Winner of the Nero Wolfe Award It is 1921 and Mary Russell--Sherlock Holmes's brilliant apprentice, now an Oxford graduate with a degree in theology--is on the verge of acquiring a sizable inheritance. Independent at last, with a passion for divinity and detective work,

her most baffling mystery may now involve Holmes and the burgeoning of a deeper affection between herself and the retired detective. Russell's attentions turn to the New Temple of God and its leader, Margery Childe, a charismatic suffragette and a mystic, whose draw on the young theology scholar is irresistible. But when four bluestockings from the Temple turn up dead shortly after changing their wills, could sins of a capital nature be afoot? Holmes and Russell investigate, as their

partnership takes a surprising turn in *A Monstrous Regiment of Women* by Laurie R. King.

Renowned author Joseph Bruchac tells a powerful story of a girl who learns more about her Penacook heritage while sheltering in place with her grandparents during the coronavirus pandemic. Malian loves spending time with her grandparents at their home on a Wabanaki reservation—she's there for a visit when,

suddenly, all travel shuts down. There's a new virus making people sick, and Malian will have to stay with her grandparents for the duration. Everyone is worried about the pandemic, but Malian knows how to keep her family safe: She protects her grandparents, and they protect her. She doesn't go out to play with friends, she helps her grandparents use video chat, and she listens to and learns from their stories. And when Malsum, one of the dogs living on the rez, shows up at their door, Malian's family knows that he'll protect them too. Told in verse inspired by oral storytelling, this novel about the COVID-19 pandemic highlights the ways in which Indigenous nations and communities cared for one another through plagues of the past, and how they keep caring for one another today. **\*\*Four starred reviews!\*\*** Boston Globe-Horn Book Fiction & Poetry Honor NPR Books We Love Kirkus Reviews Best Books School Library Journal Best Books Chicago Public Library Best Fiction for Younger Readers Jane Addams Children's Book Award Finalist Nerdy Book Club Award—Best Poetry and Novels in Verse

A warm and entertaining memoir about what happens when you foster fifty dogs in less than two years—and how the dogs save you as much as you save them. When Cara felt her teenaged children slipping away and saw an empty nest on the horizon, she decided the best way to fill that void was with dogs—lots of them—and so her foster journey began. In 2015, her Pennsylvania farm became a haven for Operation Paws for Homes. There were the nine puppies at once, which arrived with less than a day's notice; a heart- worm positive dog; a deeply traumatized stray pup from Iraq; and countless others who just needed a gentle touch and a warm place to sleep. Operation Paws for Homes rescues dogs from high-kill shelters in the rural south and shuttles them north to foster homes like Cara's on the way to their forever homes. What started as a search for a good dog, led to an epiphany that there wasn't just one that could fill the hole left in her heart from her children gaining independence—she could save dozens along the way. The stories of these remarkable dogs— including an eighty-

pound bloodhound who sang arias for the neighbors—and the joy they bring to Cara and her family (along with a few chewed sofa cushions) fill the pages of this touching and inspiring new book that reveals the wonderful rewards of fostering. When asked how she can possibly say goodbye to that many loveable pups, Cara says, "If I don't give this one away, I can't possibly save another." Filled with humanity and hope, *Another Good Dog* will take the reader on an journey of smiles, laughs, and tears—and lead us to wonder how many other good dogs are out there and what we can do to help.

A concise, nontechnical overview of the development of machine translation, including the different approaches, evaluation issues, and major players in the industry. The dream of a universal translation device goes back many decades, long before Douglas Adams's fictional Babel fish provided this service in *The Hitchhiker's Guide to the Galaxy*. Since the advent of computers, research has focused on the design of digital machine translation tools—computer programs capable of automatically

translating a text from a source language to a target language. This has become one of the most fundamental tasks of artificial intelligence. This volume in the MIT Press Essential Knowledge series offers a concise, nontechnical overview of the development of machine translation, including the different approaches, evaluation issues, and market potential. The main approaches are presented from a largely historical perspective and in an intuitive manner, allowing the reader to understand the main principles without knowing the mathematical details. The book begins by discussing problems that must be solved during the development of a machine translation system and offering a brief overview of the evolution of the field. It then takes up the history of machine translation in more detail, describing its pre-digital beginnings, rule-based approaches, the 1966 ALPAC (Automatic Language Processing Advisory Committee) report and its consequences, the advent of parallel corpora, the example-based paradigm, the statistical paradigm, the segment-based approach, the introduction of more linguistic knowledge into the systems, and the

latest approaches based on deep learning. Finally, it considers evaluation challenges and the commercial status of the field, including activities by such major players as Google and Systran.

Gerald tells of the very unusual animals he would add to the zoo, if he were in charge. *The Daily Blog of Harley The Dog* Spectra Learn to communicate with your

dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to

trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

A policewoman chronicles her historic legal battle against sexism within the LAPD in this “valuable . . . and at times, frightening” memoir (Kirkus Reviews). Former Army major Fanchon Blake dreamed of becoming a top cop. She joined the LAPD in 1948, confident that her efforts and talent would be rewarded. Instead, despite long hours and high achievement ratings, Blake—like all other women on the force—was denied promotion time and again. Over the years, the tenacious officer challenged the LAPD’s discriminatory agenda from within. Eventually, she broke the “blue wall of silence” by going to the press. And when all else failed, Blake saw one last chance

to effect change: she filed a complaint against the LAPD with the federal Equal Employment Opportunity Commission in 1973. What followed was a harrowing struggle against discrimination that would make history for women and other minority groups. Despite the ensuing verbal abuse, silent treatment, and intimidation, Blake pushed on. Seven years later, her heroic efforts would finally make it possible for women to bust through the brass ceiling.

