From Foundations to Future Intellect Books

With its inevitable dependency on the essential, and often contested, nature of art, the subject of assessment or evaluation in art and design education remains a matter of continuing controversy. This collection of essays examines the principal issues as they relate to the main phases of formal education, from primary to post-compulsory. Together, the papers provide an historical and philosophical analysis of the present state of assessment in art and design in our schools and colleges, and significantly, they map out some possible directions for reform.

The ... Mental Measurements Yearbook

This book introduces and explores major topics in contemporary educational measurement: criterion-referenced testing, item response theory (IRT), computer-based testing, cross-lingual and cross-cultural assessment, and accountability testing. Psychometric experts describe forward-looking measurement practices and provide a contextualized understanding of how and why they were developed, how they can be used, and where they may go in the future. In addition to presenting key concepts and formulas, the volume covers established and emerging applications and discusses recurrent challenges that require additional

research. A helpful glossary of abbreviations is included. The book is grounded in the work of Ronald K. Hambleton.
