to cast slavery as a pre-modern institution -- the nation's original sin, perhaps, but isolated in time and divorced from America's later success. But to do so robs the millions who suffered in bondage of their full legacy. As historian Edward E. Baptist reveals in *The Half Has Never Been Told*, the expansion of slavery in the first eight decades after American independence drove the evolution and modernization

of the United States. In the span of a single lifetime, the South grew from a narrow coastal strip of worn-out tobacco plantations to a continental cotton empire, and the United States grew into a modern, industrial, and capitalist economy. Told through intimate slave narratives, plantation records, newspapers, and the words of politicians, entrepreneurs, and escaped slaves, *The Half Has Never Been Told* offers a radical new interpretation of American history.

to name just a few of the hundreds of voices that appear in *Voices of a People's History of the United States*, edited by Howard Zinn and Anthony Arnove. Paralleling the twenty-four chapters of Zinn's *A People's History of the United States*, *Voices of a People's History* is the long-awaited companion volume to the national bestseller. For *Voices*, Zinn and Arnove have selected testimonies to living history—speeches, letters, poems, songs—left by the people who make history happen but who usually are left out of history books—women, workers, nonwhites. Zinn has written short introductions to the texts, which range in length from letters or poems of less than a page to entire speeches and essays that run several pages. *Voices of a People's*

The Beginnings of Mass Migration to North America Wadsworth Publishing Company

Signed in 1848, the Treaty of Guadalupe Hidalgo ended the war between the United States and Mexico and gave a large portion of Mexico's northern territories to the United States. The language of the treaty was designed to deal fairly with the people who became residents of the United States by default. However, as Richard Griswold del Castillo points out, articles calling for equality and protection of civil and

property rights were either ignored or interpreted to favor those involved in the westward expansion of the United States rather than the Mexicans and Indians living in the conquered territories.

This second edition builds on the first, while making significant changes that reflect new trends in the study of

American immigration history. The field was first centrally defined in the mid-twentieth century by the study of immigrants from Europe. Asians and Latinos were not considered "immigrants"--People who settled permanently in the United States. They were considered "birds of passage"--people who did not experience the same social processes of incorporation and assimilation as did Europeans. As immigration from Asia and Latin America to the United States surged in the last third of the twentieth century, scholars began to pay more attention to their experiences, both historical and contemporary. A much more diverse and inclusive portrait of the American immigration experience has emerged.

The Politics of Race and Ethnicity in

the United States eBookIt.com

A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, *Publishers Weekly* called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his

own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.

The Half Has Never Been Told Hachette Books

American historians have long been fascinated by the "peopling" of North America in the seventeenth century. Who were the immigrants, and how and why did they make their way across the ocean? Most of the attention, however, has been devoted to British immigrants who came as free people or as

indentured servants (primarily to New England and the Chesapeake) and to Africans who were forced to come as slaves. *Trade in Strangers* focuses on the eighteenth century, when new immigrants began to flood the colonies at an unprecedented rate. Most of these immigrants were German and Irish, and they were coming primarily to the middle colonies via an increasingly sophisticated form of transport. Wokeck shows how first the German system of immigration, and then the Irish system, evolved from earlier, haphazard forms into modern mass transoceanic migration. At the center of this development were merchants on both sides of the Atlantic who organized a business that enabled them to make profitable use of underutilized cargo

space on ships bound from Europe to the British North American colonies. This trade offered German and Irish immigrants transatlantic passage on terms that allowed even people of little and modest means to pursue opportunities that beckoned in the New World. *Trade in Strangers* fills an important gap in our knowledge of America's immigration history. The eighteenth-century changes established a model for the better-known mass migrations of the nineteenth and twentieth centuries, which drew wave after wave of Europeans to the New World in the hope of making a better life than the one they left behind—a story that is familiar to most modern Americans.

The Settling of Japanese America

Penn State Press

Upon its first publication, *A Different Mirror* was hailed by critics and academics everywhere as a dramatic new retelling of our nation's past. Beginning with the colonization of the New World, it recounted the history of America in the voice of the non-Anglo peoples of the United States--Native Americans, African Americans, Jews, Irish Americans, Asian Americans, Latinos, and others--groups who helped create this country's rich mosaic culture. Now, Ronald Takaki has revised his landmark work and made it even more relevant and important. Among the new additions to the book are: --The role of black soldiers in preserving the Union --The history of Chinese Americans from 1900-1941 --An investigation into the

hot-button issue of "illegal" immigrants from Mexico --A look at the sudden visibility of Muslim refugees from Afghanistan. This new edition of *A Different Mirror* is a remarkable achievement that grapples with the raw truth of American history and examines the ultimate question of what it means to be an American.

Freedom Summer For Young People
Basic Books

In an extraordinary blend of narrative history, personal recollection, & oral testimony, the author presents a sweeping history of Asian Americans. He writes of the Chinese who laid tracks for the transcontinental railroad, of plantation laborers in the canefields of Hawaii, of "picture brides" marrying strangers in the hope of becoming part

of the American dream. He tells stories of Japanese Americans behind the barbed wire of U.S. internment camps during World War II, Hmong refugees tragically unable to adjust to Wisconsin's alien climate & culture, & Asian American students stigmatized by the stereotype of the "model minority." This is a powerful & moving work that will resonate for all Americans, who together make up a nation of immigrants from other shores.
