guide to the economic evaluation, risk evaluation and decision analysis of oil and gas projects through all stages of the asset lifecycle, from exploration to late life opportunities. This book will help readers understand and make decisions with regard to petroleum investment, portfolio analysis, discounting, profitability indicators, decision tree analysis, reserves accounting, exploration and production (E&P) project evaluation, and E&P asset evaluation. Includes case studies and full color illustrations for practical application Arranged to reflect lifecycle structure, from exploration through to decommissioning Demonstrates industry-standard decision-making techniques as applied to petroleum investments in the oil and gas industry

Curricula for Sustainability in Higher Education CRC Press

Admissions is critical for every educational institution. However, recruiting quality students for business schools is challenging, leading to the need to identify and understand challenges that threaten admission. *New Age Admissions Strategies in Business Schools* provides innovative insights into the opportunities and

challenges for student recruitment in business schools, such as cross-cultural nuances and attracting international applicants, while also delivering strategies for recruitment across all program types, including undergraduate, graduate, executive, and part-time admissions. While highlighting topics that include effective communication, international admission, and hybrid learning, this publication is ideal for policy directors, administration heads, researchers, and deans in education to understand the market well and design the processes of admissions.

Introduction to Quantitative Methods in Business Routledge

Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate's ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai's real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the

legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured. Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations,

The Economist John Wiley & Sons Master's Thesis from the year 2016 in the subject Energy Sciences, grade: 8.5, University of Petroleum and Energy Studies, course: MBA in oil and gas management, language: English, abstract: This paper examines the Indian energy sector with special focus on the TAPI pipeline. The distance from major fossil fuel-rich countries to Indian borders are not more than 1000 to 2000 km either by sea or land route. The best possible mode for importing natural gas is the trans-national pipelines from Turkmenistan, Myanmar or Iran. Turkmenistan, Afghanistan, Pakistan and India Pipeline - the "TAPI Pipeline" is a 1735 km long land

pipeline travelling through these countries. This pipeline will have an annual discharge capacity of 33BCM and will play a crucial role for domestic demand and supply. The research objective of this thesis is to analyze different actors in risk, their role in the risks and their possible long term impacts. These risks are categorized as security, price, geopolitics, environment, legal, economical, production and demand-supply. The study develops some scenarios on the basis of changing circumstances, and examines some pertinent issues regarding the pipeline's technical feasibility.

Master of Business Administration Career Bible Hotcourses

As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's

unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."

This new edition covers many significant changes impacting the petroleum industry including important updates such as current industry practice issues from a proprietary survey conducted by the Institute of Petroleum Accounting, and practical guidance on new standards of revenue recognition, joint arrangements, consolidated financial statements, and disclosure of interests in other entities which are of critical importance to those involved or interested in the petroleum industry. New chapters covering midstream operations, master limited partnerships, and SEC considerations have been added. The updated text will also address numerous operational issues that continue

to evolve with the demand for capital, inherent industry risks, and the impacts of product price fluctuation.

International Arctic Petroleum Cooperation
Springer

"Advances in Raw Material Industries for Sustainable Development Goals" presents the results of joint scientific research conducted in the context of the Russian-German Raw Materials Forum. Today Russia and Germany are exploring various forms of cooperation in the field of mining, geology, mineralogy, mechanical engineering and energy. Russia and Germany are equally interested in expanding cooperation and modernizing the economy in terms of sustainable development. The main theme of this article collection is connected with existing business ventures and ideas from both Russia and Germany. In this book the authors regard complex processes in mining industry from various points of view, including: - modern technologies in prospecting, exploration and development of mineral resources - progressive methods of natural and industrial mineral raw materials processing - energy technologies and digital technologies for

sustainable development - cutting-edge technologies and innovations in the oil and gas industry. Working with young researchers, supporting their individual professional development and creating conditions for their mobility and scientific cooperation are essential parts of Russian-German Raw Materials Forum founded in Dresden 13 years ago. This collection represents both willingness of young researchers to be involved in large-scale international projects like Russian-German Raw Material Forum and the results of their long and thorough work in the promising areas of cooperation between Russia and Germany.

Elsevier

This books presents the curricula necessary for sustainability in higher education. It shows how the learning process is transforming in order to promote sustainability. It prepares administrators, teachers and students to diffuse the development in the field, showing a curricula based on three interconnected pillars: the environment, the economic and the social aspects. It contains 8 chapters introducing research advances in the field.

Business India Princeton Review
Oil and gas projects have special characteristics that need a different technique in project management. The development of any country depends on the development of the energy reserve through investing in oil and gas projects through onshore and offshore exploration, drilling, and increasing facility capacities. Therefore, these projects need a sort of management match with their characteristics, and project management is the main tool to achieving a successful project. Written by a veteran project manager who has specialized in oil and gas projects for years, this book focuses on using practical tools and methods that are widely and successfully used in project management for oil and gas projects. Most engineers study all subjects, but focus on project management in housing projects, administration projects, and commercial buildings or other similar projects. However, oil and gas projects have their own requirements and characteristics in management from the owners, engineering offices, and contractors' side. Not only useful to graduating engineers, new hires, and students, this volume is

also an invaluable addition to any veteran project manager's library as a reference or a helpful go-to guide. Also meant to be a refresher for practicing engineers, it covers all of the project management subjects from an industrial point of view specifically for petroleum projects, making it the perfect desktop manual. Not just for project managers and students, this book is helpful to any engineering discipline or staff in sharing or applying the work of a petroleum project and is a must-have for anyone working in this industry.

A Complete Guide to Professional, Vocational and Academic Qualifications in the United Kingdom
Kogan Page Publishers

Provides a detailed overview of the best business schools across North America, including information on each school's academic program, competitiveness, financial aid, admissions requirements, and social scenes.

The Best 296 Business Schools, 2013 Edition Vault Inc.

"Our Best 357 Colleges is the best-selling college guide on the market because it is the voice of the students. Now we let graduate students speak for themselves,

too, in these brand-new guides for selecting the ideal business, law, medical, or arts and humanities graduate school. It includes detailed profiles; rankings based on student surveys, like those made popular by our Best 357 Colleges guide; as

well as student quotes about classes, professors, the social scene, and more. Plus we cover the ins and outs of admissions and financial aid. Each guide also includes an index of all schools with the most pertinent facts, such as contact

information. And we've topped it all off with our school-says section where participating schools can talk back by providing their own profiles. It's a whole new way to find the perfect match in a graduate school."