A personal memoir by bestselling author and celebrity journalist Glenn Plaskin, *KATIE* is a moving story about a man who discovers the true meaning of family after adopting a cocker spaniel puppy. Through the magnetic personality of his mischievous dog, the author soon makes powerful connections with several of his down-the-hall neighbors in a high-rise located in the unique Battery Park City neighborhood of Lower Manhattan. First, Katie trots into the lives of Pearl and Arthur, a warm-hearted elderly couple just a few doors down from Glenn. Later, John, a single Dad, and his rambunctious young son, Ryan, also move in and are seduced

by Katie's charms. All of their lives are profoundly changed as they are transformed from neighbors to friends to family, with Pearl as matriarch. The motherless boy finds a "Granny"; his Dad inherits a mother, Glenn discovers a confidante. Set in New York City, we witness nearly sixteen years of antics and family adventures spanning Hollywood high times, bad health, accidents, blustery winters, even the terrors of 9/11. Through it all, the family clings to each other, sharing a deep bond that give each comfort, support and security. Based upon a widely-read article in *Family Circle*, here is an unforgettable story about the love that makes a family—one that transcends the hard realities of time, tragedy, and inevitable loss.

A bestselling modern classic—both poignant and funny—narrated by a fifteen

year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the

brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read. Dogs have been mankind's faithful companions for tens of thousands of years, yet today they are regularly treated as either pack-following wolves or furry humans. The truth is, dogs are neither -- and our misunderstanding has put them in serious crisis. What dogs really need is a spokesperson, someone who will assert their specific needs. Renowned anthrozoologist Dr. John Bradshaw has made a career of studying human-animal interactions, and in *Dog Sense* he uses the latest scientific research to show how humans can live in harmony with -- not just dominion over -- their four-legged friends. From explaining why positive reinforcement is a more effective (and less damaging) way to control dogs' behavior than punishment to demonstrating the

importance of weighing a dog's unique personality against stereotypes about its breed, Bradshaw offers extraordinary insight into the question of how we really ought to treat our dogs.

John Sanborn became one of the most prominent protagonists of the American video art scene in the 1970s and 1980s. His work ranges from the beginnings of experimental video art to MTV music videos, interactive art, and digital media art. Consulting with Apple and Adobe, he contributed to shaping the possibilities of new image tools and was instrumental to the dawning of the digital image revolution in California. This monograph brings together a collection of works that spans over four decades of exploring sound, music, cultural identity, memory, mythologies, and the human compulsion to tell stories. Essays by video art experts, contributions by his friends and companions, and a conversation between Sanborn and acclaimed media artist Dara

Birnbaum explore the tension between mass media and contemporary art. Sanborn himself traces the unique arc of his career and talks about a journey that took him from museums and alternative spaces to television networks, Hollywood and Silicon Valley before returning to the art world. Few other artists working with media can claim to have delved into so many visual territories. JOHN SANBORN (\*1954, Huntington, New York) is a key member of the second wave of American video artists. His body of work spans the early days of experimental video art in the 1970s through the heyday of MTV music/videos and interactive art to the digital media art of today. His work has been exhibited on television, as video installations, video games, Internet experiences and in live performances such as *God in 3 Persons*, a collaboration with *The Residents*, at MoMA in New York (2020). Sanborn lives and works in Berkeley, California.

Life is getting tricky for eleven-year-old Madison Morgan. She's not interested in

boys, fashion, or the latest gossip, unlike her best friend Paige. Since her mom died, her stepdad, who she knows as Henry, has way too many complicated systems around the house but way too little to say about her mom's death. To top it off, in her first year of middle school, Madison and her new friend Cooper have become the "school project" of a bully named Donald. And all she really wants is a dog to call her own, but all she gets is the parental-brush-off. What is a straight-talking, spunky middle grader going to do? Kids from ages nine- to twelve-years-old are sure to get a laugh from every page of *Madison Morgan: When Dogs Blog*, the young adult novel by author Pam Torres that charts the sometimes tough, frequently funny days of the wise-cracking, dog-loving Madison. When her dad arrives home with a foster dog, a scrawny brown terrier named Lilly, Madison is amazed to find she has an ability to understand dogs, their emotions, and often their pasts. However, this rare ability also leads her to uncover some extremely harmful activities that are happening right in her very own neighborhood. If she exposes the culprits

behind them, she may risk losing Cooper, not to mention destroy her plan to remain invisible at school. As Madison struggles to feel normal and understand her ability to translate dog-speak, this coming-of-age story shares how one quirky young girl saves the day with the help of her father and their friend Netta at the Second Chance Rescue Shelter. Frank, funny, and full of adventure, *Madison Morgan: When Dogs Blog* is a must for any middle grader, who is certain to be enthralled by this dog blogger.

A golden retriever narrates a hilarious, heart-tugging tale of a dog and his humans as he tries to keep his family together while everything around them falls apart. Ever since Cosmo became a big brother to Max ten years ago, he’s known what his job was: to protect his boy and make him happy. Through many good years marked by tennis balls and pilfered turkey, torn-up toilet paper and fragrant goose poop, Cosmo has doggedly kept his vow. Until recently, his biggest problems were the evil tutu-wearing sheepdog he met on Halloween and the arthritis in his own joints. But now, with Dad-scented blankets appearing on the couch and arguing voices getting louder, Cosmo senses a tougher challenge ahead. When Max gets a crazy idea to teach them both a dance routine for a contest, how can Cosmo refuse, stiff hips or no? Max wants to remind his folks of all the great times they’ve had together dancing — and make them forget about the “d” word that’s making them all cry. Told in the open, optimistic, unintentionally humorous voice

of a golden retriever, I, Cosmo will grab

readers from the first page — and remind  
them that love and loyalty transcend

whatever life throws your way.
